ADDRESS TO THE JANUARY EDITION, 1850.

IT is now more than ten years since the NEW NAVY LIST was published by the late Commander, CHARLES HAULTAIN, K.H., and its success, up to the present time, has amply justified the project of that gallant and lamented officer. The publication, in its altered form, having now entered upon its fourth year, it is due to the profession amongst which its support was looked for, to add, that the success has in no degree diminished. While admitting the above fact, therefore, the Editor and Publishers deem it right to return their thanks for the patronage so freely bestowed; and to express a hope that the improvements introduced into each succeeding number will continue to earn for it the support of those to whose interests the work is so peculiarly addressed.

The grand object sought to be achieved by the NEW NAVY LIST is the keeping before the world, in a condensed but intelligible shape, the more important points of service performed by each Officer, whatever may be his rank. It must be taken for granted that common routine services have fallen more or less to the lot of all; but to enter into their detail would be to defeat that part of the plan of the work which embraces condensation. It is not contemplated by the exclusion of such services to underrate them, but when it is considered that already nearly one-third of each book is occupied by notices of war or scientific performances, it will be obvious that more space could not be accorded without rendering it so bulky and expensive, as to defeat the proposed and more desirable end of extensive circulation.

It is no longer a doubtful point that the NEW NAVY LIST is considered an important vehicle for the services of Officers; but although every facility and encouragement has been held out for Officers to communicate their peculiar claims upon this score, there are many who have not availed themselves of the opportunities afforded. It is therefore again suggested to those who have not taken this step, that such communications are at all times acceptable and available if sent to the Editor, or Publishers, on, or before, the 20th June, and 20th December in each year.

ADDRESS TO THE EDITION,

Published in February, 1846.

THE importance of the NEW NAVY LIST and GENERAL RECORD OF SERVICES to all Officers of the Royal Navy and Royal Marines, has been seriously considered by the Proprietors and Editor of the present Number. In completing, at a great sacrifice of capital and labour, the extensive alterations, which will be observable at a glance, due regard has been paid to the relative services of all Officers, and the whole arrangement so changed, that its superiority in point of information will, it is hoped, render the NEW NAVY LIST a book of general circulation and reference.

Nothing can be further from the wish of the Proprietors than to detract from the merits of the late gallant Compiler, Commander HAULTAIN, whose labours and sacrifices were but ill compensated by the sale of the work ; but, in admitting deficiencies, of which a remedy has been aimed at, they must be in a great measure laid to the charge of the want of business resources with which he had to contend. In this respect there will now be nothing wanting ; and it is the full intention of the Proprietors to render the NEW NAVY LIST in every way worthy the full confidence and patronage of the Navy and Country at large.

The changes which have at present been effected may be here alluded to. The Services of all Officers have been separated from the mass, and brought to follow the Seniority Lists of the respective ranks as closely as possible. The object of this has been to facilitate references. The Services have been thoroughly revised and reprinted in double columns, and all expletive terms of commendation or otherwise struck out. Thus an Officer will no longer have to read the services of a brother Officer recounted in a more laboured strain than his own, which intrinsically, perhaps, were of greater merit than those so described. The propriety of this will, it is hoped, meet with general concurrence, and by thus removing superfluous type, an extended record of actual service is rendered easy. In a word, it is the wish to condense as much real service as possible into a small and intelligible compass, without giving undue consequence to any.

The NEW NAVY LIST will also, for the future, give by far the most complete record of the Services of that distinguished corps, the Royal Marines, in a condensed form, to be found in any publication. This new feature will, it is hoped, have the effect of making it a work essential and acceptable to all in any way connected with the Navy.

The List of the Navy has also undergone a thorough revision. Beneath the name of each Ship on the Effective List will be found the place and date of launching, the tonnage, and name of constructor or constructors—information not to be found in a complete shape in any other publication extant. The unserviceable and harbour service Ships have been removed to a separate list.

The exclusion of the “date of passing” column, heretofore given in the Seniority Lists of Captains, Commanders, and Lieutenants, demands some explanation. The extremely partial, and occasionally

inaccurate, way in which the information was given, rendered it particularly objectionable; and the evident disinclination on the part of Officers of long standing generally to communicate the information, added to the impracticability of procuring it from an official source, decided the point of removing the column entirely. If, however, at any future period, the dates of passing can be given in every case, it will be more valuable and far less invidious than it was previously.

But the most important new feature is that of the General Alphabetical Index of all Officers in the Royal Navy and Royal Marines, which has been compiled with great labour, and upon the accuracy of which the character of the work may be safely staked.

The Honorary Marks before the names of titled Officers will soon become familiar to the eye, and it is presumed they will be preferred to the letters heretofore used.

The Initial Letters at present refer only to the services of Officers in Lord Howe's great battle of the 1st June, 1794; Sir John Jervis's victory off Cape St. Vincent, 14th February, 1797; Admiral Duncan's defeat of the Dutch fleet off Camperdown, 11th Oct., 1797; Nelson's achievements at the Nile, 1st Aug., 1798; at Copenhagen, 2nd April, 1801; and at Trafalgar, 21st Oct., 1805; together with the expedition to Egypt, 1801; Sir Richard Strachan's action off Ferrol, 4th Nov., 1805; and the defeat of the French squadron off St. Domingo by Admiral Sir John Duckworth, 6th February, 1806. By this selection it is not meant to cast other services into the shade, and it will be a subject for consideration what other triumphs of the British Navy shall be equally distinguished. Those selected will, without doubt, ever rank foremost in the pages of Naval History; and as the Captains who participated in all (except that of Copenhagen) were honoured with gold medals, there was good reason for commencing with those brilliant victories. The Battle off Lissa; bombardment of Algiers; destruction of the Turkish fleet at Navarin; and the overthrow of St. Jean D'Acre, were each and all alike honourable to British prowess, and will also come under consideration for distinction.

Although thus much has been done, attempts at further improvement will not be wanting, and it will afford pleasure to the Proprietors and Editor to receive corrections or available additions to the services as they are now given. In particular, those services of a scientific character are here alluded to, which Officers are requested to furnish in order to render this peculiar province more complete.

It will, however, be obvious that the great expenses connected with the publication of a work like the *NEW NAVY LIST* cannot be persevered in without an increase to the number of Subscribers; and those whose wish it is to maintain a work of such value to all who have claims which require to be kept before those in authority, will, it is hoped, use their best endeavours to increase the sