The copy filmed here has been reproduced thanks to the generosity of:

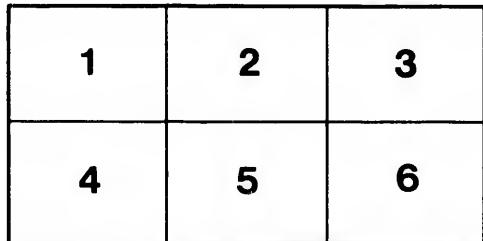

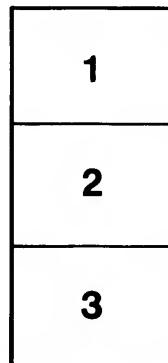

Library of the Public Archives of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol → (meaning "CONTINUED"), or the symbol ▽ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

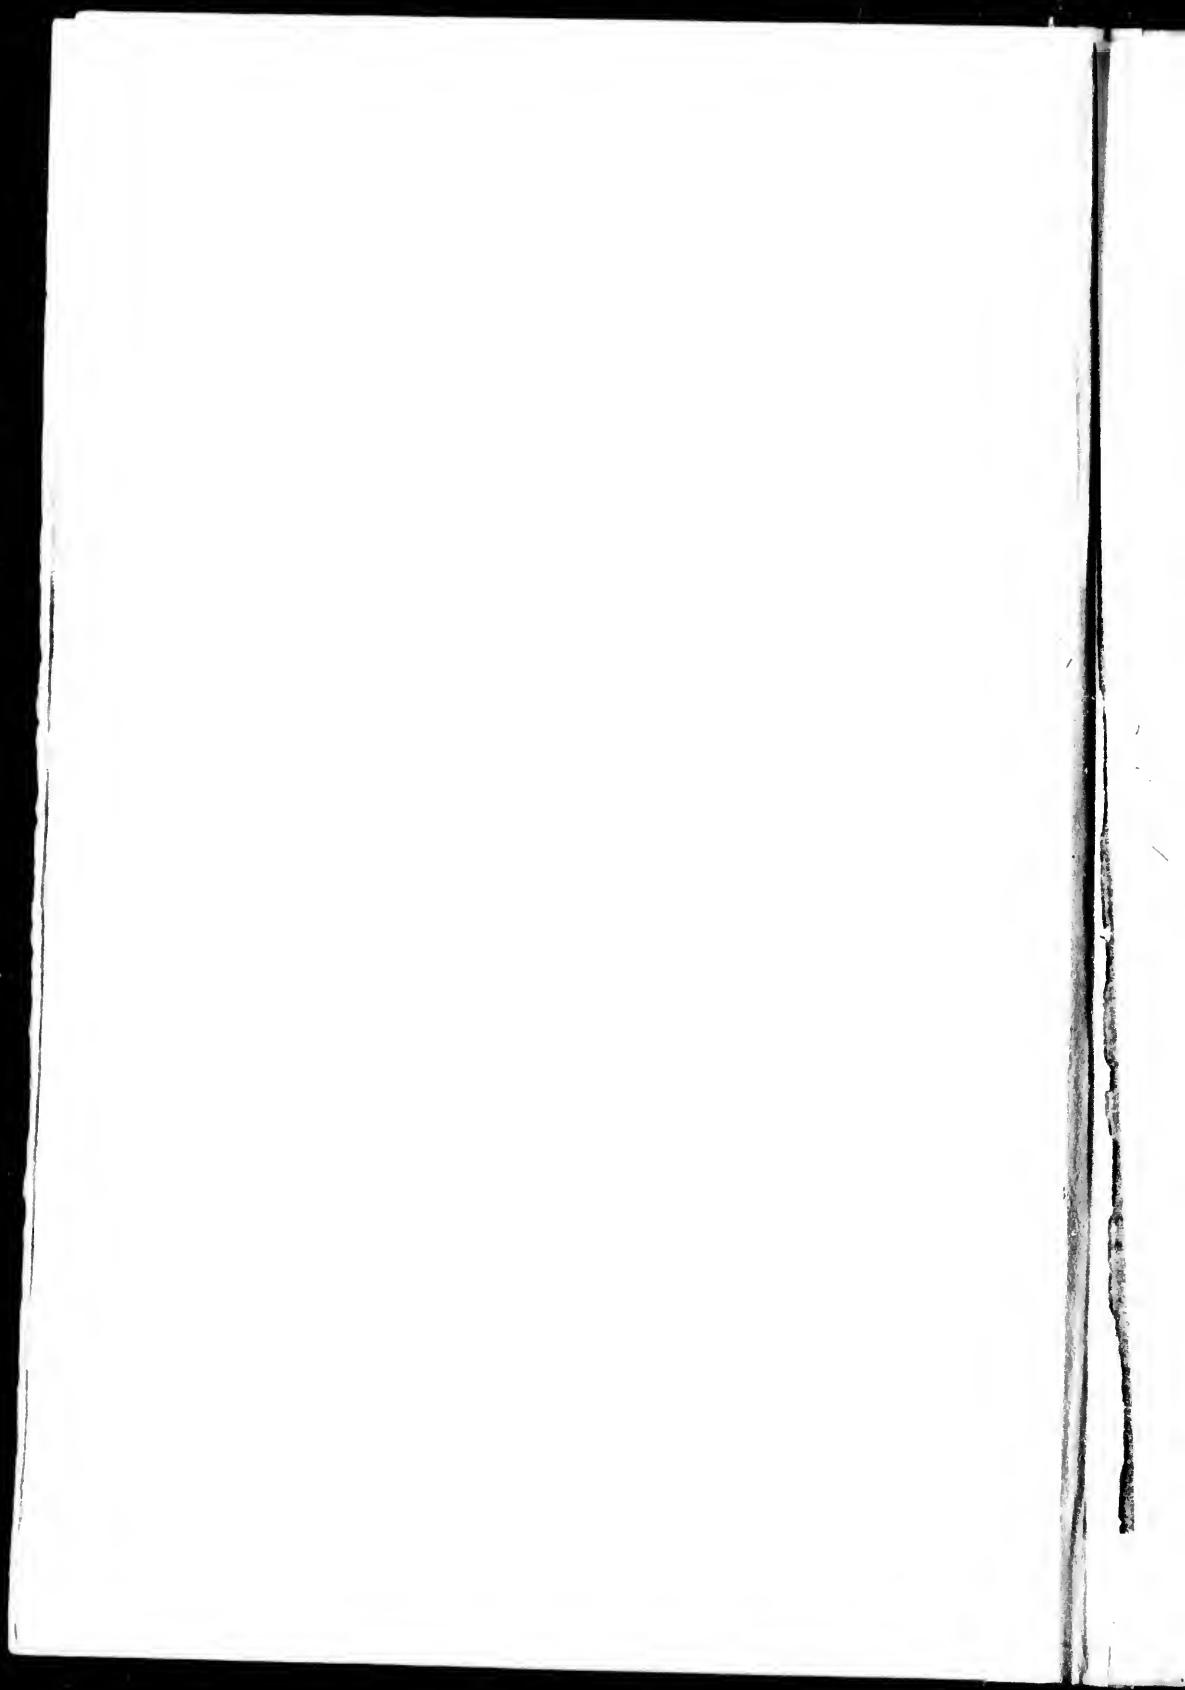

La bibliothèque des Archives publiques du Canada

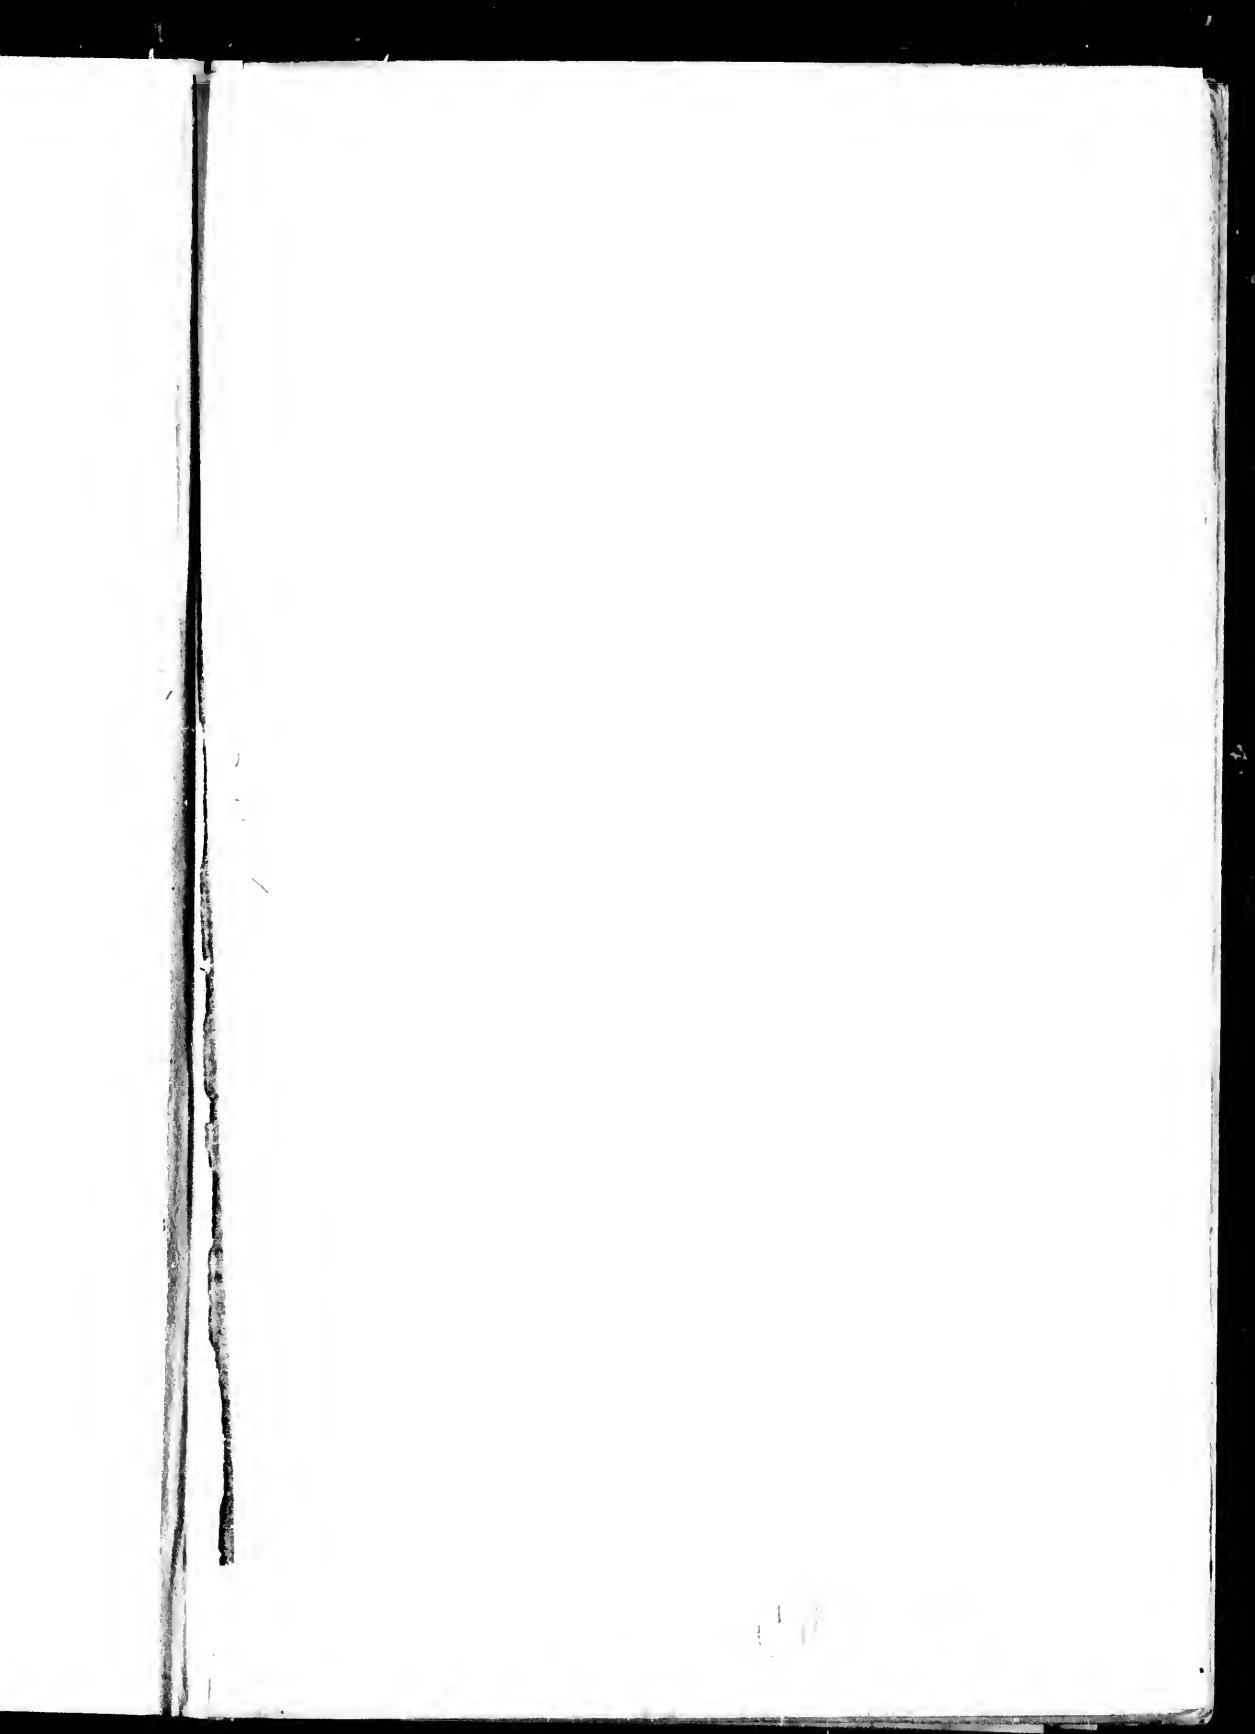

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

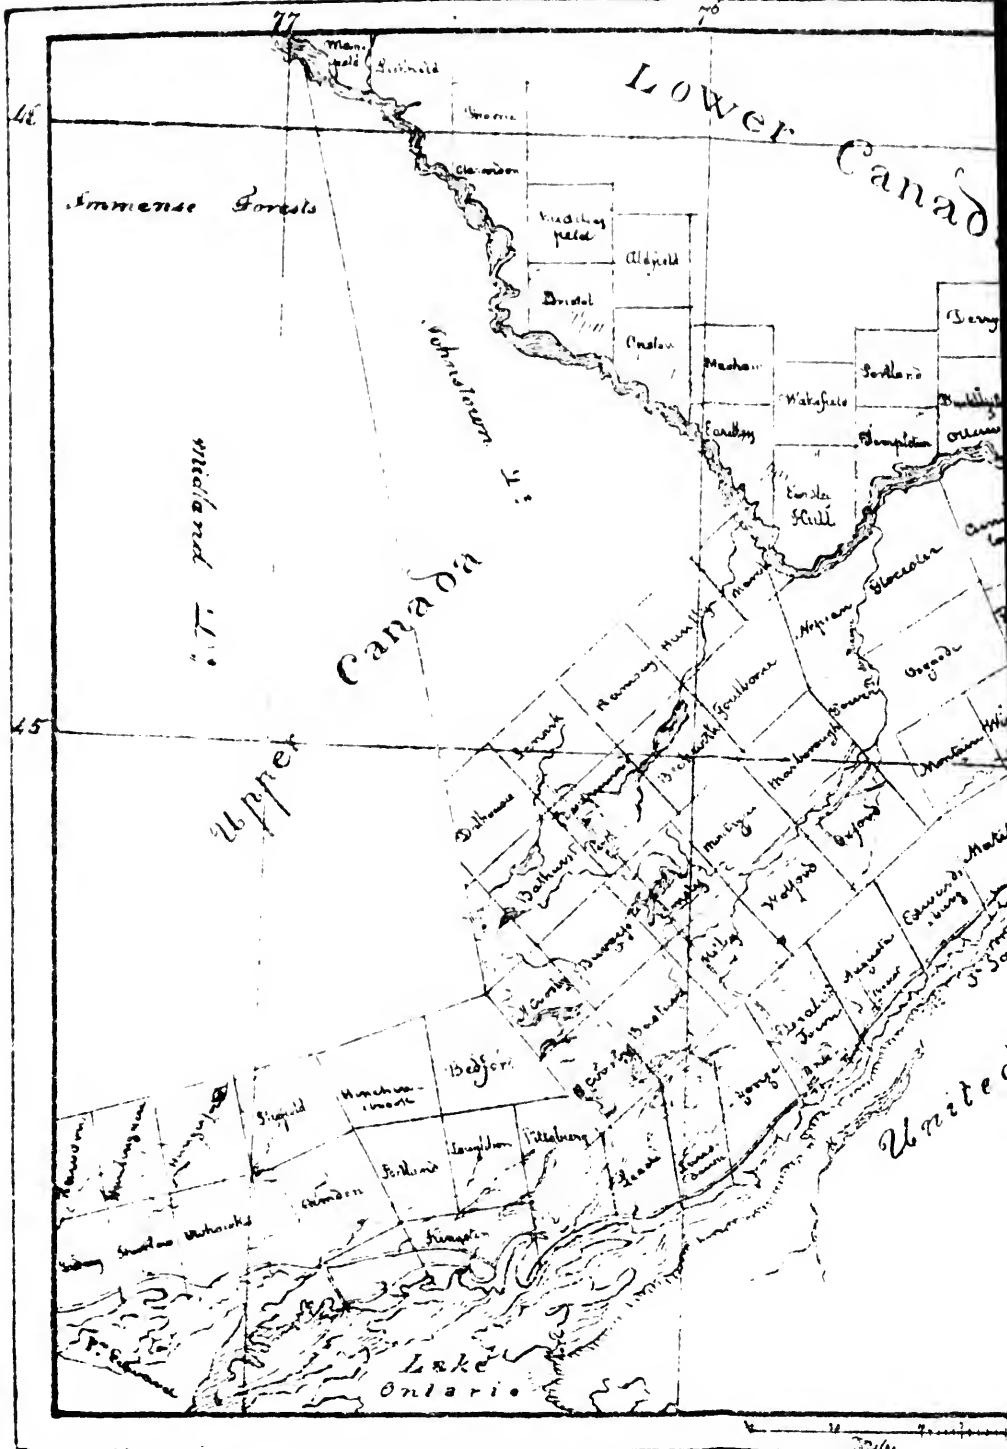

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole → signifie "A SUIVRE", le symbole ▽ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

## INTRODUCTION.

---

To the Public in general—to those Families who have Emigrated to British America—and, in particular, to those Individuals and Families who expect to follow their relations and friends, already settled in Upper Canada,—this Publication is presented with dutiful respect.

As the most part of the materials have already been published in small, detached pieces, and through different mediums, it has been recommended to us to collect those scattered fragments, and present them in a connected form, in order that they may be preserved as instructions for future Emigrants; being the history of the foundation of a Scottish Colony, at present rising in the Perth or Johnstown District of Upper Canada.

On the success of that Settlement, depends the temporal happiness of no less than two thousand nine hundred souls, who emigrated during the years 1820 and 1821. The removal of this body of people from the land of their forefathers, was voluntary, and at their own special request. They had shared, for several years, in those privations which the mother-

country experienced, from the great declension of commerce, and the consequent fall on every article of produce and manufactures, which bore heavily on those families that had nothing else to depend upon but their labour, for their support.

This class of people, particularly within the Counties of Lanark and Renfrew, had suffered much, during the years 1816, 1817, 1819, and 1820. About the month of April, 1820, a considerable number of individuals and families, formed themselves into Societies, for the purpose of petitioning Lord Bathurst and His Majesty's Ministers, for liberty to emigrate with their families to Upper Canada, and that Government would be graciously pleased to grant them one hundred acres of land, free of any charge, along with aid in money, implements of husbandry, and building materials, to enable them to get over the first year, until they could raise a crop for their support. The petitions of these Societies were presented by Members of Parliament, who knew the distress which existed in Glasgow and the neighbourhood at that time, and were well acquainted with the situation of the petitioners. During the winter of 1819 and spring of 1820, from ten to fifteen thousand individuals were relieved by the bounty of the humane. And we would not discharge our duty, if we allowed ourselves to pass over, without notice, the humanity of the Magistrates of Glasgow, who employed a great number of the people who could not obtain work, during the summer and autumn of 1819, in public

improvements, particularly in the Green, which is now one of the finest parks belonging to any city in the kingdom. The winter having set in early, prevented out-door work from being carried on; but the liberal subscription which was raised about the close of the year, enabled the Committee for the Relief of the Industrious Poor, to commence their laudable operations, on the 1st day of January, 1820.

To the Gentlemen who formed that Committee, the suffering poor have been much indebted. The applicants were mostly of that class, who were perfectly able to support themselves by their industry, had there been employment for them, and wages in any measure adequate to the support of their families; but it is a well-known fact, that many of the weaving part of the population could not obtain work, and many of those who had work, were not averaging more than five shillings, when their expenses for loom-rent, dressing, &c. was paid. In this state of things, a spirit of discontent was fostered, by those improper characters that are to be found in every society, who, in place of showing sympathy, and aiding in the relief of the poor and needy, often aggravate their sufferings. Under the above-stated circumstances, the petitions from the Societies were received by Lord Bathurst, Secretary of State for the Colonies; and their cause was powerfully advocated by Lord Arch. Hamilton, M.P., Kirkman Finlay, Esq. M. P., John Maxwell, Esq. M.P., and other gentlemen friendly to this measure of relief. Their application procured grants of land,

and aid for those heads of families, and individual petitioners, who were entered on the lists, to be transmitted to the Colonial office, provided the means could be raised to pay their passage and provisions to Quebec. From nine to ten hundred individuals in the County of Lanark, were enabled by the assistance of the district in which they resided, to avail themselves of this offer: and a small subscription was raised in Glasgow, which was applied to aid those emigrants residing in Glasgow and the Barony Parish. The sum given to each individual, was one pound; which was paid to the owners of the vessels, as part of their passage-money, after the agent had examined the customhouse entry list. The vessels which carried out those people, were the Commerce and the Prompt. Shortly after this, five hundred pounds was raised in London, to be applied in taking out as many families from the remaining members of the Societies, who, from want of means, were unable to proceed that season, had not that money been procured. The families who shared this bounty, were decided on by ballot, and most of them had no means to help themselves, as not more could be raised, among one hundred and forty-nine individuals, than one-tenth of the expense. An agreement was entered into for those persons, with the owners of the ship Broke, for one hundred full passengers, at three pounds ten shillings each ton and half of the ship's register. The provisions were laid in and shipped in bulk. This arrangement was much in favour of those Emigrants, as it gave them a right

to the provisions on hand, when the ship arrived at Quebec, which enabled them to pay a debt of fifty-two pounds owing to the owners, and secured by an obligation from the heads of families, twenty-six in number, for two pounds each, to be paid out of the remaining provisions on hand, when they arrived at Quebec. The Agent for the Committee also granted his letter, to secure the owners from any loss in that transaction. The vessel made a quick passage; the people paid their debt; and the above twenty-six heads of families received about twenty-six shillings each, of a balance. This placed them in a very different situation from those Emigrants, who had previously sailed in the two former vessels, who arrived at Quebec, deeply indebted to the owners, for part of their passage and provisions; and, being in this situation, it had nearly lost them the Government aid and countenance, which would have ruined the whole scheme. We would here remark, that no Emigrants should ever go out, whether on the Government grant or on their own account, in debt to the owners or captains of vessels. It has been frequently held out, to persons intending to emigrate to Upper Canada, "That they could get their passage much cheaper in the timber ships, which sail earlier in the spring, for the lower ports; and that they would find no difficulty in getting a passage up the River Saint Lawrence." This is a complete delusion, and has often been the source of much misery to Emigrants. Quebec or Montreal are the only ports for Upper Canada; and it often happens, that ships for the

latter port, will require ten days or a fortnight to make the passage from Quebec to Montreal. The steam-boats are the proper conveyance; and no time should be lost, in proceeding to the place of settlement as fast as possible. We give this information chiefly for the benefit of such families as may emigrate individually, without the aid of Government.

We shall give in detail, the proceedings of the Committee who superintended the Emigration Societies, which followed in the spring of 1821, annexing such information and letters from the settlers, as, we conceive, will be found interesting and useful; and which may be considered to be a fair representation of the situation and success of the settlers, for which they are at once grateful to the Government, and to the Gentlemen who assisted them in removing themselves and families to their present place of residence, where they have the rational prospect of being able to provide for their future wants, by their own industry.

As this public effort for the relief of our labouring population, may find a place in the annals of Britain, we may be allowed to express our desires, that our countrymen may have carried those moral and religious habits in which they have been educated, into that new country whither they have gone, and that in their prosperity, they may recollect, "That the earth is the Lord's, and the fulness thereof: the world, and all who dwell therein;" and that though removed, in the course of Divine Providence,

from their native shores, they can take up the language of our sublime Poet, and, in humble dependence, exclaim:—

“ Should fate command me to the farthest verge  
Of the green earth, to distant barbarous climes,  
Rivers unknown to song; where first the sun  
Gilds Indian mountains, or his setting beam  
Flames on the Atlantic isles; 'tis nought to me:  
Since God is ever present, ever felt,  
In the void waste, as in the city full;  
And where He vital breathes, there must be joy.”

To tender such acknowledgments as our feelings would dictate, to all those friends, who, in the cause of humanity, assisted in forwarding the late salutary emigration, would swell out this Introduction to an improper length. But we cannot omit noticing the liberal conduct of the Editor of the Glasgow Chronicle and Journal, who readily admitted into his columns, such letters and papers as were useful for giving information, and leading public attention to the many thousands of acres of uncultivated, but excellent land, in the province of Upper Canada. A few years, it is hoped, will show the friends of these infant settlements, that, in a temporal and spiritual sense, the work has not been in vain.

.....

## [CIRCULAR.]

SIR,

GOVERNMENT having, at the solicitation of Lord Archibald Hamilton and Kirkman Finlay, Esq. proposed liberal assistance, in order to the settlement of a few hundred persons, belonging to this city and neighbourhood, on ground to be allotted to them in Upper Canada; but on this express condition, that such persons pay the expense of their own transport to Quebec;—a number who intend to take the advantage of this proposal, are able to pay their passage without any assistance from the public, and have accordingly made an agreement with a ship-owner; but a number more require some addition to their own means:—it is proposed to assist them to the extent of One Pound for each person. For this purpose a subscription has been begun, to which we request you will have the goodness to affix your name, with such sum as you think proper. Some of the persons themselves will wait upon you for this purpose. No subscription papers will be issued but what are signed by us, and a collector will be appointed to receive the money; so that you need not pay it till you are again called upon. We think there is no doubt that by assisting a few hundred persons in this way, the condition of those who remain will be rendered more comfortable, as they will more easily find employment, and adequate wages.—We are, &c.

GILBERT WATSON,  
ROBERT DALGLISH,  
W. M'GAVIN.

GLASGOW, June 3d, 1820.

[From the Glasgow Chronicle.]

## EMIGRATION TO UPPER CANADA.

*To the Editor of the Glasgow Chronicle.*

SIR,

I OBSERVE a paragraph in your paper of yesterday, giving a hint to the public, that the Emigrants, who are to proceed this season to Upper Canada, would be much obliged by donations of Bibles, and other books.

As the five Societies are to sail in the course of this and next week from Greenock, in number about two hundred families, such donations, I have cause to know, will be received with the greatest gratitude; and the happy effect which may be produced by such gifts, may be of such a nature, as to make their children's children recollect and bless the givers.

The Committee of Management for procuring the subscriptions of One Pound for each individual in the families of four of these Societies, belonging to Glasgow, the Gorbals, and Barony Parish,—about four hundred persons, who will require that aid to enable them, along with their own means, to pay their passage,—have appointed me to act as Agent for them. Acting, therefore, in that capacity, I have visited many of those families, and, as far as I can judge, I consider them fit persons for establishing a colony; and that, in process of time, a little Glasgow may be built in that quarter of the world. How cheering it is to think, that, by the aid of a generous public, they will be enabled, after the daily labour of cultivating their new fields, to retire

and cultivate the best of fields, the human mind, the highest and noblest part of our nature. That they will have many privations to encounter for a few years, we all know, but these may be lessened by well-timed reflection and study. Should there be any of our fellow-citizens who may hesitate, on the plea that those men may carry away with them the science and intelligence of old Scotia, I would beg leave to remind them of what uncle Toby said to the fly, "Poor creature, there is room enough in the world for thee and me." The present generation need be nowise alarmed, for any evil consequence of that nature being produced by emigration to that quarter.

Donations of Books will be received for the following Societies, *viz.* Glasgow Emigrating Society, Bridgeton Canadian do. Abercrombie do. do. Bridge-ton Transatlantic do. and Anderston and Rutherglen do. by Messrs. Chalmers & Collins, Booksellers, Wilson-Street.

The Glasgow and Abercrombie are the smallest in number. The names of the donors will oblige.

I am, &c.

ROBERT LAMOND.

GLASGOW, 14th June, 1820.

[From the Glasgow Chronicle, 13th July, 1820.]

WE are informed by a correspondent, that the ship Broke sailed from the East Quay, Greenock, on Sabbath morning, at eight o'clock, with about 176

in mind,

passengers. The greater part of them belonged to the Abercrombie, Transatlantic, and Bridgeton Societies, (members and their families who had been ballotted out of the said Societies,) and, being all poor, they were unable to pay for their own transport, not having raised more money amongst them than about one-tenth of the expense, the fund which enabled them to proceed, being raised in London, with a little assistance here.

Sabbath morning being fine, and the wind fair, the ship lay to for a short time, until the passengers were all got on board, and mustered on the deck. Our correspondent left them in high spirits, a short way below the Clough, after having expressed their gratitude to all who had befriended them. Amongst the last remarks he heard, while they were watching the boiling pots, was, that they had sailed quicker than they had expected, and had not got time to get breakfast; but the beef was good, and nearly ready; and that they had seen little of that kind of food for some time past.

---

*To Mr. ROBERT LAMOND, Agent for the Glasgow Committee  
on Emigration.*

GREENOCK, 8th July, 1820.

DEAR SIR,

HAVING not a moment to lose, we hasten to return you our sincere thanks for the particular attention and care manifested by you, for our accommodation and comfort. At the same time, we fondly hope, that you will be so kind as to return

our thanks to Lord Archibald Hamilton, Kirkman Finlay, Esq. M.P. Mr. Wilberforce, M. P. and Henry Monteith, Esq. M.P. likewise to Mr. Maxwell, M.P. as well as the other Honourable Gentlemen, who manifested a willingness to assist in removing a few of their distressed countrymen, to a place where they have at least a prospect of receiving the fruits of the earth, as a compensation for their labour.

Dear Sir,—It would be unnecessary for us to recapitulate the privations and misery which the most of us have experienced for years past; at the same time, there is nothing that shall ever erase from our minds, the kindness manifested to us by Mr. M'Gavin, and particularly for his frankness and readiness in serving even the meanest of his countrymen. We request that you would likewise remember us to Robert Dalglish, Esq. James Oswald, Esq. and Baillie Watson.

Sir, by publishing these our grateful acknowledgments, you will add one more to the many obligations which we already owe you for your attention. We add no more, but remain yours, in the name and behalf of the Emigrants,

JOHN M'LACHLAN.

THOMAS WHITELAW.

*At GLASGOW, 24th October, 1820, within the  
Black Bull Inn—*

PRESENT,

LORD ARCHIBALD HAMILTON, PRES.

COL. MURE, of Caldwell.

KIRKMAN FINLAY, Esq.

JAMES OSWALD, Esq.

ROBERT DALGLISH, Esq.

WILLIAM M'GAVIN, Esq.

ROBERT BROWN, Esq.

There was laid before the Meeting, the following  
Lists of Emigrant Societies:—

|                               | <i>Individuals.</i> |
|-------------------------------|---------------------|

A letter from Mr. Goulburn, Colonial Office, to Mr. Finlay, was read to the Meeting, stating, that Government was disposed to allow the same terms as given last year, to Emigrants to Canada, from the West of Scotland, to the extent of eighteen hundred

souls, in the next spring; from whence it appears, that the number of applicants far exceeds the number that can be sent out.

The Meeting therefore resolve:—

1st, That no further applications can be received, after this day, till all the lists now given in are disposed of by the Committee, to be hereafter named.

2d, That the terms agreed to be given by Government, with an estimate of the expenses necessary, shall be printed and communicated to each Society, in order that they may say how many of each Society can comply with the terms required by Government, and that their number may be reduced to the number that Government are willing to send out.—The Report must be given in to Mr. Robert Lamond, 43, Ingram-Street, before the 1st of December next.

3d, That a Committee shall be now appointed, to receive the Reports of the Societies, and to concert with them the necessary measures to be pursued, and particularly to see that the money for transport to Quebec, from each Society, shall be provided and lodged in a bank, in sufficient time before the vessels sail in the spring.

4th, That the Committee for the above purposes, shall consist of the following Gentlemen:—

COL. MURE, or, in his absence, the Clerk of Lieutenancy for Renfrewshire,

Mr. FINLAY,

Mr. M'GAVIN, and

Mr. BROWN.

And they elect Mr. Robert Lamond to be Secretary to the Committee, and Mr. M'Gavin to be Convener.

(Signed) A. HAMILTON, PRES.

~~~~~  
Aid granted by Government to Emigrants from the West of Scotland [Lanarkshire & Renfrewshire.]

The Government are ready to assign to the Settlers, on their arrival in Upper Canada, land at the rate of 100 acres for every family, under the usual conditions of residence, and partial cultivation within a limited period, on failure of a compliance with which, the land will, in this, as in all other cases, be resumable by the Crown. The expense of surveying the land, amounting to 15s. per 100 acres, will be defrayed by the Government.

Estimated at 4l. a-head.—It is proposed that the Emigrants should themselves arrange the means, and defray the expense, of their conveyance to Quebec.

Estimated at 2l. a-head.—That the charge of their removal from Quebec, to the place of actual settlement, should be borne by Government, or that the Government should provide the means of transport for the Emigrants and their baggage.

That, on their arrival at the place of settlement, the leaders of the several parties should receive an advance of money, not exceeding 3l. per head for every Emigrant.

That another advance of 3l. per head, should be made to them, at the expiration of three months

after the date of their arrival; and a further advance of $2l.$ at the end of six months after the date of their arrival.

It will be requisite for each party to nominate two or three persons, with whom alone all the communications of the Government will be carried on, and to whom the several advances may be made, under the conditions proposed in the memorandum delivered in by the parties themselves.

Seed, Corn, and Implements of Husbandry, will be supplied to the Emigrants, at prime cost.

Similar advantages would be granted to persons who would prefer settling in the province of Nova Scotia.

Estimate of the probable Expense attending the establishing Settlers and their families upon waste lands in Upper Canada, from the period of their arrival at Quebec, to that of their being in a capacity to provide for themselves.

Which, being divided by 4, makes . . . £9 0 7

Proportion of General Implements,

Amount of Implements for each Settler, £11 0 0

The following is the quantity of provisions, as per late modified regulation, by law established, which each Emigrant must have on board unbroken, on the day the vessel sails from the port. The quantity is considered sufficient for 84 days' passage to Quebec, in the present circumstances of Emigrants. The estimated value of each article, is taken at the prices

they were procured in bulk for the ship Broke, in July last, including prices of barrels for the meal, and may perhaps cover other charges:—

ENGLISH WEIGHT.

18 Pounds Irish Mess Beef, at 4d.	£0	6	0
42 do. Biscuit,	2d.	0	7
132 do. Oat-Meal,	2d.	1	2
6 do. Barley or Pease,	2d.	0	1
6 do. Butter,	10d *.	0	5
3 do. Molasses,	4d *.	0	1
			0
		£2	2
			0

The above quantity must be laid in for each individual above 8 years old.

Each individual from 2 to 8, must have
3-4ths of the above quantity, which is
equal to £1 11 6
Children under 2 years old, must have $\frac{1}{4}$
of the above quantity, which is equal to 1 1 0

*The Lowest Rate of Passage-Money to Quebec,
this Season, was—*

For each individual Passenger above 14
years old, £3 10 0
For each individual Passenger under 14
years, 1-3d †, 1 3 4

* 1821.—The Committee petitioned the Lords of the Treasury, that they would be pleased to dispense with this regulation, and allow the parents, at their own discretion, to lay in porter, tea, sugar, &c. as they were more suitable for the mothers and children; at same time, allow the Butter to be 5 lbs., and the Molasses 6 lbs., which was granted.

† The Act of Parliament requires, that all children under 14 years, be reckoned as 5 to 1 full passenger, and could not to be altered.

The Expense of Passage and Provisions, from Greenock to Quebec, on the above Calculation, will be—

All Emigrants above 14 years of age,

For Passage,	£3	10	0
Provisions,	2	2	0
	5	12	0

All Emigrants from 8 to 14 years,

For Passage,	1	3	4
Provisions,	2	2	0
	3	5	4

All Emigrants from 2 to 8 years,

For Passage,	1	3	4
Provisions,	1	11	6
	2	14	10

All Infant Children under 2 years,

For Provisions,	1	1	0
---------------------------	---	---	---

The Members of the Societies enumerated in the Minutes of the Meeting, will be, by the above statement, enabled to judge if they can furnish the means for the transport of their families to Quebec, which is the terms on which Emigration is to take place in the spring.

The Report from each Society, of how many families they have, who are able to raise the means, with the running number in which they stand on the roll, the name of the head, and the total in the family, signed by the Preses and Clerk, to be delivered in any time before the 1st of December.

Those Societies in the country, who have not received regular forms for the Society roll, may have them, on making any of their friends call at No. 43, Ingram-Street. Every family must bear in mind, that no cooking is allowed on board, while the vessel is at the quay, and the provisions must remain unbroken until the day they sail. Arrangements will be made, that the family shall sleep on board the first night of their arrival. The expense of conveyance to Greenock, with a few days' board there, and a few small necessaries for the voyage, must be added.

Persons who reside in the country, and who may have an opportunity before the spring, should turn their attention to out-door work, if it does not interfere with better employment; and the girls should be taught to knit coarse woollen stockings; also to spin woollen and linen yarn, suited for family purposes; also to be able to cut out men and women's clothes, is very necessary. The boys who are not employed, should be taught to make small fishing-nets, and to prepare fishing-tackle, suited for lakes and rivers. A knowledge of these little arts in the family, will fill up the winter nights in Canada with useful work, and what of these things the family may make more than is necessary for their own use, can be exchanged for their value in something else. In fact, to succeed well, those parents who have been brought up in the country, should call to mind the days of old, the precept and examples so beautifully exemplified in Scotia's cottages, where the daily worship of God might have been heard in

every family. See that you do so likewise, and, with the blessing of God on your exertions, the difficulties which may bear hard on you for a little time, will gradually pass away like a cloud.

~~~~~

*At GLASGOW, 1st Dec. 1820, within the Counting-House of Wm. M'GAVIN, Esq. Convener—*

MET,

The COMMITTEE on EMIGRATION from the Counties of Lanark and Renfrew, to His Majesty's Settlements in Upper Canada.

PRESENT,

COL. MURE, of Caldwell.

KIRKMAN FINLAY, Esq. and

WILLIAM M'GAVIN, Esq.

The Minutes of last Meeting being read, and, in conformity to the same, the Return Lists of the following Societies, who say that they can furnish the means for their transport to Quebec, at the time to be hereafter appointed by the Committee, at this Meeting, were produced, *viz.*

|       | 3004  |

The Committee therefore Resolved—

1st, That it appears to this Meeting, from the returns now made, that the Societies suppose, that 3715 persons are now provided with the means of transporting themselves to Canada.

2d, That Government have never given any reason to believe, that the grants in Canada would be extended beyond 1800 individuals, the ensuing spring.

3d, That 400 individuals have a preferable claim, arising from the promise made to them this year, they being connected with those Societies who went in June last.

4th, That the total number who can go, of the remaining 3315 persons, cannot exceed 1400 individuals.

5th, That it appears to the Meeting, from the experience of last season, that very many persons, who at present expect to obtain all the money necessary for their transport, will not ultimately be able to accomplish their purpose; and that a calculation, founded on one-half of the present number, will not produce more than 1400 persons, for whom Government are disposed to provide for in America.

6th, That, proceeding on this estimate, the Committee have to request, that the Societies will exactly comply with the following conditions, hereby intimating to them, that those Societies who fail to do so, will be considered by the Committee as abandoning the intention to proceed next spring.

7th, That each Society will pay into the Royal Bank, on or before the 8th day of January next, in

|       |       |
|-------|-------|
| 33    | 711   |

| 23    | 3715  |

name of their respective Societies, a sum of money equal to—

|                                                      |
|------------------------------------------------------|
| For each person above 14 years of age, . . . £2 10 0 |
| For do. from 8 years of age to 14, . . . 1 10 0      |
| For do. from 2 to 8 years of age, . . . 1 0 0        |
| For infant children under 2 years, &c. . . 0 10 0    |

8th, That the Preses of each Society shall, on or before the 9th day of January next, lodge with Mr. Robert Lamond, Secretary to the Committee, the receipt of the Royal Bank for the money so paid, together with a list \* of the ages, and number of individuals, in the families for whom the money is so lodged.

9th, That the Committee will meet on the 10th day of January next †, for the purpose of examining those receipts and lists, and deciding on the number of persons in each Society who can go, and determining the time when the final payment must be made.

(Signed) Wm. M'GAVIN, Convener.

---

*At GLASGOW, this 7th day of February, 1821,  
within the Black Bull Inn—*

MET,

The COMMITTEE on EMIGRATION to His Majesty's Settlements in Upper Canada.

---

\* Those lists to be in the same form as the lists produced at this Meeting, with the addition of two money columns, and the sum lodged to be entered in the first, against the member's name.

† This Meeting of Committee was postponed to the 7th of February; and the Emigrants were allowed to the 1st of February, to lodge the first instalment.

## PRESENT,

**COL. MURE, of Caldwell, Preses.**

**KIRKMAN FINLAY, Esq.**

**W.M. M'GAVIN, Esq.**

**JOHN WYLIE, Esq. Clerk of the Lieutenancy for  
Renfrewshire, and**

**ROBERT BROWN, Esq.**

There was laid before the Meeting, an Abstract of the Return Lists from the Emigration Societies, in conformity with the Minutes of the Committee, held on the first day of December last, from which it appears—

That money has been lodged in the Royal Bank, including a few securities on hand, with the Secretary to the Committee, to the amount of 2541*l.* 9*s.* 6*d.*; which sum (along with some small balances that should have been paid before this day, and must now be lodged before the 14th instant) will make up the amount of the first instalments for 1488 persons, returned per Abstract.

At this Meeting, the Committee admitted on the list for the Government grant, the following Societies:—

The Milntown, Dumbartonshire, . . 11 Persons.

The Balfron, Stirlingshire, . . . . . 31 do.

The Deanston, do. . . . . 18 do.

The Alloa, Clackmannan, . . . . . 41 do.

The Hopetown Bathgate, Linlithgow, 21 do.

The Glasgow Trongate, . . . . . 111 do.

---

233 Persons.

These Societies sailed last, in the ship David.

It is therefore the opinion of the Committee, that the most eligible mode of sending out the Emigrants to Canada, will be by ships chartered, to sail at the following periods, *viz.*

First period,—from the 5th to the 10th April.

Second do. —from the 15th to the 20th do.

Third do. —from the 25th to the 30th do.

The Committee therefore agree, that the second instalment shall be, *viz.*

|                                   |    |    |   |
|-----------------------------------|----|----|---|
| For Adults, 14 years and upwards, | £1 | 15 | 0 |
| From 8 to 14 years, . . . . .     | 1  | 3  | 6 |
| From 2 to 8 do. . . . .           | 1  | 3  | 0 |
| Infants, under 2 years, . . . . . | 0  | 8  | 6 |

Which will make the sum lodged for Passage and Provisions to Quebec, as under, *viz.*

|                                   |    |    |   |
|-----------------------------------|----|----|---|
| For Adults, 14 years and upwards, | £4 | 5  | 0 |
| From 8 to 14 years, . . . . .     | 2  | 13 | 6 |
| From 2 to 8 do. . . . .           | 2  | 3  | 0 |
| Infants, under 2 years, . . . . . | 0  | 18 | 6 |

And that the Societies shall be returned what money may remain out of the above calculation, when the accounts are settled for the vessels and provisions; the sum to be divided amongst the heads of families, in proportion to their interest in the lodgement.

The Committee further agree, that those Societies who pay their second instalment, on or before the 1st day of March, shall, according to the date of payment, be entitled to go at the first period,—the 5th to the 10th of April.

Those Societies who pay from the 1st to the 10th of March, shall, in like manner, be entitled to go at the second period; and the Societies who pay on or before the 30th of March, shall be entitled to go at the third, or last period.

The Committee also appoint, that all applications, which may be made by Members of any Society, for the withdrawing of the first instalment, must be made, in writing, by the head of the family, stating the amount of the lodgement; and this must be done through the Preses of the Society of which he is a Member, on or before the 1st day of March next; and a receipt must be granted, by the head of the family, for the sum received.

The Committee must desire the Societies distinctly to understand, that, when the payments have not been made, the persons for whom passages may have been engaged, on the faith of the final deposite, will not only be cut off from all right to proceed, but will also be liable for every expense incurred on their account: the deposite money being answerable for such charge.

The Committee, therefore, adjourn this Meeting to Wednesday next, the 14th day of this month, in order to give time for the Preseses to consult with their respective Societies, and meet the Committee again, in the Black Bull Inn, at Ten o'Clock, A.M.

(Signed) W. M'GAVIN, Convener.

-----

*At GLASGOW, this 14th day of February, 1821,  
within the Black Bull Inn—*

At an adjourned Meeting of the COMMITTEE on  
EMIGRATION, in conformity with the Minutes of  
the 7th instant, to receive, through the Preseses of  
the Societies, the opinion of each Society, on the  
mode to be adopted, in Chartering and Provision-  
ing the Vessels:

PRESENT,

KIRKMAN FINLAY, Esq. Preses,  
WILLIAM M'GAVIN, Esq. and  
JOHN WYLIE, Esq.

The Minutes of last Meeting being read, and the  
roll called over, some of the Societies, by their Pre-  
seses, requested a few days longer to consult, as to  
the provisions being procured by said Societies: they  
all agreed as to the propriety of the Committee  
chartering the vessels. And the time being granted,  
the great majority agreed, that the Committee should,  
through their Secretary, along with the Preses of  
each Society, inspect the vessels and provisions to  
be provided for all those who should sail in the same  
ship; they also were satisfied, that the Committee  
would use every means in their power, for the ad-  
vantage and comfort of the Societies.

The Committee therefore Resolved,

1st, That those persons who are desirous of with-  
drawing their first instalment, should intimate the  
same in writing, to Mr. Robert Lamond, Secretary  
to the Committee, 43, Ingram-Street, on or before

Thursday the 22d instant, and appear on that day at his office, with the written authority of the Preses of the Society to which he belongs, when he will receive the amount he had lodged.

2d, The Committee, on re-considering the subject of chartering ships, have resolved not to engage room for any person who has not paid up the second instalment. Therefore, those Members of Societies who are uncertain as to their ultimate determination of going out, need not at present pay up this portion; and a subsequent time will be named, when the first instalment may be withdrawn.

3d, As it is necessary to transfer the money now lodged in the Royal Bank, from the separate accounts of the Societies, into one general account, to be kept in the name of William Mure, Esq. of Caldwell, and the other Gentlemen of the Committee, the Preseses and Treasurers of said Societies, will require forthwith to endorse the receipts in the hands of the Secretary accordingly.

(Signed) KIRKMAN FINLAY, Preses.

.....

*At GLASGOW, the 16th day of March, 1821,  
within the Counting-House of W.M. M'GAVIN,  
Esq. Convener—*

MET,

The COMMITTEE on EMIGRATION from the West of Scotland, to His Majesty's Settlements in Upper Canada.

PRESENT,

KIRKMAN FINLAY, Esq. Preses,

JOHN WYLIE, Esq. and

WILLIAM M'GAVIN, Esq.

The Minutes of last Meeting being read,

The Secretary laid before the Committee, the completed Lists of the Emigration Societies, who have paid their full instalments, to the 1st and 10th of this month, agreeably to the former Minutes.

He also laid before the Committee, the communications held with Messrs. Q. & J. Leitch, of Greenock, on the subject of chartering the vessels. The ship, Earl of Buckinghamshire, and the ship, George Canning; the former, burthen, per register, 599 $\frac{1}{2}$ ; the latter, 485 $\frac{1}{2}$  tons. The Earl of Buckinghamshire has been taken up, agreeably to the Articles now read to the Meeting. It was understood, that the ship, George Canning, should be taken up on the same terms by the Committee, as those vessels seemed to give the most satisfaction to the Preseses of the Emigration Societies, who had inspected the vessels under offer: they had therefore instructed the Secretary, by a deputation from the Societies, whose lists are now before the Meeting, to do the best he could for their interest and accommodation.

He had also informed the Committee, that samples of provisions had been shown to the Preseses and individuals of said Societies, who were satisfied with the quality offered; but as yet no contracts had been made, except an agreement for molasses, at 25s. 6d. per cwt. nett money. The whole of the Emigrants

from the County of Renfrew, have instructed the Secretary to provide the provisions for their number, on the best possible terms; likewise, many of the Societies, whose lists are now before the Meeting, without any further interference, being fully satisfied that every attention will be paid to their interest.

The Committee approve of what has been done by their Secretary, and hereby order the remaining Emigration Societies to complete their lists, either by lodging their second instalments with the Secretary, or finally withdrawing the first, by a written order, agreeably to the resolutions of the last Meeting; and this must be done on Thursday the 22d instant, or on the following Thursday the 29th instant; and that the Secretary will either immediately pay the money, or appoint a day when the Preseses may call to receive the same. And that no transfers in the Societies, or new applications can be received, until the whole lists be disposed of. It will, therefore, be unnecessary for any new applicant to call on the Members of Committee, or their Secretary, before the 20th of April. The business, in future, must be conducted by the Preses, or the appointed deputy of each Society.

The Committee now resolve,

1st, That the ship, George Canning, be taken up as the first vessel, on the same terms as the Earl of Buckinghamshire; and that she shall be ready to take on board the provisions by the 1st of April, and

clear for sea by the 10th, to carry out the following Societies, *viz.*

Glasgow Canadian,

Bridgton do.

Bridgeton Transatlantic,

Abercrombie,

Strathaven and Kilbride,

Glasgow Loyal Agricultural, &c. &c.

As far as they will complete the number of passengers for the vessel.

2d, That the ship, Earl of Buckinghamshire, shall be ready to take on board the provisions, on or before the 10th of April, and clear for sea by the 20th.

3d, That the letter of William Thomson, Esq. to Robert Dalglish, Esq. and the Gentlemen of the Committee on Emigration, so far as it relates to the Emigrants who left the County of Lanark on Government grant last year, be published, and that the luggage of the Emigrants be restricted to their body and bed-clothes, pots and pans, a small assortment of crockery-ware, and a few articles necessary for their own immediate use; and that no furniture be carried out, such as chests of drawers, clock-cases, bed-steads, chairs, tables, or washing-tubs, without the Emigrants are in sufficient circumstances to pay for the transport of the same from Quebec to the place of settlement; but the books which they may have, as their private library, may be allowed; and the whole must be closely packed in small and sufficient chests, boxes, or bagging: the latter will be found to be the most useful.

4th, That the parents of all the children who belong to the different families of Emigrants, who have not been inoculated for the small-pox, must cause the same to be immediately done, as the children will be inspected by the surgeons, before they can be admitted on board. Such parents who may have any prejudice against vaccination, must remove their objections, or their children cannot proceed. The Emigrants would find it much for their comfort, if their hair was cut quite short, particularly the children's.

5th, That no dogs, on any pretence whatsoever, shall be allowed to be taken on board.

6th, That no smoking, or lighted candles, can at any time be allowed betwixt decks.

7th, That the vessels to be employed, and at present under offer for the service, must be inspected by experienced seamen or carpenters. The Committee therefore instruct their Secretary to procure proper judges in this matter, that they may deliver in their reports as to the fitness and sufficiency of the ships for this service.

8th, That the Secretary shall give notice to the Preseses of each Society, by circular letters, ten days before the sailing of each vessel; at same time, he will appoint the day when they must be in Greenock: and that he will communicate to the Preseses, the estimate of the Clyde Shipping Company, for carrying the Emigrants and their luggage down the river.

9th, The Committee now return their warmest thanks to the Committee of the British and Foreign

Bible Society of London, for their ready attention to their Secretary's petition, for a grant of Bibles and Testaments suited to the wants of the Emigrants under their charge; and also, return their thanks to the Rev. Dr. Wardlaw, for his communications on this subject; and hereby appoint William M'Gavin, Esq. their Convener, to take the earliest opportunity of transmitting the same.

The Committee now instruct their Secretary to proceed upon the same principles as he has been going on, and to despatch the business as quickly as possible.

*N.B.* The Societies will please hand in their lists, (applications for Bibles,) that they may be laid before the Committee.

(Signed) KIRKMAN FINLAY, Preses.

-----  
GREENOCK, 30th January, 1821.

THE Owners of the ship, Earl of Buckinghamshire, will engage to carry out Emigrants in said ship, to Quebec, this spring, on the following terms, *viz.*

If the number is limited to

250 full passengers, at 27s. 6d. per ton register \*.

300 do. do. at 30s. do. do.

350 do. do. at 32s. 5d. do. do.

If extended to

400 full passengers, at 35s. per ton register.

The ship, fore and aft, to be laid betwixt decks; and sleeping-births, cooking-hearths, fuel, water-

---

\* That is, 27s. 6d. multiplied by the total of the vessel's tonnage.

casks, and water, for 63 days, to be provided in the following proportions, *viz.*

To persons 15 years and upwards, 6 pts. p. day each.

|     |                 |                 |   |   |     |     |

| Do. | 5 to 10 | do. | $\frac{1}{2}$ , | . | 3 | do. | do. |
|-----|---------|-----|-----------------|---|---|-----|-----|

|       |   |     |                 |   |   |     |     |
|-------|---|-----|-----------------|---|---|-----|-----|
| Under | 5 | do. | $\frac{1}{3}$ , | . | 2 | do. | do. |
|-------|---|-----|-----------------|---|---|-----|-----|

At date of agreement, 20s. of deposite-money to be paid for each passenger. The remainder of the passage-money to be paid previous to the ship's sailing, which is calculated to take place betwixt the 20th of April and the 1st of May. This ship will not be entered at the Custom-house for goods outwards; consequently, passengers will have abundance of room for luggage, &c. &c. The passengers to appoint their own agent, to get the store of provisions examined and passed by the Custom-house officers.

Apply to Q. & J. LEITCH.

Mr. ROBERT LAMOND,  
43, Ingram-Street, Glasgow.

~~~~~  
GREENOCK, 21st Feb. 1821.

Mr. ROBERT LAMOND,
SIR,

WE hereby offer to charter to you, to carry Emigrants to Quebec, the ship Earl of Buckinghamshire, of 600 tons, and the ship George Canning, of 486 tons, now in this harbour, to sail any time in course of the month of April, at the option of the Committee who have the management of the

business, on the following conditions, *viz.*—30s. for each register ton; we finding bed-births, water-casks, cooking-hearths, and fuel. Provisions of all descriptions to be furnished by the passengers themselves, or those acting for them.

As the Government tonnage-duty will not be paid on the ships, no goods can be put on board, on freight; the whole accommodation will therefore be at the disposal of the passengers, for baggage and provisions, with the exception of what is necessary for the officers and crews of the vessels. One-half of the freight to be paid down, on this engagement being formally gone into; the other half before the ships sail from Clyde.

If the ships are taken up for this service, we would prefer having the George Canning first despatched.

We are, respectfully,
SIR,

Your most obedient Servants,
Q. & J. LEITCH.

GREENOCK, 6th April, 1821.

Mr. ROBERT LAMOND,
SIR,

AGREEABLY to your request, we have inspected the ships, George Canning, Earl of Buckinghamshire, and Commerce, and find them strong and staunch, and in every respect well fitted for the conveyance of Emigrants to Canada. They are likewise commanded by sober, expert seamen, who are

well acquainted with the navigation of the Gulf of St. Lawrence.—We are,

SIR,

Your most obedient Servants,

JAMES OUGHTERSON.

ROBERT LUSK.

CHARTER FOR THE SHIPS.

43, INGRAM-STREET,
GLASGOW, March 6th, 1821.

Messrs. Q. & J. LEITCH,

GENTLEMEN,

IN the name and on the behalf of the Committee on Emigration, and with the concurrence of the Presidents of certain Societies, intended passengers for Quebec, per your ship, the Earl of Buckinghamshire,

We hereby accept of your offer of the said ship, at 30s. per ton register, as she stands on the books for keeping such records. And you hereby engage to land these Emigrants, (excepting casualties,) free of any other charge whatever, on the Quay of the Port of Quebec. And that no debts shall be contracted on board of the ship, betwixt the Captain and the Emigrants. In all cases where rum or other necessaries are provided by the Captain, the same must be paid for on delivery.

The preceding and following are the conditions of this mutual engagement.

1st, That the compliment of persons to be shipped on board, must be equal to an adult passenger for

every ton and a half of the ship's register, as entered on the books for recording the same.

2d, That all persons to be put on board, under the age of 14 years, shall be rated in bed-births, as three to one full passenger.

3d, That water shall be put on board, in good and well-seasoned casks, in sufficient quantity to the number of persons, as by law established, for a voyage to Quebec.

4th, That the water shall be served out daily, in small casks for measuring the quantity, to be provided by you, as is customary in transports hired for carrying passengers. This service to be agreeably to the regulations of the Emigrants in the formation of their messes, to be hereafter arranged.

5th, That the quantity of fuel necessary for the voyage, shall be put on board, agreeably to the stated regulations.

6th, That sufficient furnaces for cooking victuals for the number of passengers on board, shall be erected on deck, with pots, and a cast-iron plate attached to the furnace, for baking oat-meal bread on.

7th, That a small temporary cabin, containing about eight births, shall be fitted up, for the use of married females, who may have occasion for retirement during accouchement on the passage. And, if agreed to by the Societies, that all adult females (unmarried) shall have a part of the vessel assigned to them, secluded during the hours necessary for rest, by a temporary partition, either of deal boards or canvass.

8th, That such passengers who may incline to sleep in hammocks, shall have liberty to hang the same in the hold, the passengers providing the hammocks themselves.

9th, That the surgeon shall be allowed a free cabin passage, with the use of the ship's medicine chest, when required. He or the Emigrants to provide his provisions, as may be afterwards agreed upon.

10th, That the Captain shall establish regulations for good government, particularly with regard to cleanliness and moral behaviour, and that they shall be strictly enforced, in unison with the Committee to be appointed for said purpose; the Captain reserving his authority in all matters, as commander of the vessel. These regulations to be posted up in proper places, for the information of all concerned.

11th, That, on the Sabbath-day, public worship shall be held on deck, when it does not interfere with the management of the vessel, and when the weather will permit; at other times, family worship may be held on the same principles.

12th, That the regulated quantity of provisions for the number of passengers to be carried out, shall be laid down, by the Committee on Emigration, on the Quay, beside the vessel, and delivered over to the Captain, or to you, to be put on board at the ship's expense.

13th, That the Custom-house business, in taking out a provision bill, passing, and taking on board passengers' baggage, entering and clearing the Emi-

grants, shall be done at the ship's expense, without any charge to the Committee or Emigrants whatever.

14th, That a letter shall be granted by you to the Committee of Emigrants, for the Buckinghamshire, before she sails, testifying that the said Emigrants are free from any claim whatever by the vessel or Captain, on their sailing from the port of Greenock. This is to be done, on this engagement being formally entered into, and the charter-money paid, before the vessel sails.

15th, That the Buckinghamshire must be ready to take on board the provisions by the latter end of this month, or, at furthest, the 1st of April, and clear for sea before the 10th of April; and that the bed-births must be all ready for the passengers to sleep on board the first day of their arrival in Greenock.

16th, That, on arrival at Quebec, all articles of provisions belonging to the Societies, and remaining on hand, after it is no longer necessary to subsist the Emigrants on board the ship, shall be delivered over by the master, to a Committee of their number, to be appointed for the purpose.

ROBERT LAMOND, Secretary.

Messrs. Q. & J. LEITCH, Greenock.

and conditions, above mentioned \*.

We are, SIR, &c.

(Signed) Q. & J. LEITCH.

~~~~~  
UPPER CANADA, *New Lanark*, 11th Dec. 1820.

To KIRKMAN FINLAY, Esq. M.P.

HONOURABLE SIR,

ACCORDING to promise, I take this opportunity
of writing for the information of your Honour, in re-
lation to the Societies who emigrated from Scotland.

Sir, the lateness of the season has rendered our
location unusually difficult, as well as hazardous for
the health of the women and children. Your Honour
anticipated this, when I last saw you in London;
however, Captain Marshall, to whom our location
is entrusted, has spared no trouble, in having the
people into their houses, on their different lots, be-
fore the severity of the season would be felt by them.
This he has now, I may say, effected. He has been
particularly careful to see, that nothing, in his power,
be wanting, in making one and all of them comfort-
able. Blankets, of a good quality, have been served
out, as well as other necessary articles, such as im-
plements of husbandry. The people appear to be
in good spirits, and I hope they will all do well: if
they do not, it will be their own fault.

The land in this township is in general hilly, and
particularly well watered. As for the soil, I can say

* The other three vessels were chartered on the same principles, except the David, which was charged 2s. 6d. per ton higher.

little about it as yet. The weather is much colder here than it is at home, at this time of the year. The snow has been on the ground since the 1st of November; it is now about six inches deep. The frost has been very severe these few nights past; and the people who are acquainted with the country, anticipate a long winter. Our people, in general, remain healthy. I would advise all who intend coming out next season, to come out as soon as possible in the spring.

I expect to be able to give your Honour more particular information, in the course of a few months.

HONOURED SIR,

I remain your humble Servant,

(Signed) JOHN M'LACHLAN.

LANARK, 23d Dec. 1820.

DEAR SIR,

As your correspondent is rather meagre in his account of the Settlement, I take this opportunity of adding a little to it. The Settlement consists of three townships, each ten miles square, situated immediately behind the Perth Settlement, named Dalhousie, Lanark, and Ramsay. The village of Lanark is 14 miles from Perth; a Government store and dwelling-house have been built there. There are already three respectable merchants' stores, and a dozen houses in the village. We are 50 miles north-west of Brockville, on the St. Lawrence, and that town is about 150 miles higher up than Montreal, and 65 from Kingston.

Mon-

As I learn from these people, you have taken a great interest in their welfare, and are a strong advocate for emigration to this part of the world, permit me to suggest the necessity of sending out people of this description earlier in the season: they ought to be here in July. Also, that when they do arrive, they ought not to be under the necessity of expending any part of their instalment-money in clothing: they require the whole of it for their supply of provisions, until they raise something themselves. Many of them have also arrived in debt for their passage, and provisions on the voyage. Government certainly expected them to arrive upon their lands, free of any debt of this kind: the money is quite little enough, without deductions of this nature: it may ruin the whole scheme. I shall probably write you again.—I am,

Yours, faithfully,

(Signed) W. MARSHALL,
Superintendent Lanark Settlement.

GLASGOW, 27th Feb. 1821.

ROBERT DALGLISH, Esq.

SIR,

AGREEABLY to your request, when I left this in August last, I made very particular inquiry, while in Canada, regarding the settlers who sailed last year from the Clyde, under the direction of the Committee in Glasgow.

I had several interviews on the subject, with —, Quebec, to whom the settlers are certainly much in-

debted for the anxiety he showed, to give every information that might be at all useful to them; which is the more valuable, as they fall all under the charge of his department, and its correctness may be relied upon.

The settlers alluded to, are located in the township of Lanark, Upper Canada, the situation of which may be seen from the map. The soil and climate are both good, and being removed from the lake, will not be troubled with ague, to which those on the immediate borders of it are liable. Government has reserved lots, of ten acres each, round the village, which are to be granted *to mechanics only*, to the cultivation of which they can turn their attention, when not fully occupied with their respective employments; the remainder of their grant, say 90 acres, they receive in another part of the township.

The Government allowance of 10*l.* was not payable to the heads of families only, but to every man, woman, and child.

Government found the means of transporting them to the place of settlement, but had no intention of furnishing them with provisions, till their arrival there. Many of them, however, arrived indebted to the Captains of the ships, to discharge which, they were obliged to dispose of what little they had, and were consequently without any means of subsisting themselves. In order to get over this difficulty, — (who is very anxious to encourage them, and promote their interest by every means in his power,) although it was contrary to the intentions of the

Government at home, ordered rations to be issued to them, from the Government stores, upon the express understanding, that they were to be paid for, from the advances to be made to them.

Complaints have been made, in the most severe terms, of the *very great trouble and expense* thrown upon Government; and also, of the serious injury the settlers have done themselves, and those who may follow them, by bringing out large quantities of old and useless luggage. The Government at home, estimated the expense of conveying them to the place of settlement, at 2*l.* per head; whereas, in consequence of this, it has actually cost about 8*l.*, as they had been obliged to transport for them old and worm-eaten boxes and chests, and these mostly empty, together with old wash-tubs, and other articles of furniture, which might be purchased for half the expense of transportation. Had Government taken these articles from the settlers, on their arrival at Quebec, paid double their value for them, and burned them, they would have been considerable gainers. It is therefore stated, that if the agents at home permit the settlers to pack such quantities of lumber on board the ships, it is the determination of —, not to allow the expense of transporting it up the country to fall upon Government; and if the people are unable themselves to do it, they must abandon it at Quebec, or remain and lose their locations. It will, therefore, be much for the interest of the settlers, that some person should be appointed at the different places of embarkation, to see that they are not permitted to put such articles on board.

The settlers have also suffered great loss, from foolishly taking with them different descriptions of manufactured goods, in the full hope of deriving a profit from the sale of them. The contrary has almost universally been the case; in addition to which, they lose much time, which might be profitably employed, by being obliged to stop in Quebec or Montreal, till they have disposed of them. They ought, on no account whatever, to invest their money in this manner, but take what they have, either specie, a draft upon some respectable house there, or pay it into any of the banks, taking a receipt for it; only, in the latter case, they will require to have at least two or three copies of the receipt along with them, and they will find no difficulty in disposing of them, the same as bills of exchange.

(Signed) WILLIAM THOMSON.

GLASGOW, 21st March, 1821.

Mr. ROBERT LAMOND,
SIR,

THE Clyde Shipping Company will engage to take down Emigrants and their families (going to America) to Greenock, at the rate of One Shilling each, for men, women, and children above twelve years of age; from four to twelve, at half-price; and under four, *free*; at same time, will take the luggage at Sixpence barrel bulk.—I am,

SIR,

Your most obedient Servant,
JAMES MILLER, Manager.

Particulars of the Provisions shipped on board of the Earl of Buckinghamshire, on account of the Emigration Societies, and in conformity to the Government regulation for the year 1821.

Salt Provisions.

24 tierces Beef, each tierce 300 lb.	} 8,700 lb. Eng.
½ barrel do. do. 100 —	
7 barrels Pork, each bar. 200 —	

Biscuit.

192 bags, . . . 192 cwt.	21,504	do.
----------------------------------	--------	-----

Oat-Meal.

319 barrels, . . . 482 $\frac{4}{10}$ bolls, . . .	67,483	do.
--	--------	-----

Barley and Pease.

	Cwt.	Qr.	Lb.	} 2,364	do.
6 barrels Barley, . . .	11	0	14		
6 do. Pease, . . .	9	3	26		

Butter.

23 casks,	13	1	21	1,505	do.
---------------------	----	---	----	-------	-----

Molasses.

3 casks,	27	1	4	3,056	do.
--------------------	----	---	---	-------	-----

As Potatoes are not allowed to be substituted in part of any of the provisions, the Societies or Emigrants may take on board, for their own use, what quantity they please; and the Societies for the Buckinghamshire, agreed to ship 61 bolls 12 pecks, which was paid for out of the money returned to them.

On the arrival of the ship at Quebec, after a passage of 48 days and 10 hours, the remaining part of

the provisions was delivered over, for the Societies' account, to the Lady Sherbrook Steam-Boat, *viz.*

171 barrels Oat-Meal, about 276½ bolls.

92 bags Biscuit.

1 puncheon Molasses.

4 barrels Barley or Pease.

4 tierces Beef.

2 firkins Butter.

The provisions for the other vessels, were on the same ratio; but the Societies by those ships, would not consent to ship any Potatoes, as they preferred taking the money to divide amongst them.

Rations per Week, for every Passenger 8 Years and upwards, calculated for a Passage of 84 Days or 12 Weeks.

1½ lb. Beef or Pork.	½ lb. Barley or Pease.
3½ — Biscuit.	½ — Butter.
11 — Oat-Meal.	½ — Molasses.

Children from 2 to 8 years, two-thirds of the above quantity;—under 2 years, are left to the discretion of their parents, who must lay in Porter, Tea, Coffee, Sugar, &c. for the mothers and infant children.

Water per Day, English measure, calculated for a Passage of 9 Weeks, or 63 Days.*

To persons 14 years and upwards, 6 pints each.

To do. 8 to 14 years, . . . 4 do.

To do. 2 to 8 do. . . . 3 do.

To do. under 2 do. . . . 2 do.

* Great care ought to be taken of the water, that none of it be wasted.

GREENOCK, 13th April, 1821.

Mr. ROBERT LAMOND,
Secretary to the Emigration Committee,

SIR,

OUR ship, the George Canning, being now on the eve of sailing for Quebec, with the full compliment of passengers agreed to be taken on board—in compliance with the 14th article of our agreement, we do hereby testify, that as you have paid us the full amount of passage-money, we have no claim whatever against the said Emigrants, who are to be landed (barring accidents) at Quebec, without any additional charge being made by us. It is, however, understood, that should any of them have occasion to purchase from the Master, any supplies from the stores belonging to the vessel, he is to have it in his power to demand payment of the same, if he thinks proper. Sincerely wishing a good passage to the ship, and a safe landing to her numerous passengers, we remain,

SIR,

Your most obedient Servants,

Q. & J. LEITCH.

The letters given from the owners of the other vessels, were to the same tenor as the above.

.....

GOUROCK BAY, 14th April, 1821.

To COL. MURE, of Caldwell,
 KIRKMAN FINLAY, Esq. of Auchenwillan,
 ROBERT BROWN, Esq. Hamilton,
 JOHN WYLIE, Esq. Clerk to the Lieutenancy of
 the County of Renfrew, and
 WM. M'GAVIN, Esq. Glasgow,

The Committee on Emigration from the West of Scotland,

GENTLEMEN,

WE, the heads of families on board the George Canning, feel it to be a duty incumbent on us to return our most grateful acknowledgements to the Committee who managed the business for us in Glasgow.

We are well aware of the trouble that you have been at on our account, and we hope that Providence will reward you for your conduct.

Your Secretary, Mr. Robert Lamond, has discharged his duty to our satisfaction, in every particular; and we hereby return to him our warmest thanks, for his attention to our interest.

We also take this opportunity of expressing our thankfulness to Messrs. Leitch, the owners of the vessel, and also to Captain Potter, for their humane and kind attention to us and to our families, since we arrived at Greenock.

Signed, in name of the Societies,

William M'Ewan,	James Borrowman,
John M'Pherson,	Walter Black,
Duncan M'Innes,	John Kilpatrick,
James Braidwood,	Robt. M'Laren, and
James Nicoll, Jun.	James Aitkenhead,
James Paul,	Preseses.

[*From the Greenock Advertiser, May 2d, 1821.*]

On Sunday morning, the Earl of Buckinghamshire, Captain Johnston, sailed from hence, for Quebec, with Settlers, drawn from the various Associations of this and the adjacent County. The total number of passengers, old and young, by this ship, is 607, of which about 320 are from this County, and the rest from Lanarkshire. Although, in the provisioning of the vessel, nothing was omitted which could be conducive to the comfort of the voyagers, a considerable sum, as in the case of the George Canning, remained over, of the money previously lodged, after liquidating all charges, which was, of course, proportionally divided amongst the passengers. From the accommodations of the Earl of Buckinghamshire, which are as excellent of their kind as they are extensive, and the great height of the ship between decks, it promises to afford to the Emigrants, at least as satisfactory a conveyance to their destination, as any vessel hitherto fitted out from the Clyde, for a like purpose, notwithstanding the vast number on board. The Emigrants, generally, have a most respectable appearance; and amongst them, are various artificers, such as smiths, joiners, &c. whose labours, in their respective occupations, must prove peculiarly valuable to the other Settlers, in their agricultural operations, to which the whole purpose to devote themselves, under the encouragements held out by Government, whose bounty, we are well persuaded, has, in few instances, been more judiciously bestowed.

*On board the Ship David, of London, at Greenock,
for Quebec, May 19th, 1821.*

Mr. ROBERT LAMOND,

Secretary to the Committee on Emigration,

WE, the undersigned, Members of the Committee of Management on board of said ship, in the name and on behalf of the several Societies we represent, beg to return our most sincere and humble thanks to Government, for the grants and other advantages graciously conferred upon the Members of our Societies going to Canada; and we humbly request, that you will be so kind as to communicate the same to the Secretary of State for the Colonial Department.

We also beg as a favour, that you will be pleased, in our name, to express our gratitude to the Gentlemen forming the Committee of Emigration in Glasgow, for their unremitting exertions in forwarding the general views of the Societies. And having examined and compared all your intromissions on our account, we find every article correct, and regular discharges produced for all the sundries composing our provisions on the passage, and chartering the ship. We feel it, therefore, our duty to return you our warmest gratitude for your indefatigable services in the station you are placed; and amongst all your kind offices to our Societies, we especially thank you for applying to the British and Foreign Bible Society, for granting to so many of us that inestimable treasure, the Word of God, of which we received so many copies, the perusal of which, we

reenock,
hope, by the blessing of God, will be attended with
the happiest effects.

We have also to express our warmest thanks to
the Owners and Captain of the ship David, for their
unwearied attention to our comfort.

(Signed)

Samuel Stevenson.

John Blair.

David Young.

George Bremner.

Archibald Paterson.

The ship David left the East Quay, on Saturday, about one o'clock, p.m. with 364 passengers. She was towed out by a steam-boat, and immediately proceeded to sea with a fair wind, under very favourable auspices. The David was left by the owner and friends of the passengers, about two miles below the Cloch Light-house, at six o'clock, p.m. with three hearty cheers from the passengers and crew, which was immediately returned from the boat, and repeated from the ship: a general smile of satisfaction closed this parting scene. The money lodged for the outfit of the vessel, for provisions and freight of the Societies, was 1198*l.* 11*s.* 8*d.*; and, after paying all charges, the Emigrants have received, to be divided amongst them, agreeably to their respective interests, 93*l.* 11*s.* 8*d.*, which will be of more use to them in Canada, than if it had been spent here. The passengers by this vessel, are chiefly country people, from the Counties of Lanark, Dumbarton, Stirling, Clackmannan, and Linlithgow.

The ship George Canning, Captain Potter, sailed from Greenock, April 14th, carrying out 490 individuals, men, women, and children—arrived at Quebec, June 1st, all well, except the death of four infant children, and a boy, belonging to one of the passengers, who fell overboard; every exertion was made to save the boy, but without effect. There were three children born on the voyage.

The ship Earl of Buckinghamshire, Captain Johnston, sailed from Greenock, April 29th, with 607 individuals—arrived at Quebec, June 15th, all well. There were seven births on the passage, one of the children died, being a premature birth. No other deaths.

The ship Commerce, Captain Coverdale, sailed from Greenock, May 11th, with 422 individuals—arrived at Quebec, all well, on the 20th June. Two children and one woman died on the passage. No births.

The ship David, Captain Gammie, sailed from Greenock, May 19th, carrying out 364 individuals—arrived at Quebec, June 25th, all well, except the death of three children. There were four born on the passage.

The sum looked for the charters of the ships, and provisions for 1883 individuals, was £5972*10s. 5d.*; and, out of this sum, £472*10s. 1d.* was returned to the passengers, to be divided amongst them, according to their interest in the shipment.

*At GLASGOW, 1st June, 1821, and within the
Counting-House of WM. M'GAVIN, Esq.
Convener—*

MET,

The COMMITTEE on EMIGRATION from Scotland, to
His Majesty's Settlements in Upper Canada.

PRESENT,

KIRKMAN FINLAY, Esq. Preses,
COLONEL MURE, of Caldwell, and
WILLIAM M'GAVIN, Esq.

Mr. Robert Lamond reported to the Committee,
that the four chartered vessels had sailed, *viz.*

The George Canning,
The Earl of Buckinghamshire,
The Commerce, and
The David,

Carrying out, in whole, 1883 souls. A settlement
having been made with each Society, of their re-
spective accounts, and a balance of 487*l.* 15*s.* 11*d.*
having been returned to the parties, after paying for
their passage and provisions.

The Committee, in closing their labours, cannot
omit noticing the remarkable and highly pleasing
alteration which has taken place in the value of
labour and employment for working people, since
this measure was first undertaken; it now appearing
to the Committee, that many of the persons who
have lately embarked, have been induced to do so,
from other considerations, rather than the want of
employment at home.

Notwithstanding this state of things, such is the
desire to emigrate, that it consists with the Commit-

tee's knowledge, that double the number of persons would have embarked, if the means of transportation had been afforded.

The Committee think it their duty to add, that it appears to them, the state of labour and wages, which first induced the Government to afford the liberal assistance which has been given to Emigrants from this district, no longer continues to exist here; and although the Committee are ready, on any future occasion, to lend their best services for any similar transaction, yet they cannot withhold the opinion they entertain, that the reasons which first led the Government to adopt the measure, no longer exists.

The Committee desire to record their sense of the conduct and management of their Secretary, Mr. Robert Lamond, in the discharge of a duty of a very laborious nature, requiring the greatest patience in the arrangement, and accuracy in the accounts; and they feel convinced, that this difficult duty could not possibly have been performed in a more satisfactory manner, at once advantageous to the Emigrants, and creditable to Mr. Lamond.

Ordered, that a copy of this Minute, and of the Charters, and other papers, be transmitted to Henry Goulburn, Esq. to be laid before the Right Honourable Earl Bathurst.

Note.—There may occur some cases, where portions of families may have already gone out, to whose remaining relations here, it might be desirable that the former advantages might be extended next spring.

(Signed) KIRKMAN FINLAY, Preses.

REFERENCES TO THE PLATES.

1. A Hut or Wigwam—is generally the first habitation in the woods, and the most simple kind of building. It may be constructed either of a conical or oblong form. The timbers should be spruce poles, or any similar kind; six to eight inches diameter are sufficient, and are easily handled. Take, for instance, four poles, of about fifteen feet in length: place them from eight to ten feet asunder, and sink the lower end of each pole about two feet into the ground: with four pieces of timber, form a square sufficient to let out the smoke: incline the poles to the small square at the top; and, if nails are not to be obtained, they may be bound together with *wythe rods*, birch-bark, or by green birch-wood, strung out as ropes; or thick twine may be used for the purpose: the sides can be filled up on the easiest principle, with the branches of trees or spars. The fire to be kindled in the centre of the floor, on fire-dogs, of cast or wrought iron, to admit of air to allow it to burn.

2. A Shade or Shantie—built of rough logs, or boards, and roofed with hollow bas-wood, resembling a tile roof. The fire may be kindled on the floor, or, if it is wished, on the side of the house: the chimney must be built of stone, brick, or such incombustible materials as can be found at hand. Small Canadian stoves, of cast-iron, would be very useful, if the Emigrants could afford to take them along with them. A pit may be made in the floor, for preserving potatoes, &c. from the frost, during winter.

3. A Cottage—built of squared logs, laid horizontally, cut into proper lengths, so as to fit betwixt the doors and windows, which may be either notched at the corners, or tenoned and mortised into one another alternately, or fastened by hard-wood pins; and roofed with shingles, resembling slates, or by boards laid over each other. The ground to be excavated two or three feet, to serve as a cellar, the entrance to which may be made by a trap-door in the inside of the house; and the hearths and chimneys must be made of stone or brick.

4. Plan and Elevation of a Log-Cottage, or Frame-House.—The upright corner-posts ought to be strong, and built up

between the corner-posts, with squared logs, to the level of the joists, and filled up with frame-work, or with split wood, with the bark on it, which may be plastered over, when the means will afford. The roof may either be framed, or of common spars, to project about two feet over the walls.

5. A Frame-Cottage, similar to No. 4.—The ends of the ceiling-joists must project over the walls. The windows should all be made to open in the middle, and fold back.

6. A Log or Frame-Cottage—lined externally with boards: the window-dressings may afterwards be put on, and the portico formed of two trees in their natural state.

7. A Frame-Cottage—lined with boards, horizontally and perpendicular, or which may be built of dressed logs. If the pavilion roof were raised higher than is shown in the plate, good lofts could be made, to enter by a trap-door from the lobby, which would be found to be very useful.

8. A Fancy Frame-Cottage—with the roof projecting over the walls, from four to five feet, supported on pillars, made of the trunks of trees, so that a shaded walk can be formed around the house, the floor of which should be three feet off the ground; underneath the shaded walk will be an excellent retreat for the poultry; a rustic railing is also shown.

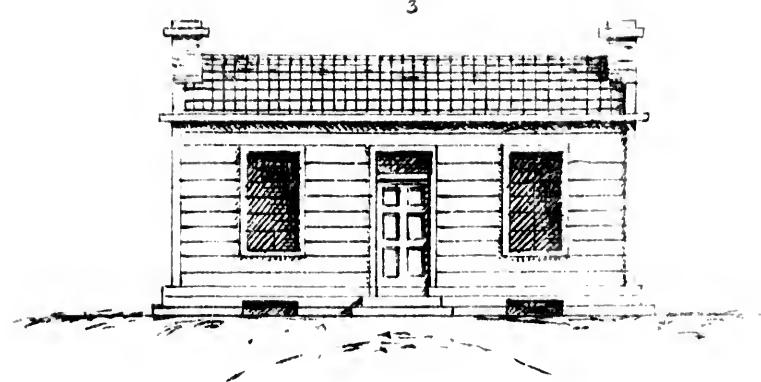

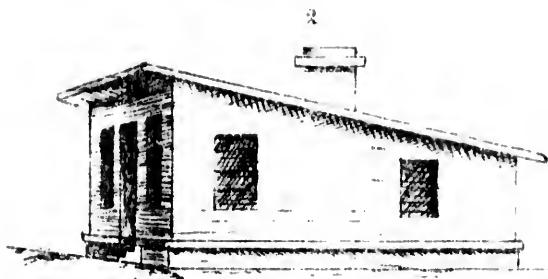

9. A Plan and Elevation of a Farm Establishment—consisting of dwelling-house, barn, loft, stables, and offices. In the plan of the dwelling-house, a stove or chimney is represented in the centre, to serve the kitchen and other apartments: this plan is recommended, as being best adapted for the preservation of the house from fire. The barn and offices are shown distinctly back from the house, about forty feet: a fence might be useful, to run across from the barn to the offices, and a garden might be made around the house. Divide the barn and offices into three parts, and make partitions of planks, with small doors: the middle parts will serve for threshing-floors, or as a shelter for carts or waggons. The doors of both must be lofty, to admit carts loaded with hay, &c. The upper flat may serve as a loft, and the lower as a stable: in the former, not only the corn may be kept, but also the hay, as exposure out of doors is said to deteriorate the quality: in the latter, the cattle may be stalled; but, instead of using racks and mangers, their necks may be confined between two pieces of wood, contrived for the purpose: this will save halters, and admit more cattle, than if racks and mangers were used. The warmer the stables are kept, the better; and a small window, about eighteen inches square, should be made

in each, for the purpose of throwing out the dung. Proper drains must also be made, to carry off the moisture, or the wooden floor will soon rot; indeed, superior attention must be given, or the cattle will get diseased by confinement.

On the outside of the zigzag fence, which is shown as formed of logs, plant a live hedge as soon as possible; the woods, no doubt, abound in a variety of shrubs proper for that purpose: a gooseberry hedge, or, if it is preferred, a beach or thorn one, may be used: perhaps apple-trees might be planted in the hedge-rows, as well as in the orchards. The children might be well employed, in collecting young shoots or plants in the woods, and planting them in the hedge-lines. Were a part of the ground and garden allotted to the boys, it would give them an interest, which would create emulation, and teach them useful practical knowledge; the cultivation of which might be attended to, when the usual hours for work are over *. As soon as possible, the roots should be extracted from the ground surrounding the house, and a garden laid out, and cultivated with the spade. It is presumed, that a dry situation, near good water, has been selected, as a site for the house and offices. Such trees as may serve as an ornament and shelter, ought to be preserved, in laying out the fields. All the maple trees in the lines of the divisions, ought to be preserved; and, occasionally, when a few good maples occur in the corners, or even in the centre of fields, they ought to be allowed to stand, as a shelter both for the cattle and the fields.

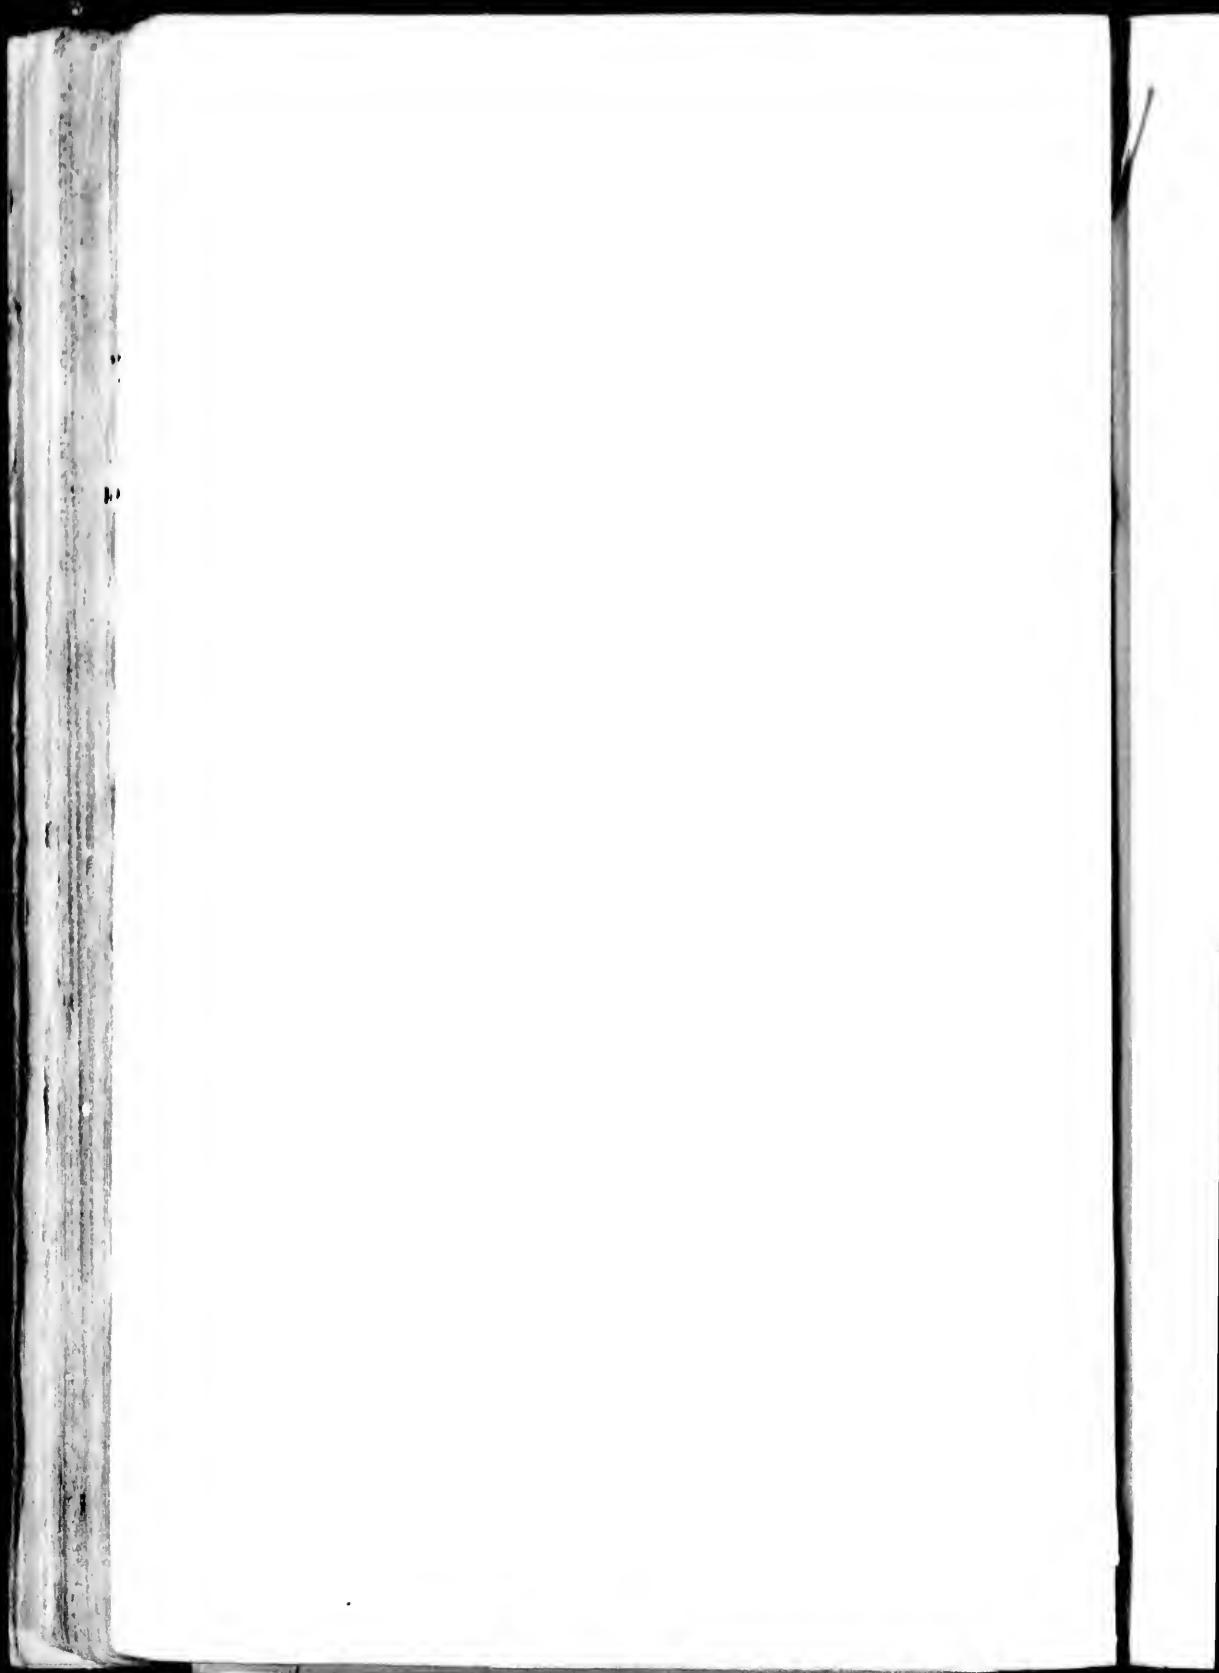

In the designs given, the Emigrant will be able to select the one most adapted to his peculiar circumstances; and, while no person ought to neglect the more important matters of clearing and stocking his farm, a good taste displayed by a few leading families, whose exertions and increasing means may place them in a situation of extending their accommodations and conveniences, will gradually induce others to follow their example.

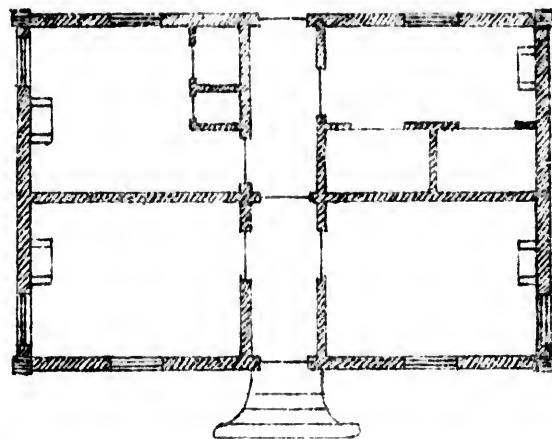

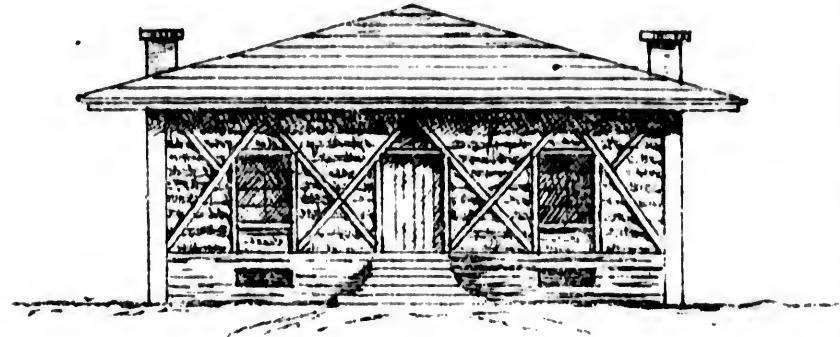

* In former times, it was customary for the farmers in Scotland, to give their daughters a piece of land, for cultivating flax; and the female servants were usually hired, on the principle of being allowed to sow a fourth, a half, or a peck of flax-seed, and they seldom left the family until married. Before marriage, it would have been a disgrace to a young woman, if she had not had a feather-bed, and plenty of bed-linen, and a web for shirts for her husband.

EXTRACTS
OF
INTERESTING LETTERS
FROM THE
Settlers in Upper Canada,
TO THEIR
Friends in Scotland.

COPY—Letter, THE EARL OF DALHOUSIE, Governor-General of Lower Canada, to His Grace THE DUKE OF HAMILTON and BRANDON, &c.

Castle of St. Louis, Quebec, 23d Jan. 1821.

MY LORD DUKE,

I received here, last summer, nearly 1200 emigrants from Lanarkshire, to be settled in this country, under special aid and encouragement from Government; and I have placed them in a district named for themselves, Lanark. I have no doubt they will prosper, because they are willing; they have excellent examples of prosperity around them, under circumstances of far greater hardship than they have had to encounter.

One of the earliest wants a new settlement feels, and the first always prayed for, from Government, is, an aid to build a church and school-house *. I have no power to assist them in this; and they are required to build it, before a clergyman is allowed to them. I venture to state this, in the hope that your Grace or Lord Archibald Hamilton, might be induced to countenance a small subscription in Lanarkshire, towards this purpose, in the new settlement of Lanark.—200*l.* or 300*l.* would be gratefully acknowledged by them.

I am sure your Grace will pardon me the liberty I have thus taken, and believe me to be, my Lord Duke,

Your Grace's most obedient humble Servant,

(Signed) DALHOUSIE.

* A Subscription for the above purpose, has been opened, under the patronage of His Grace the Duke of Hamilton and Brandon, &c.

*From the Rev. William Bell.—Perth, Upper Canada,
16th October, 1818.*

Every settler from Britain, receives, on application, 100 acres of land. I conceived, however, from my situation, that I ought to have had more. I accordingly presented a memorial to Government, on the subject; and have just heard, by an order in Council, that I am to receive 500 acres for myself, and one hundred acres for each of my sons, upon their coming of age.

The land in this settlement is very expensive to clear, the timber being, for the most part, very heavy; but, when once cleared, the soil yields to none in Canada, in fertility. The crops of all kinds, have been abundant; and provisions are now plenty and cheap.

Our church is now covering; and we expect to occupy it before the winter sets in. A very fine bell, with 100*l.* in money, has been sent to our assistance, by a few religious friends in Montreal. The steeple, which is lofty, is to be covered with tin, according to the fashion of this country. This being chiefly a military settlement, there are a great number of discharged soldiery amongst us; but few of them come to church. My congregation consists chiefly of Scotch settlers, together with the half-pay officers of four regiments, who are settled in this neighbourhood. You will scarcely credit the extent of country over which my labours at present extend. It is no less than 50 miles around Perth, there not being any other Protestant clergyman nearer, in any direction; but the country is still very thinly inhabited, though extremely fertile.

The number of emigrants, arriving every year, is great; but they are in a manner lost, in a country of such vast extent. The town of Perth is situated upon the banks of the Tay, a beautiful river which falls into the Redeau. The town is one mile square, and regularly laid out: already, there are about one hundred houses built in it, although it is little more than two years since the first tree was cut. There are few hills here, but abundance of lakes and rivers. You have often heard of the great lakes of Canada, but seldom of the little ones, although there are hundreds of them; and all abundantly stocked with fish. The first 100 acres of land I received, lies between two of these hills; but my house is built in the town, upon an acre received from Government.

*From Andrew Bell, son of the Rev. William Bell.—Perth, 17th
May, 1819.*

When I last parted with you, little did I think that it would be so long before I wrote you; but if you knew how far we are from Montreal, and the difficulty and expense attending a communication between this and that, you would be none surprised at my delay. I have embraced the first opportunity I have had, of sending my letter by any person going to Britain. You know I promised to send you an account of our voyage, but as my journal would exceed the bounds of a letter, I will only give you a short sketch here. That day we left you, we went to Blackburn, and the next to Leith; here we stopped a few days, till the wind should be favourable for getting out. We set sail on Saturday the 5th of April; but we had not gone far, before the wind got a-head, and drove us all back again. The wind was not favourable till early on Monday morning, when we again set sail. We soon passed the island of Inelketh, of which I took a drawing. We got out of the Frith by mid-day; and at night, we were as far north as Aberdeen; and by morning, we were nearly at the north of Scotland: but a most terrible storm arose, and our main-yard was broken: we had to go back to Aberdeen to get it mended. The storm still continued; and it was not till we had been out from Leith two weeks, that we reached Stromness, a town in one of the Orkney isles. All this time, I was very sick, and was not able to get out of my bed. We sometimes wanted meat for two days, as the cook could do nothing whilst the ship was rolling so terribly. The water was extremely bad, and we were allowed but little of it. The ship stopped here a few days, till the storm should be over; and took on board some more fresh water. During this stay, we went on shore sometimes, to see the island. It is a poor, barren spot, and its inhabitants are as poor. Out in the country, they are living in small huts, built of loose stones; and flags, instead of slates, are their covering: they have no outlet for the smoke, but the door; and, the consequence is, the inside of their huts are covered with soot. They have nothing to burn but turf: and the cows, swine, and sheep, are their fireside companions. We saw the women carrying dung on their backs, and milk-cows working in carts, with straw collars and saddles. As soon as the wind was favourable, we set sail, and soon lost sight of Scotland. We sometimes had little storms; but on the 3d of May, a most terrible one arose,

which lasted four days. It was awful to look at the waves: sometimes you would think, when we were in between two, that their tops penetrated the skies; other times, when we were on the top of a wave, it would frighten you to look down between them. On the 15th, the captain, judging we were on the banks of Newfoundland, sounded, but found no bottom. Next morning, we found a bottom of 70 fathoms down, and in a little, it was only 42 fathoms deep: this last time, the sinker brought up a piece of freestone, as big as a horse bean, which I have got. About breakfast time, we were surprised by meeting several large masses of ice; one of which, I made a picture of. We caught two great eods during the day. On the 21st, we came in sight of land; it was a part of Newfoundland, but uninhabited; and the next morning, we were in sight of Cape Breton. In the middle, between these two islands, is a small island, called St. Paul's. Through betwixt this island and Cape Breton, our passage lay; and it was blocked up with small pieces of ice. However, we forced our way through it, and got into the Gulf of St. Laurence. We were not long into the Gulf, before it grew very misty; and twice in the course of the day, we were nearly dashed to pieces on ice, as we did not see it till we were just at it. On the 26th, we entered the river, which is ninety miles wide at the mouth, and there is an island called Anticoste, in the middle. We went in by the south side of this island.

The trees on both sides, were growing down to the water-edge, and they were all green. Here, a most terrible storm arose, which lasted three or four days. I saw a brig which was a little way from us, with one of her masts broken down by the storm. Always, every day after we came into the Gulf, we saw whales. On the 29th, we got a pilot to take us up the river, which, for 150 miles below Quebec, is full of small islands. I had almost forgot to tell you what provisions we were allowed: it was 1 lb. beef or $\frac{3}{4}$ lb. pork, and 5 pints water, (an English pint is equal to a Scotch mutchkin,) 1 lb. biscuit, each day; and 2 lbs. flour, 3 lbs. oatmeal, and $\frac{1}{2}$ lb. butter, each week; besides a few potatoes and red herrings, that the captain occasionally gave us. On Saturday the 31st, we found the river water fresh, about 20 or 30 miles below Quebec. As the tide sometimes ran against us, we did not reach Quebec till Sunday night. There is a large island in the river, below Quebec, called Orleans, 10 or 12 miles long. Just below Quebec, the Montmorencie, a small river, falls into the St. Laurence, over a rock 180 feet high. We waited a week at Quebec, when

the Government granted us a free passage up to Montreal, where the Rev. Mr. Easton entertained us kindly for two or three days, when we went overland, 9 miles, to Lachine, where we got a boat which took us up the St. Lawrence, to Prescott. We went up to Brockville, a town 12 miles farther up the river, where Mr. Stuart lives. Here, we went northward from the river, with waggons, through the woods, better than 50 miles. We were three days on our journey between Prescott and Perth. On the 25th of June, we arrived at Perth. We crossed the Redeau lake, 9 miles from Perth. Now, when I have given you an account of our journey, I must give you an account of the place. When we left home, we thought the land would be covered with grass, and only a few trees here and there. But how great was our disappointment, when we found the ground was all covered with large trees, and not a pile of grass growing, except in beaver meadows: these are places where the beavers have made dams over rivers, and overflowed the ground with water, so that nothing grows, except a sort of coarse grass which is used for feeding cattle in winter; these are sometimes as large as 20 acres. The kind of trees which grow here, which you have not, are sugar-maple, hemlock, cedar (both white and red), and hickory. The way the land is cleared, is this; all the small trees are cut down, thrown in heaps, and burned; next, the large trees are cut down, and cut into logs 12 feet long, and their branches piled; then they are pulled together by oxen, and rolled into heaps, and burned. They all work with oxen, instead of horses, here, as they are better for going in the woods. They are worked in pairs with wooden yokes. The ground is covered with decayed leaves, which are raked together and burned; the land is then fenced with wooden rails; the large trees are cut about three feet from the ground. It takes a great deal of trouble to clear the ground; but we are amply repaid for our toil, by the noble crops which it produces. Oats are only used for horses and cows; we raise wheat, potatoes, Indian corn, buck wheat, pumpkins, melons, cucumbers, and a great many kinds of French beans, besides all the kinds of things you have at home. We have, growing wild in the woods here, rose bushes, and numberless sorts of the most beautiful flowers, onions, plums, cherry and walnut trees, gooseberry and currant bushes, raspberry and strawberry bushes, and a kind of bush called mouseweed, (the bark of which makes as good cordage as hemp,) cranberries, beans, cresses, and some kinds of tea; a kind of things that have roots like potatoes, about the

size of a turkey bean; I think it would grow bigger, if planted in open air, and dinged. We make plenty of sugar, from the mapple-trees, in the following manner; in the end of March, and beginning of April, when the sap is in the trees, we bore a hole, an inch and a half or two inches wide, in the south-side of the trees, and put a spout below it; the sap comes out at the hole, and runs down the spout, and is caught in wooden troughs; it is then boiled, and it takes near 15 Scotch pints to make 1 lb. sugar: the trees generally run four weeks each spring; and the longer they run, they grow the richer every year; and when it is frost in the night, and sunshine in the day, each tree runs as much in a day, as will make 1 lb.; some have 300 trees running at once. In the woods, we are terribly troubled with musquitoes, a kind of small flies that bite our faces and hands; their bites swell for two or three days. The only kind of dangerous animals, are bears, wolves, and snakes; these are very seldom seen, and do no harm but when provoked. The others, are, deer, martins, otters, fishers, beavers, foxes, squirrels, hares, musk-rats, racoons, geese, ducks, eagles, partridges, woodcocks, and a great many small birds and beasts. The country abounds with small rivers and lakes, which swarm with fishes of all sorts and sizes; in the spring, when they are so fat that they wont take bait, we spear them: the spears resemble a potatoe grape, only not half so large, and have barbs on each prong, and have a handle 12 feet long. They are caught with nets too. The governor has given my father 500 acres of land, and two town lots, one acre each. On some of our land, we have the best fishing stations in the settlement. Besides our two town lots, we have 10 acres of land cleared; we have 3 cows; and my father is going to get a horse before winter. My father has divided one of his town lots among four of us. I am now planting my quarter with potatoes and Indian corn, which I am to sell, and get the money to myself. Our new church will be ready in a short time; we have got a nice new school-house here; we have been in it four or five weeks past. The country houses are built of logs, and covered with planks, or bark of trees. The town houses are frames, covered with planed boards, lapped over one another, to send off the rain, and covered with pieces of wood about the size of slates; when they are put on in the same manner, and painted blue, they very much resemble them; these are called shingles: some of the houses are painted white, some yellow, and some red. The town is a mile long, and two-third of a mile broad; the river runs through it. There is an

if planted from the of March, we bore the south-comes out in wooden h pints to ch spring; every year; in the day, some have bite our ays. The and snakes; when pro- s, beavers, ks, eagles, birds and and lakes, he spring, bear them: so large, feet long. given my each. On the settle- es of land get a horse town lots with pota- he money time; we been in it built of logs, own houses one ano- s of wood the same them; these white, some two-third here is an

island in the river opposite the town, containing 8 or 10 acres. There are about 200 acres clear in the town, which is about one-half of it. Here, are residing a great many officers of the British army, on half-pay, and other persons of respectability. It is very pleasant in the town, and the settlement, in general, is very healthy. The settlers are now getting their difficulties over; they have plenty to keep them on their lands, and will have to work but little, by and by. Provisions are cheap, and wages high. In this settlement there are three townships, each 10 miles square; these are all settled, and the Richmond settlement, a new one, lately formed, on the north-east of us, is also settled; a new settlement is also to be formed on the north-west of us. I like the place extremely well, and wish you were here, to be my companion. Tell my grandmother, that we were never in better health, nor happier in our life, than we are now.

*From Archibald Philips.—Argyle Settlement, Upper Canada,
December 24th, 1819.*

We were eight weeks and three days on our passage betwixt Oban and Quebec, without any danger; and five weeks between Quebec and this place. We are now settled near to Duncan; our land joins each other, and we are all well satisfied. The king's land that was expected to be given to settlers, has not been given us yet; therefore, we are settled on Colonel Talbot's land, with the rest of our acquaintances, and have got 50 acres each, free of all expenses, except the settling duties. We have to build a house, and to clear 5 acres, with half of the road; then we shall get a right to it for ever; and we are to get 100 acres of the king's land besides.

Wheat, rye, Indian corn, and potatoes, are the produce of this new place; besides pumpkins and garden stuffs, you know nothing of. It is understood that we will have here, double the crop of wheat, that will grow upon an acre in the lower end of the province. We expect from 20 to 30 bushels upon an acre of land, well prepared. We think this is the best climate in any part of America, for North Britons. The summer is warmer than at home, and the winter is milder than in the lower province. I am much happier in working here, with my axe, than I was at the fishing, at home. Aunty is well pleased, and would be more so, if she had her friends beside her: she can make her soap and sugar, gather her tea,

and grow her tobacco. The old settlers that have been here several years, have as good a table as the Laird of K——. Land is the main object here: we have every kind of wood that you have, besides mapple, walnut, chesnut, baswood, hickery, &c. There is plenty of game here, such as deers, turkeys, &c.; but our time is too precious to be spent after them. You need not be afraid to come here; it is easier for a poor man to get into a good way of living, than in Scotland. Bring as much good wearing cloth and fustian with you, as you can; and bring 12 yards for me; also, red flannel shirts, shoes, and a pocket compass: buy your axe in Montreal, and your gun-powder and lead. Hired men have, in general, from 10 to 15 dollars per month; but it is better for every man to work on his own lands. The trees are not thick here: a man that is well acquainted with cutting wood, will cut an acre in six days. Those who are to come here, the sooner they arrive, the better; for, the longer they stay, the farther they must go to the back settlements. This is a beautiful country, where they have large clearings and good orchards. Tell Donald and his brother, that they might do well at their trade. If you and your father's family were here, you must do well. A strong family is better than a good purse. The reason that I did not write sooner, was, that I wished to know a little of the nature of the country.

*From Donald Philips to Duncan M'G——, Robert P——,
and Brother Neil M'A——.*

You may understand from what has been said, that this is a good country. If you have a mind to come here, you need not be afraid of the main ocean; but be sure to have a good ship, and all your agreements in writing. Bring some coffee and sugar, with some spirits, to help you during sea-sickness; and keep all the provisions you have over in the ship, to help you up the river. Although we did not think of applying to Government, for assistance at Quebec or Montreal, I would advise you to do it. The expense of every grown person in my family, from Montreal to this place, was two guineas, besides our provisions. This is a healthy country; I ought to be thankful I have my health better here than at home. We have a good climate, and good water. I was very happy when I came here; I had nothing to do but sit down in my son's house: he had two cows, and plenty of provisions of his own

I am now in my own house, beside him, the size of which is 28 feet by 20, and 15 feet below the rafters, of good timber; it was raised in one day, by 26 men, which they did free for their kindness to me. I bought two cows, and two oxen, which cost me 120 dollars. I repent of nothing, but that I was so long without coming out; but yet, if the Lord will spare me two or three years now, I will not envy any of the farmers in the parish of G—. Heavy hard ware and coarse cloth, are the dearest articles that I know of here. Any man that will come here, that is able for work, and can maintain himself for one year, may live very well afterwards.

~~~~~

*From A. D. to his Friends.—Bayham, Upper Canada,*  
12th July, 1820.

I now, according to promise, give you a description of my success in America. I arrived at New York, 12th October, 1819, 39 days from London, had a very pleasant passage, arrived in Canada, 7th November, met my brother on the 12th, and went immediately in search of land, and found a place to please us, on the 30th; got up a house directly, and got into it, 4th January, 1820. I have 200 acres of excellent land; and George has his just beside mine. We were very fortunate in getting it in a well settled place, with good water upon it. My brother and I went to work, and, with our own hands, cleared 10 acres, by the 1st of May. We sowed two and one-half acres of spring wheat, May 18th, which now looks well, and is in the ear; we also planted three and one-half acres of Indian corn, which looks well; likewise, three quarters of an acre of potatoes, with a plot of pease and turnips. We expect to put in 10 acres of wheat this fall; so you hear what progress can be made in clearing land.

I shall give you my opinion of America, as candidly as I can. As for the United States, I think, from all the information I could collect, they are about as badly off as the people in Scotland. Money is very scarce, and no business doing: but in Canada, we are much better, as the taxes are very small, and no dependence on a foreign market, for produce. Our markets are, wheat, 1 dollar per bushel; Indian corn, 3s. 4½d.; oats, 2s. 3½d.; potatoes, 2s. 3½d.; all the Winchester bushel. You will get a horse, from 50 to 100 dollars; a cow, from 20 to 25 dollars; a yoke of working oxen, from 70 to 100 dollars; Pork, 6¾d. per lb. of 16 oz.; butter, 1s. Labour-

er's wages are one dollar per day, if he finds himself; three quarters of a dollar, if he is found: but faithful labourers are few, as an industrious man can soon make himself independent. This is a country I can advise my nearest friends to come to, as there are so many advantages to be had in it, for an industrious man. You may keep as many cattle as you please, in the summer season, in the woods, which will cost you nothing; and they will even get fat: also, hogs, as many as you please; and, in winter, you can keep your cattle on browse, without any thing more than a little salt.

I think a farmer here is as independent a man as there is to be found any where, if he only manages well, until he gets a fair start. Money is very scarce, but you can get any thing you want, in exchange for produce. As for the weather, it was the best I ever saw. In Canada, last fall frost did not come on till December, and then it was but little till January, when the snow fell, which lay till near the end of March: sometimes the snow was 18 inches deep: we had generally a fair, unclouded sky, with a little frost, but by no means so cold as some winters I have seen in Scotland, although the people here says it was the coldest winter they had had for some years. Since the 1st of April to this time, we have had fine warm clear weather. My brother and I have been quite healthy since we came here, for which we have cause to bless God. I hope you will tell my good friend, James, if he comes here to farm, he will be sure to succeed, as the money it would take to stock a farm at home, would purchase a good farm here, and make him quite independent. You can have Government land, by only paying the fees; and if you want it cleared, you can get it done, all ready for sowing, for 20 dollars per acre, which the first crop will pay you; or, if you save the ashes, they will pay for the clearing: so you see, that an industrious man, with a little money, can soon add to his capital.

There is another advantage which we possess; that is, sugar-making. A man can make from 500 to 800 lbs., if he has kettles to boil it, in the course of two or three weeks, during either the month of March or April, as the sap runs, which requires frost in the ground, and heat through the day. As for my young friend, William, I cannot give him any encouragement, although we have great need of the gospel amongst us: the people here, in general, are Methodists: we are to have a church built this fall, but Government finds the preacher.

*From William Miller, to his Father.—Perth, 3d Oct. 1820.*

I have got my land and money, and every thing, as was said. My farm is 20 miles from this town, and 5 miles from Lanark town: it is in the township of Dalhousie, No. 14, 2d Concession. I am just going off on Monday to build my house: it is a most nice lot of ground: I have got 10 acres of meadow hay in it. If I had been here two months sooner, I would have had a cow this winter; if I have time, I will cut some hay yet, and get a cow; but this I cannot say, till I get up my house. I am very sorry, father, that I did not take you out with me, and if you had come, you would have got the same as I; for if you do not get into some society, as I got, the expense will be great to take you from Quebec, as they impose upon strangers so much; but, coming under Government grant, we were well assisted, and great care taken of us: 2l. a-head is just what we paid from Quebec to Perth Government settlements. In this town, there are 6 or 8 large stores, where you can get any thing, as you or I could get in Glasgow; but cast-metal is very dear, and crockery-ware. It is only four years since Perth was a wilderness of wood: there are three churches in it. Let my brothers Robert, James, and Andrew know, that I wish they would come here, if they can, as I think this is the country to live in. Let Robert A. and his mother and sister, know, that there are farms to buy here every day: you will get them from 15 to 20 acres, cleared, and a good house, for 25l. or 30l., which is allowed to be very cheap, all which you will get for ever and ever; and there are none less than 100 acres to a farm. I like the country; and you may make my compliments to John B., John R., Mr. M', and all the Church Session; to Thomas W., and all you know, on my account. I will write to you as soon as I can, to give you more information what to do. The distance from Quebec to my farm, is 409 miles. I intend to keep my family in Perth, till I have my house up, and provisions for them. The winter beef is 3d. per lb., pork 5d., butter 1s., potatoes 2s. per bushel, tea 4s. per lb., sugar 9d., tobacco 1s. 3d. per lb., rum 1s. a bottle. When you write me, direct to William Miller, farmer, No. 14, 2d Concession of Dalhousie, by Lanark. I have called my farm Whitelee, but it will not be known by that name for some time. A description of the country is, that it is healthy, and, for its beauty, I never saw the like of it, particularly 300 miles from Quebec towards us. I have nothing more to say, but that I never thought such a country was here; and I wish that I had been

some years sooner. You may tell my friends, and all that you know, they need not come here but for farming; no tradesman is wanted mostly at all: you may let John B. younger, know, that I think he would do well if he was coming, for his trade (a miller) is much wanted.

We came from Quebec to Montreal, in a steam-boat; and land-carriage from that to Lachine; and from that in boats to Prescot; and from that to Perth in waggons; and such horses for running, I never saw in my life: Mr. D.'s horses, that is, the chaise-horses, would not keep in sight of them. I got my wife, family, and baggage, on one waggon, and I thought, when they started, that the men were mad, for they went off like shot out of a gun, and up hill and down hill was all alike. They were most of them farmers; and I told the man that was with me, that if we were to run our horses that way, we would kill them; but he said, no fear of them. They are the most mettlesome creatures I ever saw; not so heavy as yours, clean-boned, lively creatures. I can tell you, and you may tell all you know, that my wife bakes me loaves as good as the best risped loaves in Glasgow. I thought that I would miss the oat-meal greatly, but I do not.

If you come, or your sons, or your good-brothers, or any you may show this letter to, be sure to get into some society, if possible, and, by so doing, it will be a great saving. A pot which you will get for 4s., will cost 2*l.* here; and a kettle that costs 6*s.* with you, costs 2*l.* here. Pots and pans be sure to fetch, and a grindstone: this you may get, if you come in societies; but, if you come on your own account, it will be very dear to you. A set of tea-dishes, which you will get for 8*s.*, will cost 1*l.* here. I am very sorry that I did not take more of these things with me, that I have mentioned to you; but there is no help for that now. But I tell you, that a 4*s. 6d.* dollar is 5*s.* here, and one of your shillings is 13*d.*, and your farthing an halfpenny, and a penny-piece, the same; every thing you have, if it be the shape of copper, goes for an half-penny.

I have gotten 20*l.* this day, and I get as much this day three months, and as much in three months after that; and I get farming utensils, of every description that I need. Thanks be to God, for being so fortunate as I am.

I got information this day from Captain Marshall, how I will get you out, free of expense: if I get this for you, I think I shall be happy: this I will write, if I get it for you, how you are to do.

*From an Emigrant in Upper Canada, (by trade a Mason,) to his Friend in Glasgow.—Caledonia, October 8th, 1820.*

I have been rather neglectful in attending to your letters; but have delayed no time that was in my power. I have been at Kingston at work this season, as you may have heard by a letter which I sent from that place: I was then in tolerable health, but took badly immediately after, with the fever and ague. The place where I wrought was very unhealthy, being close beside a part of the lake where the war vessels lie, and where the waters lay stagnant. As you and some more of our friends talk of crossing the waters, I should be very happy to be within the range of your society, although I had resolved never to advise any person to come here, only to state facts so far as I know.

People must expect to make many sacrifices, who come to this country, which, I suppose, you are not ignorant of; yet, with all the difficulties attendant, I should, for my own part, prefer it, to bearing the difficulties which you have to struggle with at home. If people are industrious, they will daily be making it better, and, in a short time, they can have all the comforts of life within themselves, and be independent of the fluctuations of trade; although they may not be very plenty of money, they will not have so much to do with it.

I must now begin to answer your queries, so far as it is within my power, although I cannot pretend to be very correct, not having had it in my power to see much of Upper Canada personally; but, from the best information I can obtain, the farther up the country, the climate and the land is the better; and my advice to you would be, to proceed as far as York at once: you would require to look through the country, and see for a situation that would suit yourselves. There has been a young man from this place, surveying there: he says, there is some excellent land: one township has two rivers, which they commonly call creeks, running through it, with good mill-seats on them: there are plenty of them throughout all the Upper Province; and the land is generally meadow alongside of these creeks, and by the sides of the lakes. Mills are pretty scarce in the new settlements; they are commonly the property of individuals. I have heard of no steam-engines in the country, but what are in the steam-boats. The high-lying ground is allowed to be the best for wheat, but not so good for grass. Some maintain, that there is land there equal to the best in Scotland, if it got the same labour; yet there are barren spots to be found here and there

amongst the good, particularly the swamps, which they generally reserve for fire and rail-wood: there are some incumbrances in the most of land, but they are easily cleared away. There are large tracts of land without any timber at all: people do not choose to take it, as they cannot do without timber: there is nothing else for fire. It is said, that there are coals to be had in different parts of the country, but they do not wish to encourage them, while wood is so plenty. They manufacture all their wood with the axe, and only use the cross-cut saw for logs which are to be sent to the saw-mill. A man will cut down an acre in a week, ready for burning. When set by the acre, they used to have five dollars; but after that, it is all to be piled up in large piles for burning, which requires a yoke of oxen to draw the logs together, when all is burned and clean. They sow their wheat the first year, without any ploughing at all, only to drag it. The only thing which you could raise the first year, would be potatoes, and some vegetables: it would be too late for Indian corn. The first thing which settlers have to attend to, is the putting up of a log-house, which they are generally assisted with by whatever neighbours are near them; and they get it up very quickly, and, with a little extra pains, they can make it very comfortable and warm. There is plenty of stones in various parts of Canada: about Kingston, it is all rock together, and at many other places up the lake. There is an acquaintance of mine who has a lot about thirty miles from York, where he says there is plenty of free-stone: but there are other parts of the country where there is no stone; such as Colonel Talbot's settlement, and upon the river Thames, which is said to be as fine a country as is in Canada; but I believe there is no part of the country where there is not clay to make brick. All along the side of the lake and the river, the ground is cleared, and for some way back, only there are some large trees hanging on the banks of the river, and some barren spots here and there, not worth the cultivating.

The articles of agriculture are not altogether the same as with you: the plough is not just the same, neither are the horses' harness, and the axes are different: there is but little difference in other articles. As to what articles you should bring with you for sale, I am at a loss to say. I have been told, that Quebec and Montreal are the principal places which you could expect to sell any goods at, and these markets are quite full, and there are vendues at each of these places every day: many people say, that they can purchase goods almost

as cheap there as at home. I cannot really state the price of iron; but I have been told, that it could be had at either of the before-mentioned places, nearly as cheap as in Glasgow, only the workmanship is considerably higher: when I got tools made at Kingston, which were principally of steel, I paid 1s. 3d. a lb. for them. There are iron-works in Lower Canada; and it is proposed to have one erected in the Upper Province, somewhere betwixt Kingston and York. Blacksmiths, as well as other tradesmen, are quite plenty in the country, and wages of all kinds are greatly reduced. I would advise no person to come here to follow a trade; although it may be useful and profitable at some times, yet it does not do to depend wholly upon it. If a man is once out of employment, he may travel hundreds of miles before he can fall in again; and there are but few places where he can get money for his work. A farmer will pay him with the produce of his farm, and a storekeeper will pay principally with store goods. I would advise you and your friends, if you come here, to bring with you plenty of clothes, and all such articles of small household furniture as you can bring conveniently. It will be unnecessary to bring chairs, bedsteads, or tables: you might bring some iron chains, for logging and dragging wood with; also, a quantity of nails, hammers, hand-saws, and chissels.

You might bring some garden seeds and clover seeds; and if you are to find your own provisions on the voyage, be sure to bring plenty of potatoes with you: you will find them to be more precious than ever you did on land. John ——, who came out last year, is 50 miles south of York, and works a farm upon shares: he is highly pleased with the place, and happy that he has come to it: he says the place is quite healthy, and the climate much the same as it is in Scotland, both in summer and in winter: he wished me to go and see him, which I would have done, had I been in health this winter.

As to the title-deeds of the lands, I believe they are to be had at every township. I have never heard of any complaint on that subject. Government has always acted honourably in their engagements; but persons must be on their guard when they purchase from individuals. There are always a number of improved farms to be sold, both in Canada and in the States. A man who could give a little money in advance, could purchase to great advantage, and he would be allowed plenty of time to pay the balance.

As to the state of religion in Canada, it appears to be very low in many parts of it: you would see very little difference

on the Sabbath-day, from the other days of the week: so far as I have seen, the people are all remarkably addicted to drinking spirits, yet there are a few individuals of a different description. Methodists are the most numerous; they push themselves into every new settlement. There are also several Burgher preachers in the country. There is one Baptist preacher, Mr. S—, formerly a student with Mr. H—: he and a number of his brothers have got a large settlement of land for themselves, some considerable distance from York. Governor Maitland, who, it is believed, is a religious man himself, and gives particular favour to all such characters; and, I think, if you and your friend obtain a particular recommendation to him, it might be in your favour. As to the Indians, you have nothing to fear: I have never heard of any injury they do to any person: as to any attempts to instruct them, I have never heard of any such attempt amongst the Canadians; but the Baptists of the United States have had missionaries amongst some of their tribes, and seem to speak of some success. Those Indians which I have seen about Kingston, were almost always drunk: they will not work to any person; but they are sometimes employed in catching fish, and in making baskets, which they sell, in order to get money to drink. I would not advise people to go on Perth settlement, as I know different persons who have drawn land there, and who have given it up: it is the place where all the old soldiers draw their land, and many of them would sell it for a few dollars. I forgot to mention cloth for bags, to hold your meal and corn: there are none of them larger than to hold three bushels: the stronger that you can get the stuff, the better. If it is so, that you are determined to come out, I can safely say, there never was a better time for emigrants who have a little money, as labour is remarkably cheap. There has been flour bought at Kingston, for three dollars a barrel; and every thing else is in proportion: the crop this year exceeds that of last year.

Cattle are also very cheap. If a man had a little clear land upon his lot, he could soon raise a stock of cattle, as they are very prolific in this country: sheep, cows, and hogs, have all young by the time they are two years old.

There is a periodical publication commenced this season at York, much the same as the magazines with you.

[The writer of this letter has been about three years in the country.]

*From an Emigrant, to his Relation at Cross-my-loof.—  
Hammond, September 19th, 1820.*

The best thing for people who come here, is to take a piece of land, and then, with labour and economy, they will, in the course of a few years, come to be independent. We have scarcely any taxes. We have gentlemen, but they are plain men, and very unassuming: for beggars, I do not recollect that I ever saw one since I came to this place. With regard to your question, of whether I am more comfortable, I will tell you the honest truth, that my labour is very hard and constant, but I have always had plenty of provisions, and enjoyed good health, since I came to this country; and I have the prospect, that, in a few years, my labour will be much less, and my income much better. Your aunt requests you to inform your father and mother, that she has been always very healthy, since she came to the country; and that she would be very happy here, were it not for the great distance which she is placed from them and the rest of her friends; and that it is only for their sake, that she is not very happy here. I have got fifteen acres of land cleared; and we are coming on to have a considerable farm-stock: we have one ox, one cow, two young oxen, that we reared ourselves, five swine, and a great number of fowls, and we may in this country shoot as many fowls as we please.

*From Alexander Watt, to his Friend in Quebec, who remitted it  
to a Person in Glasgow.—Perth, 10th October, 1820.*

We got orders to go out to the township of Dalhousie last week, and choose lots for ourselves: all our Society were settled in the course of four days. There are 20 of us settled on the 1st line or road, between the 1st and 2d Concession, and 12 of us on the 2d line or road, between the 2d and 3d Concession. I am on the 25th lot, east side of the 2d Concession of Dalhousie,  $1\frac{1}{2}$  mile from Clyde, which runs through our township, and joins the Mississippi, at the new town of Lanark: I am 7 miles from New Lanark, and 17 miles from New Perth: I am well pleased with my ground; it is nearly covered with sugar maple: I suppose I have 4000 sugar trees, and a great deal of beech, ash, and a few cedars: I saw no fir: I have a small swamp for grass, and a fine beaver meadow: I could keep a cow on it: it is, I think, 6 acres, all with a fine long grass. Those people who intended to be neighbours, are some of them 3 miles from each other. I have got very good neighbours; and I have long wished to have you beside me. There

are three lots on the north side of mine, not taken up yet; but, to tell you the truth, I do not know what kind of ground they are, for I have not seen them; but the ground beside, which I saw, is very good: these lots are on the 1st, 2d, and 3d Concession. I have considered your state a hundred times. I would not advise you to come up here this season, for this reason, the year is far advanced, and no roads cut yet, and, owing to such a number of Emigrants coming, every thing is two prices. Flour is 7 dollars per barrel, potatoes 2s. 6d. per bushel, beef 6d. per lb.; but they say, that victuals of every description will be almost for nothing, after we have got our difficulties over. Now, William, I have seen nothing yet in America, that I did not expect: the ground is far better than in the Lower Province. All the ground is good, except what is swampy and rocky: the swampy ground is best, when once cleared, for grass. We are all going out to-morrow, to cut roads, and build our houses: the families are to stop here, in Perth, for some time. I have gotten 1l., the married men 2l.: this is our first payment. We have gotten rations from Government, since we came from Quebec, up to the 16th October: we have gotten a good blanket a-piece: we are to get cooking utensils, implements of husbandry, and assistance of every kind, over and above our money. Mr. Marshall, who has the superintendence of the settlers, (the same gentlemen that I went to in Glasgow,) tells me, that three townships are to be laid out for settlers, next year; and although I refused the lot that fell to me, being a swamp, and was obliged to take an outside, yet will I be in the midst of settlers next year. The reason why I have not seen those lots on the other side of my one, for you and John, is, we employed a guide to conduct us to our lands: mine being the outside one, they obliged me to return directly, or they would leave me in the bush, to find my way home; but I shall have a look at them first opportunity.

The expense from Quebec to this place, as near as I can judge, is—from Quebec to Montreal, 2 dollars; from Montreal to Lachine, by land, 5s. to 8s. the waggon-load; from Lachine to Brockville, by the Durham boats, 2 dollars a-head, and 1 dollar for every cwt.; from Brockville to Perth, 38 miles, 11 dollars for every waggon; from Perth to the New Settlement, I cannot tell, as we got every thing from Government.

I shall write you what way we are coming on, after this. There are three or four children dead, since we left Montreal,

in the flux and chincough; but I was never better in health in my days: I expect you are the same. Call on the Aberdeen smith, and let him know how things are. I have the half of your compliment yet.

~~~~~

*From J. M. to his Friends in Kirkfield Bank.—Perth,
Upper Canada, 16th October, 1820.*

Our Society are now all settled (except 9) in the township of Dalhousie, and will be from 4 to 10 miles distant from Lanark, which is to be a Government depot, as the new settlements here are to be the best in the province, on account of an inland communication by a canal, and the Ottawa River, from Kingston to Montreal, as it is intended to supply Britain, and the West Indies, with all the supplies produced in Canada, in case of a war with the States. Provisions are very high here at present, on account of so many new settlers, all supplies having to be brought from Montreal or Kingston, at which places they are very cheap: flour at these places, are $3\frac{1}{2}$ dollars per barrel, for which we are paying 7 dollars.

Politics have never been spoken of, since we left Scotland, by any that I have heard of in our Society: all their time is taken up with their own affairs. Labourers' wages are a dollar per day, in general, but, at this time, they are less, on account of so many working people here. As to the situation of the people here, or of this place, I cannot give you any satisfactory account. Those who have a little money, to commence store-keepers, are making fortunes, as they take very high profits. Some who came lately here with nothing, have now a good stock of cattle, and a good deal of cleared land; but money seems to be very scarce amongst them. This is the last day for the post by Quebec, and I will write again by Halifax, when I am settled.

If any of our friends wish to come out next year, be sure that they come in the spring, and they will have the first choice of the land. If James comes out, be sure to send with him one peck of oats, the latest kind to be had in Scotland, half a peck of rye-grass seed, with two lb. red clover seed, and two or three hoes; axes made in Scotland, are for little use here.

~~~~~

*From the Same.—Dalhousie, 5th March, 1821.*

According to promise, I should have wrote you long ago, but I thought it would be as well not to write till I was settled,

which was not before the new year. I am now on the 10th lot of the 3d Concession of Dalhousie township, 8 miles from the village of Lanark, and 16 miles from Perth. We have got all the money that was promised from Government: likewise every settler who comes here, gets one blanket for himself, one for his wife, and one for every two children; so that I have got six blankets, worth 1*l.* each: we likewise got an axe, a saw, camp-kettle, pick, and spade, a hoe, an auger, a lock, hinges, and 14 lb. nails, which every man gets, whether rich or poor, that settles here. There is a church or school-house going up in Lanark, and there are four store-keepers, and there was not any road within eight miles of it last year, on the 1st day of September.

It is reported, that there is to be a village named Dalkeith, within one mile of me, and a church and school to be built in it, the salary of which is 25*l.* per year, with 100 acres of land. The lands here, in general, are either stony or wet, but are allowed to be almost the best in Canada; and every person gets from the Superintendent, four or five lots to look at: if any of them pleases, he takes it; if not, he gets new lots, until he or they are pleased. The Superintendent is a Captain Marshall, and he is very well liked: he is a Glasgow gentleman. All store-goods which comes from Glasgow, is double the price they are with you. If any of your acquaintances are coming out in the spring, they will do well to bring as much coarse plaiding with them as possible, both for shirts, and every other purpose of clothing: they wear very short time, as the brushwood tears them. Cotton clothes are for very little use here, as there are some kinds of wood which sparks in the fire, and burns them all. Strong shoes are likewise of little use, as the roads are soft in summer, and the snow is dry in winter, they cannot wear them. They all wear a kind of boots, of single sole leather, which are very easy. I have made several pairs of them, and could get 2*s.* per pair for making, and any man will make three pairs a-day.

The winter has been much the same as at home, except that neither the ice nor snow have gone away all the winter, and we have never had above two days freshness at a time. I have wrought without the coat, except three days, when it was very severe: if the feet is kept warm, there is no strait in working here in the day-time. Every Emigrant should, if possible, bring an oven, and pots for cooking. Stoves, such as you had in your shop, is of much use. Scotch spades and hoes are likewise useful: a hoe costs a dollar. If any be coming

10th lot from the  
e got all

out from Kirkfield-Bank, I wish you would send me a Scotch-made spade, and I would pay them when they arrive here: a scythe and scythe-hooks are much wanted. How the people are doing here, I cannot say much from personal observation. There are a great many old soldiers, and they drink all that will drink. I saw a lot of land, on Saturday last, go to a store-keeper for drink, at 35*l.*, allowed to be worth 200*l.* If a man drinks all, and works none, he will not do well any where. All that I will say is, that I think as much of this country as ever; and, in a few years, my 100 acres will make me independent of man; at the same time, a man with a little money, by taking a store, if careful, will make a fortune. A man of my acquaintance assured me, that, in five months, he had turned 2500*l.*, one-third of which was profit. We have all gone through a great many hardships, as we did not expect to go so far into the woods to look for land, and then to cut roads, which a number of those who come out next year, will not be troubled with, as there are a good deal of good lots here not taken up. If any person has a friend or acquaintance coming out, they get a lot for them, till they arrive: any person likewise gets a town lot, provided he puts a house on it in eighteen months, which, when the town becomes thriving, the half will sell for 100*l.* If you will be so good as write me, how trade is doing in Scotland since we left it, as I still wish old friends well; but, if they cannot live at home, there is plenty of land here; and although they will not make much money, they may get their meat well, by industry, and, if the canal was made to Lanark, the lands will be of great value.

---

*From John Climie, to his Brother and Sister.—Dalhousie,  
Upper Canada, 8th February, 1821.*

Although it is but about six months since we had the pleasure of seeing one another, and enjoying one another's conversation, spiritual and temporal, I trust to our mutual benefit, and although at the distance of about 5000 miles, we rejoice to know, that we can meet, day by day, at a throne of grace, and also in our night visions, and almost every day you form a part of our conversation.

The vast vicissitudes that we have gone through since parting, we can hardly with pen and ink relate. All has been new, and all has been a wonder, from the porpoise that tumbles in the sea, to the sturdy oak that grew on Stirling-Place, which the boys and I cut down the other day, and which

measures, in circumference, ten feet six inches. I do not know whether you are in the same mind as you were when we were together, or not, about this country; but I can safely say, that I have seen nothing contrary to what we anticipated, save that the winter is far milder than we imagined. All the Emigrants agree with us, that winter is pleasanter here than at home; however, I would not advise any to come here on my testimony, only I can say, that I bless the Lord that I have come here, and am obliged to those who were the means in his hand to the obtaining of it. May they find mercy of the Lord in that day.

But if any come from your quarter, I wish them to get into a Society, as I did, for it is very expensive coming from Quebec to this place, and maintaining a family, until a crop is got off the land. Indeed, there are a good deal of hardships to overcome, before obtaining the prize; such as selling our articles for half-nothing—leaving our country and friends we held so dear—crossing the Atlantic—meeting with gales of wind—sometimes sea-sick—too much choked up in our births—sometimes loathing our food, though good and wholesome—wearing for a sight of land, but, with bad navigators and contrary winds, going faster back than forward—and, to crown all, associating with profane swearers and Sabbath-breakers—then landing in a strange country; and, if you are not on your guard, you will be taken in, in making merchandise—jogging in waggons—going up the river in small boats—landing at night at the side of a wood—kindling a fire—cooking our victuals—making our beds—every one running faster than another, to find the lowmost spot—then hurried up by the break of day, by the conductor crying, get into the boats, scarcely giving us as much time as to collect our children and bed-clothes (for there is no casting off body-clothes on these occasions) together, till the boats are off—then plying and rowing with oars, till coming to the strict running of the rivers, which they call rapids, on which poles and oars have no effect—then the male passengers, with all the sailors but one who is left to guide the boat through, whilst we are pulling with ropes, till we get it through the stream, which is sore work: indeed, you must understand, that the boats sail by the sides of the river, so as that we are on land, while pulling the same. Then, after water-passage, the land-carriage, which is about 60 miles, which they accomplish in about two days, with four-wheeled carriages with two horses, load ten cwt. The road is very rough, and they go with such fury, that sometimes, going down a hill,

all is upset; however, the driver is forthcoming for any damage. The families are left in a village, while the husbands are sent away to view their land, at a distance of 15 or 30 miles farther up the country; and the most of the road, no other thing to guide us, than a spale off the side of the trees, and, if not properly attended to, are sure to wander. You will recollect of a Robert F—— that called on me, and who gave himself out to be somebody that thought, on account of his knowledge of America, that any Society would be a profiter to take him with them: I am sure Joseph B—— will remember him, for he was in Mr. B——'s with him two or three hours, while they waited for me coming from Glasgow: he was about five days lost in the bush; and your cousin Peacock was two days, and lost his watch while wandering among the trees. Lying in a wigwam, and nothing but a blanket about you, and perhaps not a change of clothes for two or three weeks, and all this time absent from your wife and children, until our houses are up; and carrying provisions on your back for about three months; and, worst of all, separated from religious society. You will be saying, after reading this catalogue, Oh! America is not for us! but hooly, hooly, stop a wee, I am not done yet. Do you know, that I have got up my house, which is 16 feet by 20, and two stooped beds, of my own making, and a case for my library, and a shelf for the dishes. We hope you will bring a good supply of them with you, for they are a dear article here: a bowl you will get at home for 2d., you will pay 9d. for it here: we would have liked to have had more, seeing we have got them so well preserved. We have got about two acres of our land chopped, and we hope to get twice as much by seed-time; and you know, that the house, and rent, and fire, are free, along with a well-furnished house, and plenty of provisions within it, without the fear of a grocery balance coming on, or a laird to say, it is Martinmas. Our first instalment is not exhausted, and we expect every day our next, which will do more than serve us till our next payment, which will be in April. Of said money, we intend to buy two milk cows, which will cost about 10*l.* With their milkiness, and our crop, we think, if Providence bless us, we will have as much as keep you and us comfortable, till we get more off the ground: and will you still say, America is not for us? Surely not; and to tell you more of our comforts, we, in this Concession, have formed ourselves into a religious society, and two of our number are appointed to lead the worship; and we intend to meet in our several houses, till we get a house built for the

purpose. But we are convinced, that except the Lord build the house, &c.—Your prayers, along with the rest of our brethren, are requested.

A pot-metal oven, which you will get in Glasgow for 4s. 6d., you will pay 17s. 6d. here. We have not got one yet, hoping you will bring one along with you to us, as they cannot well be wanted here, for the purpose of firing loaves. We are very sorry that we sold our large pot, as it would have been for great use here, for boiling our sugar, as every one that likes, can make from 100 to 300 pounds a-year. A few tools would be very useful, also, for, although we get some from Government, yet not sufficient for our need. If you can get a jack, hafting, and hand-plain, and a pair of ploughs, for a door, or flooring with, a screw-auger or two, and a few chisels, from one-fourth to an inch, and a gouge or two, and a dozen or two of files, for hand, pit, and cross-cut saws, with a few spoke-sheaves, and water-of-air stones, as they are very dear here, you could get them sold to great advantage. The only thing for clothing here, is woollen; it stands the wooden fire best. You will see the oldest female, to the youngest, dressed in a woollen frock, which they pay 4s. a-yard for: you will buy plaiding in Glasgow at 2s. a-yard, which I think will do far better. You will be so good as let Mr. R—— know, that we are prohibited from paying away any of the Government money, by order of the Commissary here, on the penalty of losing all our Government grant, which would render us miserable indeed, on account of which, he will see the impracticability of paying our bill. When I got the money from him, I had no thought but that I would be able to pay it; but I am very sorry, that it has turned out otherwise. He spoke of sending a few tracts; I will be very glad, if he would be so good as send them. Books of a religious nature are of great value here, to a sober mind, for there are troubles here as well as at home.

---

*From H. L. to his Correspondent in Glasgow.—*

*Montreal, 23d May, 1821.*

Having now experienced a revolution of the seasons, since my arrival here, I am much satisfied with the climate, as highly conducive to health. The summer-heat averages from  $75^{\circ}$  to  $80^{\circ}$ . In the towns, it is sultry, dazzling, and scorching; in the country, exhilarating and pleasant; except when a thunder-shower beclouds the sky, the visible horizon, the

whole expanse is, week after week, without a cloud; the air pure, and without a dark and noisome vapour; vegetation abundant, and almost seen growing, so great is its rapidity. The Lower Province has a superiority over the Upper, in point of pure air, not being interspersed with so many lakes.

The St. Lawrence, the king of rivers, is crowded with rafts, flat-bottomed boats, from great distances; large long boats and canoes, with their various traffic, to Montreal and Quebec; fleets of brigs, sloops, and schooners, coming up with their wares, and to receive wares in return. Harvest, incorporated with summer, allows the farmer to gather in the produce of May, June, and July; latter end of July, and beginning of August, without a drop of rain: towards the end of September, we have heavy rains, and cold sometimes commences in October, but seldom intense, until the latter end of December.

The lowest the thermometer was last year, was 26° below zero, on the 25th and 26th of January. I travelled a few miles in a sleigh, on the 26th, with exquisite satisfaction: except these two days, the average was not under 14°; but, mark ye, owing to the total absence of chilling damp, the intensity of the cold has not the same effect: the fact is, the winters are the healthiest part of the season. The people here travel night and day, and you never hear a cough or hoarseness among a churchful of them. In the Upper Provinces, there are a great deal of fevers and ague; but the country, as a whole, has a vast superiority in produce, particularly the sides of Lake Erie (from which a canal will shortly be made to New York, which will only be three days sailing). Here, peaches, vines, &c. grow luxuriantly in the open air: a profusion of every thing but virtue and good society.

I thought proper to halt here, to look about me, and I bought land, which I am nowise anxious about the cultivation of, as it did not cost me above a dollar per acre, and as it is to a certainty to increase in value. No part of the United States is so healthy as Canada; and I prefer this country: their mode of government may be more congenial to the natural rights of rational beings, (which I question,) but it being the most delicate, is, of all others, most liable to abuse. Among the native Canadians, there is a simple, respectful intercourse with one another; and, towards the emigrants, there is rather a flippancy, that argues a consciousness of superior accomplishments, and, although there may be often little sincerity in all this, it renders intercourse less irksome. The Canadians are, in general, as simple, harmless, and hardy a set

of people, as lives, and the Indians more so; in both cases, the adventurous fugitives and emigrants from Europe, have grievously corrupted them.

The natives of this country are wonderfully ignorant; the female sex get a little education: but the priests discountenance learning, ignorance being with them "the mother of devotion." I never saw the face of an exciseman or a tax-gatherer in this country: all a person enjoys is his own: perhaps no country pays less taxes, and enjoys more real rational freedom than here. I have seen the manner in which justice is administered, having been on the jury for fourteen days.

The crimes are numerous. Those generally committed by Canadian natives, are, except in a few instances of a petty kind, misdemeanours, committed under the influence of intoxication. The more wicked, daring, and atrocious crimes, fall to the share of Britons and Irishmen, particularly the latter.

The immoderate use of spirits, is one of the greatest curses in this country. The Canadians dabble continually in rum; but the greater part of them are never insensibly drunk. But those who have been in the habit of paying 6d. for a *gill*, getting it here for  $1\frac{1}{2}d.$ , often indulge in it to the utmost extent of their voracious appetite. I do think, that if a man chooses to live agreeably to nature, if he can possibly scrape together what will keep him alive, till he gets the first crop off the ground, that he can enjoy in this country, not only competence, but abundance, and no person to trouble him. He raises on his own lands, Indian corn and oatmeal, milk, butter and cheese, beef, mutton, wool, soap, and candles, in fact, any thing that nature requires. The mapple-tree affords him abundance of sugar; his bees give him honey; tea, spirits, wines, &c. are refinements on nature, or rather the reverse.

The seasons have been described in almost poetical exaggeration: but picture to yourself, a slight fall of snow, rendered dry by frost setting in at the commencement of winter; and, instead of a howling boisterousness, a clear serene sky, a bright vivid sun, in latitude  $45^{\circ}$ , in whose rays you can bask with pleasure, when shaded from the north wind. This state of weather continued for two months, December and January, (January was the most exhilarating month I have spent in the whole period of my life,) February and March were more windy, and the snow in those months got thicker, but from November till May, except two days, there was no damp. In fact, there is nothing so much wanted, as a few men of talent

and property, to give a zest to society, and, by patriotism and public spirit, set local and public improvements in motion. There is another happy circumstance,—the clergy are not a dead weight here upon property. They have lands assigned to themselves, and they have no claim on the other landholders, neither tithe nor tiend. Wishing to be particular,—the laws are probably well executed, but miserably deficient. A bill here, is not so summary as an open account in Glasgow. Judgment seldom ever passes on a claim, the first court: that time six months, if a litigating cavil is agitated, the defendant can traverse it till another term; then it is conclusive: but, if the person has an acre of land, or a chair, you cannot touch his person, till you enter a process to sell these: before that is constituted, he buys another bit: the expense of constituting a right to sell, is much more than the value of what is to be sold. The only mode by which a man can be imprisoned, is, by swearing that he is going to leave the province; and the law, which is, to excess, lenient to put a man in jail, is equally cruel and unrelenting, to keep him there: if his prosecutor chooses, he can keep him there till he die; no provision to relieve an unfortunate honest man, from the hand of an unrelenting oppressor: the law, after I know not how long, allows him 5s. a-week. A sum of 11*l.* cannot be constituted at less than 9*l.* of expense. This state of things has one good tendency, it deters the prudent from giving any credit at all, and makes the adventurer more cautious. I shall close my narration, by giving an account of markets here; beef, 6*d.* per English lb., mutton and pork, the same at present, in summer it is 3*d.*, and in winter, 2½*d.* and 3*d.*, eggs, 6*d.* per doz., hens, 1*s.* to 1*s.* 6*d.* a-pair, a goose, 2*s.* 6*d.*, barley, 4*d.* per lb., rice, 23*s.* per cwt., good raw sugar, 6*d.*, best, 7*d.* per lb., tea, best Hyson, 8*s.* per lb., the kind generally used is Twankey, 5*s.* per lb., soap, 7*d.* per lb., rum, 2*s.* 6*d.* to 3*s.* 6*d.* per gallon, brandy, 5*s.* to 8*s.*, gin, 6*s.*, wines, port, 12*s.*, Teneriffe, 5*s.* to 10*s.*, Madeira, 18*s.*, crystal, and window-glass, 1*s.* 6*d.* off the home price; fire for a family requiring two fires, 14*l.*, rent of an ordinary house, say four apartments, 30*l.*, a servant's wages, 1*l.* per month; all the above is Halifax currency.

~~~~~

*From William Purdie, to Mr. Robert Lamond.—Quebec,
30th June, 1821.*

I take the opportunity of the bearer, Mr. M'Limont, the second mate of the ship David, to hand you this note. We have

been well used by the officers and men, during the passage, for which I feel thankful, and I beg you will say so to Captain George, when you find an opportunity. I have also to inform you, that we met with the greatest civility and despatch at the Government office here, and we were served out with bread and meat, the day following our arrival, to carry us up to Montreal. We were five weeks and two days on the passage; we had a fortnight of rough weather, and, most of the voyage, contrary winds; but our vessel was the finest sailer I ever saw; we passed every vessel on the same tack. We were just four weeks without seeing land: the St. Lawrence is a majestic river; it is spotted with a vast of beautiful islands, (on some of which, our people went ashore, and got milk, bread, and vegetables,) but, amongst these, the island of Orleans is the largest, and most beautiful; it is 30 miles long, and, in general, about four miles wide: it has a gentle rise, from the water's edge to the centre, which is about two miles: on the top of the ridge, it is studded with trees; and it is thicker studded with houses, than any country place I ever saw in Britain; and, what strikes the eye of a stranger, is the universal whiteness of all the houses. The south bank of the St. Lawrence, for 100 miles below Quebec, is equally populous, and the houses equally white; but they seem to be behind their neighbours on the island, as to clear land: the main land seems to be one continued forest, except near the river. We saw no towns below Quebec, but a thick peopled country, all living at a little distance from one another.

I intended to send you a copy of my journal, but it was put on board the steam-boat, when I was ashore on the Society's business, and carried up the country. I have been necessarily detained behind the Society these five days; but I go up this evening to Montreal. Our provisions were all very good; but we could not prevail on our people to eat the biscuit: we sold them here at a trifle, as it was unnecessary to carry them with us. If you ever send out any more emigrants, if you could substitute potatoes, at least a large proportion of them, instead of bread, it will be doing the people a singular service, as they eat potatoes, when they can eat nothing else: pork is also much preferable to beef.

If I am spared to arrive, I still intend sending you a copy of my journal, then you will have the particulars of the voyage; this, however, you need not now expect, until I be able to give you farther information.

Quebec is a large place: all seem greedy of gain. Provisions are cheap, and very good; bread, $5\frac{1}{2}$ d. per quartern loaf. The adjacent country has a fine appearance, but all kinds of grain appears to be later at present, than they are at the same season at home; but I am told they ripen faster, and, of course, the harvest may be equally early. They are evidently bad farmers in this neighbourhood.

Mr. M'L—— signifies to me a wish to come out as a settler, next season: if he continues to be of the same mind, I conceive he will be of great service to our settlement, as he is a thorough-bred seaman: and I now learn, that we will be settled in the immediate vicinity of a navigable stream, that flows into the Ottawa *.

—————
From James Gilmour, who sailed in the Buckinghamshire, last Spring, to his Brother in Glasgow.—Lanark, 1st Aug. 1821.

We sailed from Greenock upon the 29th April, at five o'clock, a.m. The ship got ashore upon Wednesday, 2d of May, at midnight, about twelve miles south of Dublin, near the mountains of Wicklow. I was awake at the time, and felt the shock: I was instantly on deck: it rained hard, and so dark, we could not perceive an object at arm's length; but, in a few minutes, the stars appeared, and, to our horror, we saw the rock twice mast high. I gave up all for lost, but concealed my apprehensions, and seemed not concerned, that I might encourage those about me, whose condition is easier conceived than described; however, we got off next day, at eleven o'clock, a.m., in a miraculous manner, with the assistance of two officers, and two boat's crews, belonging to the revenue cutter on the coast, who came on board at day-light, armed to defend us from being plundered, not knowing our strength. We suffered no damage, but the loss of two anchors, which was cut away. We then steered our course, and, upon Saturday the 5th, we were overtaken by a storm, which lasted ten days, and the whole got sick: the storms were very fre-

* Montreal, 7th August, 1821.—William Purdie was with me here five weeks since, in good health, and stout. In going up the river, he had caught cold, which brought on inflammation, which terminated his existence in four days. I am sorry for his death, poor man, as he would probably have been of great use to the colony.—H. L.

[We have been informed, that he died at Prescot, while the emigrants were detained there, for want of waggons to take them over-land to the settlement.]

Ed.

quent, often twice a-week, as we had no fair wind. We arrived at Quebec, upon Saturday, 16th June, at four o'clock, afternoon, making a disagreeable passage of forty-eight days and ten hours. We had scarcely come to anchor, when a boat came alongside, to inform us, that a steam-vessel would be alongside, on Sunday morning, at six o'clock, to carry us to Montreal. I was ashore upon Sunday almost the whole of the day, at the governor's office. On Wednesday, we went from Montreal to Lachine: it rained incessantly, and every article of bedding was wet: the Commissary allowed us a day to dry our clothes, which was very acceptable, and, on Friday, at twelve o'clock, we proceeded up the river, in twenty-seven boats. A boat will carry three ordinary families, with their luggage: we were the first boat, and kept our station, with hard labour: we arrived at Prescot in seven days, and the Commerce's passengers arrived the same evening. Here we lay for sixteen days, for want of waggons to carry us up; and we were five days afterwards on the way: we might have gone in three days, but the roads are such, as you could not conceive. Ten cwt. is a waggon-load, and they were often lying in the mud. There are a great number of people lodging here, in temporary huts. There is a great deal of trouble, and a number of deaths, owing to the heat of the weather, and change of food *. We are all in good health, except little James. My health is better than it has been for some years past: I laid off my flannels at sea, and felt no inconvenience: I have had no rheumatism since. I have got settled on my land, in Sherbrook township, 2d Concession, No. 14, about fourteen miles from Lanark, to the south-west; but we intend to proceed, by water, to the middle of the settlement, where there are about thirty of us, who have agreed to help each other. We have built two boats, and cleared the river of trees, for the purpose; and the boats went up yesterday, and I intend to set out to-morrow, with part of my luggage. I can say very little of the country: the weather is fine, and the crops look well; but the people are generally poor, because they are lazy. An independent farmer in America, is quite a different thing to what he is in Scotland:

* Some of the causes of the sickness, is ascribed to drinking spirits to excess; and, from the emigrants being heated, they have recourse to the drinking of water, in improper quantities, which brings on the flux, and frequently fevers. In warm weather, they ought to be extremely careful of themselves, if they value the happiness of their families, and their future comfort. The sickness has not been so mortal as has been reported, and mostly confined to children.—*Ed.*

offer him money, and he will sell you any article, even to his oxen and waggons. I have seen James Lindsay, and all his family are in good health: he will do well, although a number of the last year's settlers are in a poor state. J. Colquhoun, and W. Peacock, I have not seen, but they are both doing well. My acquaintances have all gone to Ramsay township, so we are about twenty miles separate. I can give no advice as to coming here, until I see better about me: the want of roads is the greatest evil. Flour here is 7 dollars per barrel, 5 at Perth, and $3\frac{1}{2}$ at Prescot; 3 dollars at Kingston, but the carriage makes up the difference. As the farmer sells all his wheat or flour at the fall of the season, it is at present in the hands of the merchants: we expect it will be lower in the fall of the year, when the sledges are going on the snow. Every article is double price. An axe of 5 lb. weight, costs eleven or twelve shillings: our axes, they say, is for no use, the temper will not stand. I bought good tobacco, at one shilling per lb.; it is two shillings here: good whisky, at two shillings and twopence per gallon: rum, four shillings. Any person coming out, should lay in a good stock of necessaries, such as potatoes and porter: sea stores are of no use, during the sickness: we lost all our porter, which was a great loss. Another great evil is filling up ships with passengers, to the extent of their tonnage: they ought not to have above two-thirds. Although our accommodation was better than most of the ships, there was not a sufficient quantity of cooking utensils, which was the occasion of discord and bustle, from six in the morning to eight at night. We had six births on the passage, and no deaths but one, which was the effect of premature birth. There are a great number who have not got land yet, and they say, that they will not get it until another township is surveyed; and the evil is, in going so far into the woods at a late season, it will be impossible for them to get their heavy luggage with them, as they will have to carry every thing on their backs; even their provisions carrying is a great toil. I hope, through the blessing of God, if the first year was over, I will be very easy.

*From an Emigrant in Dalhousie Settlement, to an Acquaintance
in Kirkfield-Bank.—17th August, 1821.*

I could not write sooner, to satisfy myself, far less to satisfy either friends or acquaintances in Scotland: indeed, no man can do it at an early period after his arrival here. I was de-

terminated not to write before the end of October, but your letter presses for information, and I now give all I can, to keep sure of truth; and you will communicate the following to all my friends, and to every person who wishes for information, as it is the best of my knowledge and observations; and as William's letter and yours requires nearly the same answer, you and he must club for this time. Letters are very expensive to us, even in sending away, and they will be so to you also.

I am very sorry that your attempts to come over this season, has proved abortive; but you know, chance may spoil a single aim, but perseverance must be sure.

My answer to your queries are—1st, I think the soil is good in general, and deep; but mark, many imagine, that what is meant by good soil, is, that it is deep, dark, and rich, whereas the opposite is the case: it is indeed deep, often about two feet, without change: I cannot think it very strong, except a few inches on the top; but the same work, and very little manure, will make and keep it equal to the best land in your neighbourhood, after the roots are got out. Some have mentioned three years, for getting out the most of the roots; others five years; but I will give the large ones ten years: a plough will go amongst them long before that time.

2d and 3d Queries.—The brushwood is in some places very thick, and other places not so thick. The cutting of the large wood is very laborious; rolling it together for burning is more so; and sowing and planting amongst the roots, is very heavy and pushing work, for the first two or three years.

4th Query.—I do not think all these should terrify a willing, healthy family or individual.

5th Query.—I think there is a great proportion of the land well watered, although my own is rather scarce, on the one side.

6th Query.—I had nothing done in the way of clearing, before the 1st of January, 1821, and, by the 1st of April, I had (with my own family) cut down five acres, besides making upwards of 100 lbs. very good sugar: if I had had a larger pot for boiling, we would have made four times as much. We have cleared off the whole five acres, and planted and sown upwards of four acres, nearly as follows: $1\frac{1}{2}$ Indian corn; better than $1\frac{1}{2}$ potatoes; $\frac{1}{2}$ wheat and rye; the rest in pease, beans, turnips, &c. In the garden, greens, cucumbers, melons, cabbage, and other small seeds; but the small seeds are not doing so well, in general: I must have in with the spade for them, and then they are sure of doing well.

7th Query.—If you come here, the greatest dependence will be on the youngest branches of the family. If you are healthy, you will be very useful; but youth and strength are best for the first onset. To my —, say, that there would be little dependence on himself; but his family should do very well, if willing and hearty in the cause. J—'s family would do better here than at the loom, if willing.

8th Query.—The winter set in middle of December, and the snow was mostly off the ground by the middle of April. For about ten days, at different times, the weather was severer than I ever saw it in Scotland; but the air is so dry, that we can take a shirt off the bush, put it on, and feel no damp. The summer is very warm: mosquitoes, and other flies, are very troublesome.

Our crops are looking well. I will cut my wheat and rye in about a fortnight: it was sown the 24th of May. I would not come back, although you would pay my passage, and set me on my feet in Scotland, unless I had my land along with me. We are all well. A. N. is settled on 1st Concession of Dalhousie. Great numbers of the new settlers have the flux: there are some deaths, but I think the place healthy, on the whole.

From William Gourley.—Lanark, January 28th, 1821.

We are getting over the winter easier than we expected: we have not that fretful anxiety of mind how to get through, as we had in the old country. We have no landlords nor tax-gatherers here. Every Briton, on making application for land, receives it, with the necessary implements, whether sent out by Government or not; and tradesmen are entitled to a town lot of one acre, besides the hundred acres. We still get implements by degrees. I have got an axe, spade, hammer, pick-axe, auger, frying-pan, camp-kettle, and three blankets. I have also laid in my seed potatoes: it takes eight or nine bushels to an acre, and three and a half quarts Indian corn: the same quantity of oats, and three quarts of wheat. Potatoes are half a dollar a bushel; oats, 3s. 6d.; wheat, from 5s. to 7s. The weather is pretty sharp, but the air is clear and dry: the snow is not above one foot on the ground. It has never been so cold, but a man might work out all day, only a little in the mornings: it is not so cold as it was in Scotland last winter: the old settlers tell us, it is as cold as ever it has been since they came out. I have got three acres under-

brushed, and one chopped: now is the time to be employed, that we may get our crops in the ground by the spring. We are all getting quite comfortable to what we were. All who hold land, and have been in possession of it for three years, are entitled to the deeds, and have a vote for a member, which is every four years: the election was at Perth in May last. There are a great number of new townships, the names of which I have omitted at present; however, Lanark is the best settled, and we expect, in a short time, that it will be a flourishing place. I am very uneasy to know how all the poor people with you have got through the winter. I wish that many of them were here, for they would be able to make themselves comfortable in a short time. Let our friends know, that they would do well by taking land: come out yourselves; also, if it be possible, bring Janet and Mary, for they could get service quite fast: servants are very much wanted, and get from three to five dollars a-month. Get into some Societies, for it would take more to bring you up, than to bring you over: you shall not be so badly off as we were, for a house to put your head in. Bring pots and pans, and a pot to bake loaves in, wearing apparel, needles and pins, and worsted. Needles are 7d. a quarter of a hundred, and every thing of that nature is equally dear.

~~~~~

*From the Same.—January 28th, 1821.*

There is one very great want that we labour under, and that is, the want of the means of grace; but I trust the Lord, in his infinite goodness, will open up a way in this respect. I have only heard one sermon since I left you; however, I trust much good will be done in this place, by the hand of the Lord, as it has every appearance to be flourishing in other respects. The sermon was preached by the Rev. Mr. Bell, of the Presbyterian church at Perth. Some of the friends of religion were cutting down wood for a church and school-house, last Monday; and some more are going to-morrow, to help to build a log-house for that purpose.

*1821, May 7th.*—I have wrote two letters, some time ago, and the person who carries this will have them \*. We have

received all the instalments promised by Government, with all the implements. We got the winter more favourably by than we expected, and it was not so severe as it was represented: the weather is pretty warm at present. I have got about four acres chopped, and we are to burn it off immediately. I have bought all my seed, and a heifer two years old, with her young calf, she cost me eighteen dollars; and two young oxen, one year old, cost seventeen dollars: they will be able to work a little next year.

~~~~~

From A. Boag, to his Sister.—Lanark, Upper Canada,
24th August, 1821.

My father and I are settled on the 11th lot of the 6th Concession of Lanark township: he is on the front, and I am on the rear: it was a 200 acre lot. The land is pretty good: we have cleared together, and have seven to eight acres in crop: we will have between five to six hundred bushels of potatoes. I intend to clear on my lot this winter. I never was so happy in my life. We have no desire to return to Glasgow to stop there, for we would have to pay a heavy rent, and here we have none: in Glasgow, I had to labour sixteen or eighteen hours a-day, and could only earn about six or seven shillings a-week,—here, I can, by labouring about half that time, earn more than I need: there, I was confined to a damp shop,—but here, I enjoy fresh air: there, after I had toiled until I could toil no more, I would have the mortification of being a burden,—but here, two or three years' labour will give me more than will keep me in sickness, as well as in health: there, it is all dependence,—here, it is a fair prospect of independ-

fault must rest with themselves. Economy, patience, temperance, with steady perseverance, is the best foundation for success. The school is built in Lanark, and the Rev. Mr. Bell will occasionally go to preach, and baptize the young children. There are five stores, and about fifty houses in the town. A grist and sawmill have been built. There is a fall on the Clyde, about seven miles higher up the country, of about forty feet; and a mill will be built before the harvest. Some of the people have employed men to cut down the heavy timber, after the underbrush has been cleared; expense, six dollars or eight dollars, if the brushwood has not been cut: the expense to clear an acre, and fence it from the natural state, ready for the seed, is twenty dollars. Fresh butcher-meat was to be had every week: mutton, $5\frac{1}{2}$ d.; beef, 4d. a lb. English: the sheep and oxen were drove up, and killed in the settlements. The instalments were paid in paper currency: notes, from one to fifty dollars; small change is plenty. The most of the ground will be sown with oats, and planted with potatoes; and wheat, in the fall of the year. Every farm, except the outside ones, forms a square: the outside farms contain five acres on the line, and twenty back.—*Ed.*

ence. Now, dear sister, if I had to come here again, I would come readier than before.

*From a Scottish Emigrant.—Kirkmanhill, Lanark,
5th May, 1821.*

We have got all our land, and are situated in the new formed townships of Lanark and Dalhousie, distant from Perth, at the nearest point, ten miles, and my own lot is seventeen miles, the village of Lanark thirteen miles. From Quebec to Perth, the country is a level: with us there is much hill and dale, mixed with rock and swamp, and an abundance of running streams, lakes, and springs of excellent water. Some lands excellent, others poor; but every man who draws a lot, satisfies himself as to quality, situation, &c. The weather rarely prevents us from working. I am very well pleased to handle the axe, instead of the shuttle, and would not, for a good deal, give up my present for my past employment. I have to struggle here for a year or two; I had to do so always at home. My mind here is seldom relieved with news, and no politics; but it is as seldom pained with disagreeable news. I am relieved from taxation, rent, and crushing ill-paid work: at same time, owing to the peculiar situation we are placed in as new settlers, we are for a time deprived of the instructive discourse from the pulpit, and social intercourse with intelligent friends, which we formerly enjoyed; but we hope soon to get round in this respect. People who have been settled for ten years or more, are in a snug and comfortable situation, more so than work-people at home can ever expect to reach. The land in York district is said to be richer, and the climate warmer, but not so healthy as this. So far as I see, or can learn from settlers around Perth, I consider this place more healthy than the old country. In general, members of Societies, whose families amount to five or more, have got cows, the prices of which run from fifteen to twenty-eight dollars. A man coming to this country, without means, will have his difficulties; but, with perseverance, will succeed, in a very few years, particularly shoemakers, tailors, wrights, smiths, &c.

From an Emigrant (brought over by his Brother, who has come for his Wife and Family).—New Lanark, July 6th, 1821.

I write you a few lines, to let you know how we are coming on with regard to our crops. We have planted one acre of

Indian corn, and two acres of potatoes. We put in the last of our seed on the 1st day of July, and we expect to be raising them about the latter end of August. Archibald, and my mother, and us, stop together, and my sister Janet is out at service, and is doing well. She is getting four dollars a-month, and she has bought a cow, and sent it up to us, and we are in the way of doing well. We have got the most of our hardships over. We know, that we will not have to carry our provisions this winter, as we had to do the last, which will make us a great deal easier. We live all very happy together. We are very anxious to know if your trade be doing well with you, or how you are coming on. We wish to know if you have any wish to be here, for we think, as you have a large family, you would do well. My brother, when he comes to see you, he can give you any particular word you wish to know about this country.

*From John Toshach, to Alexander Sinclair, Wright, Calton,
 Glasgow.—Lanark, September 11th, 1821.*

I gladly embrace this opportunity of writing you, by Mrs. Graham, who has lost her husband, and is returning to Scotland. Our family are all well now; by the mercies of God, they are recovered: we had four of them in the fever since we came here, Margaret, Andrew, Helen, and Eneas. Many have died since arriving in Canada; some, of the fever, others of the flux, and others from the effects of fatigue. We have got land in the township of Ramsay, near the Mississippi river, which runs into the Ottawa, about fifteen miles from our land: we are only half a mile from it. There are always plenty of good fish to be got in it, but especially in spring, when I am informed they are caught in very great abundance. William, John, and James Bennie, and I, have got each 100 acres together, in a square. It is most beautiful land, and resembles Dalmarnock haughs; and, according to what I have seen on other land, it will produce abundantly of all which is necessary for the support of a family; but the land is by no means generally good. There is much rock and swamp, in many lots: indeed, I would not exchange the land that we have got, for any other I see; but it is at a great distance from this, about twenty miles by land, and near forty by water: had it not been for the water conveyance, we could not have attempted to go so far. We have built two flat boats, of fir

boards, at one inch thick, which we got from the saw-mill, at 3s. 6d. per hundred feet. I have got up a house, twenty-two feet by sixteen, which will do to begin with. Our land abounds with beautiful wood, of elm, maple, birch, beech, pine, and bass: the latter is somewhat like your saugh. I often think, if you had a few scores of the trees that we cut down to burn, you would turn them to better account. I hope to have all my luggage and family on the land, in about ten days; you will say, why not sooner? but it would require a long recital to satisfy that inquiry. Suffice it to say, I am equal to any who came out with me. Government has been very honourable. Besides conveyance from Quebec to Lanark, and rations, (the rations consist of one lb. of bread, and one of pork, for a man, one-half each for a wife, one-third for a child above seven, and one-fourth for those under,) I have got one blanket for myself, one for my wife, and one for every two children, and one for the odd one; also, an axe, a hand-saw, a bill-hook, an iron wedge, two pair hinges, a thumb-sneck, two files, a stock-lock, two gimlets, a pick-axe, a hammer, a scythe and stone; and among us four, we have got a pit and cross-cut saw, and we will get a grindstone, when we want it: there are also nails, and other things, still to be got. The gentlemen here, and all the way from Quebec, who had the charge of forwarding us, seemed to vie with each other in discretion and kindness. This is the most merciful action that ever I knew the British Government perform: it affords many poor industrious families the means of obtaining the necessaries of life, who had no such prospect before. You will observe, I am writing only from information and observation: it will require twelve months to come, to enable me to write from experience.

I think the emigration is likely to be carried on at least another year. There are three townships to be surveyed, beyond Dalhousie, Lanark, and Ramsay, near the grand river. I will, if spared, write you more particularly afterwards, and hope to give you more information. Give my love to all your family, and all inquiring friends.

EXTRACTS

*From Facts and Observations respecting Canada, by
Charles F. Grece.—London, 1819.*

The quantity of land in Canada, yet in a state of forest, is capable of containing and supporting some millions of souls. Its quality is equal, if not superior, to any in the Eastern States, and its price far below that of the Western Territory.

The land is in general covered with timber, the greater part of the trees being from two to three feet in diameter. The larger the timber, the better the soil, therefore the choice of land is directed by the growth of timber on it. Where beech, maple, hickory, butter-nut, and chesnut grow, it is a sure sign of a good soil; it is either yellow or hazel loam. Where elm, white ash, white oak, butter-nut, and red oak grow, the soil is strong. Where white pine, hemlock pine, birch, and spruce grow, the soil is sandy. Cedar swamps, though often composed of good soil, are not desirable, unless easy to drain. Black ash, soft maple, or plane swamps, are mostly on a clay or marl; if easy to drain, they make very lasting meadows. Where there are small poplar, and small white birch, the soil is poor, being light loam, on white clay. A spot being chosen for a settlement, a place is selected near to a constant and certain supply of good water, to build a log-house; trees are cut about eighteen inches in diameter, to build it; if a saw-mill be near, where boards may be had to cover it, that is done; if not, the bark of ash becomes a substitute for boards. It is not desirable to lay out money at first to build a fine house, because, when the land becomes unencumbered from trees, it often happens, that a more advantageous spot is discovered to build upon. Large cellars are made under the house, for the deposite of vegetables, and other articles susceptible of injury from frost. Log-stables and a barn ought to be erected, and care taken to make them shelter the cattle from the north and north-west winds, which are the coldest in that country. The clearing can be done by the acre. As Europeans are not acquainted with this species of labour, it would be best, in the first instance, to let it out by the job to the woodsmen, who are very expert in clearing. It requires some time and experience to become acquainted with the method of

clearing new land. The work is begun, by cutting the small trees, or under-growth; then the large ones are chopped, about three feet from the ground. The method is to cut them on the side they lean to, which is always observed before they begin the work. The incision is continued, until it passes two-thirds of the tree; then on the opposite part, when it falls. Many of these trees are from fifty to eighty feet, without a branch. When on the ground, the branches are cut off, and thrown in heaps; then the body of the tree is cut into lengths of twelve feet. Thus the work is continued over the piece under operation. When done, an immense heap of trunks and branches is scattered all over the land. It lies in that state for a month or two, and, when dry enough to burn, fire is put to it, and people attend to throw the branches and small wood into the fire, that it may all be burned. The fire having passed over every part of the land, it is a favourable sign for the future expectation of the farmer, as it kills all the under-growth. The trunks of the trees being thick, are not all consumed, and oxen are employed to draw them to a place, where they are piled up and burned by themselves. The ashes are collected, and converted into pot or pearl ash, or sold to the manufacturers of these articles. If any of the logs are fit to make fences of, they are selected for that purpose; if not, other wood is got to fence the field, to secure it from the inroads of cattle. In a few days, the earth will be in a state to receive the grain, which is harrowed in, with a triangular harrow, among the stumps of the fallen trees, which remain in the ground for fifteen or twenty years, before they decay, according to the species of the timber. But although they appear to be, and are, impediments to the plough, they are not of much consequence to people who are acquainted with the American hog, or, as some call it, the Dutch plough, which implement performs very well on lands incumbered with stumps or stones. This plough is used in all new settlements. The best practice, is to lay the land down in grass with the first sowing, which grass will last six or seven years.

The culture of Indian corn is managed with a hand-hoe, by earthing up the plants as they grow. The potato crops are managed as follow:—Four or five sets are laid on the ground, about four feet distant from each other: the earth is then drawn over them, forming a heap about the size of a bushel measure. Nothing farther is done to them, until they are ready to take up in the autumn, which is performed with the American hand-hoe. The highways are kept up by each

farmer, as far as his premises extend, that being the only statute-duty the farmers are subject to.

The scarcity of hands, and high price of labour, have hitherto prevented the farmers from getting the trees up by the roots; nor does it appear that it can be done to advantage for many years to come, except on spots intended for gardens or orchards. The latter improvement is but too much neglected in the new countries.

The soils most congenial for orchards, are light loams or gravel. Apple trees thrive very much on rocky or lime-stone land.

Emigrants intending to proceed to Upper Canada, take their departure from Montreal to La Chine, a distance of 9 miles: from thence they go to Prescott in boats, 111 miles: from thence there is a steam-boat to Kingston, where there are other steam-boats proceeding to York, the capital and seat of government for the Upper Province. After landing passengers, the boat proceeds to Queenstown, on the Niagara frontier. Between Queenstown and lake Erie, there is a portage of 18 miles. The total expense from Montreal, is generally considered to amount to about 5*l.* each person.

Government has, sometimes, been led to hold out considerable inducements to settlers, in grants of lands, &c. How far this practice is continued at present, may be known, by an application to the office of His Majesty's Secretary of State for the Colonies, in London; to whom, if I might be permitted, I would recommend, that orders should be issued to the provincial government, to prevent unnecessary delays to the emigrant; but that, immediately on his application for unappropriated lands, they may be granted, according to his own selection; and, besides, that the one-seventh part of a township, now reserved for the future provision and maintenance of a Protestant clergy, and the like reservation for the benefit of the crown, be differently arranged, as the present mode of distribution is found to be productive of great inconvenience to the settlers.

With regard to these suggestions, most respectfully recommended to the Secretary for Colonies, it may be sufficient to call to the recollection of persons in office, that delay and suspense consume the limited resources in cash, which every emigrant must possess; and that, when once persons have formed a resolution to leave their country, and have made up their minds as to the place of their destination, the least delay, arising from any appearance of neglect in those who have

raised expectations of assistance in so momentous an enterprise, has a tendency to excite suspicion, fear, and distrust. A whole year may be very unthinkingly lost, under such circumstances, because the labours of the farmer must depend on the season. Many, in consequence of delays of this kind, have been tempted to emigrate to the United States, who might otherwise have been induced to settle in our own Colonies.

Instructions to Strangers Settling in the Woods or Forests.

It will sometimes happen, that people lose themselves in the woods. Cloudy weather operates to deceive, but the sun will always direct, by observing its rising and setting from the dwelling-place, which Europeans ought strictly to attend to, on their first beginning in the forest. Swamps are the most difficult, from the thickness of the green timber: in such a case, let the person avoid flurrying himself, because fear agitates the mind, and leads to frenzy. If fatigued, sit down and examine the trees: the north side of large trees is covered with moss: the branches are longest on the south and south-east sides: these will serve as a compass. Birch trees are the compass for the Indians, their strongest branches pointing eastward. Should you come to a river or brook, its course will lead to some settlement. The brooks, many of which are little rivers in the spring at the melting of the snow, become dry in summer; but their course may be discovered, by observing the way that the growth of wild herbs, grass, and roots of trees, lie; their heads will point to the outlet of such waters: the stones will be cleaner on the side next the source, than that next the outlet. These observations are easier understood than heights, falls, &c. &c. Sometimes cattle are met with, miles from home: by starting them, they run from a stranger, and generally go home: that will lead the lost person to a settlement. There being little to fear from wild beasts, food is a primary object. As berries are not always to be had, any more than nuts, herbs become a consideration. The colts-foot, called by the Americans, snake-root, has a leaf formed like the foot of a colt: it is of a deep green colour; the roots run horizontally, and are of the thickness of a tobacco-pipe: they taste like lemon peel. By gathering of that root to eat, a person might exist for some time. This plant produces many lateral roots: it is in greater abundance than most other herbs; it delights in moist situations, and is easy to discover. It is taken as tea, to remove violent colds, when a little sweetened.

CONCLUSION.

In the preceding pages, is detailed the organization of a System of Emigration, which has been carried into effect, and in which the expense of embarking a considerable body of persons, has been reduced to nearly one-half of what it cost those emigrants who went out singly, in the spring of 1820, and which embraces within its range, many facilities in favour of the poor emigrant, which had been formerly overlooked.

The salutary work of emigration, has not as yet been accomplished to that extent which is absolutely necessary for the relief of the industrious poor, within the Counties of Lanark and Renfrew, and which also may be requisite in other districts, where the population has increased, within the last ten years, in a ratio far beyond the increase of the means of profitable employment for the industrious poor.

It is a well-known fact, that many families have, of late years, been reduced to poverty, by a succession of losses and disappointments, arising from causes over which they had no control; and at present, numerous large families, who are employed, or partly employed, cannot jointly earn the price of scanty food, for their daily wants, leaving nothing for clothing, education, furniture, rent, and other necessaries.

They are therefore liable to be rendered dependant upon public or private benevolence, on almost every fluctuation in trade, or on the fall of the value of labour. Parents who have sons fit for labour, cannot employ them, neither can they find apprenticeships, where they might be bound, for five or seven years, to a master who would pay attention to their morals, and fit them for being good members of society. Masters, owing to the low state of wages, and the decline in their business, find it for their interest rather to employ journeymen, who can be dismissed at any time, when not wanted. In warehouses, offices, and counting-houses, a reduction of clerks, salesmen, porters, and other servants, has also taken place of late, and to find a situation, in any line, is at present scarcely possible. The number of juvenile delinquents to be found in the streets, committing depredations on society, in many cases, may be attributed to the distresses of parents, who are prevented from watching over their families as they would wish to do, by the necessity of working, for sixteen or eighteen hours, every lawful day, before they can earn a scanty subsistence for their offspring; and, when the Sabbath arrives,

the state of the family clothing is such, that they cannot appear at church, even if they could pay for seats.

Such was the situation of some of those emigrants, whose letters from Lanark, Dalhousie, &c. have now been given to the public. They have found, that their large families, which were a source of misery to them in this country, are a blessing to them in their new situations.

The average expense for 1883 men, women, and children, who sailed last spring from Greenock, was 2*l.* 18*s.* 3*d.* for each individual, and that sum included provisions and passage to Quebec, and left besides, sufficient provisions to serve the Societies to their place of settlement.

Much praise is due to the Government, for their aid and humanity to the emigrants, in having advanced money for their support, for the first year, and blankets, with implements of husbandry, &c. for the cultivation of their new farms. We would venture to state our humble opinion, that no method of relief is equal to emigration; for it not only removes the surplus labourers from large and populous districts, but puts them in a way to provide for themselves and their posterity; and it also betters the condition of those who remain at home.

As many families were divided last spring, on account of their inability to raise money sufficient for emigrating, but who may now have procured the necessary assistance, we cannot doubt, but Government will graciously afford them an opportunity of joining their friends, next spring.

To continue the same encouragement for a few years more, as has been done for the two past years, seems absolutely indispensable, to remove the existing difficulties amongst the distressed labouring poor, in the manufacturing districts of Scotland.

It seems, above all things, to be the direct interest of the wealthier classes, to make a serious effort to relieve their property from the permanent burden of maintaining a large number of poor, by systematically promoting the emigration of the very poorest class of labourers; and thus, by an advance of one or two year's purchase of the poor's rates, in every parish, those who receive help, and are able for work, might be transferred from a condition of hopeless dependance, and established in comfort and prosperity, and the landed interest be relieved, in a great measure, from a heavy tax.
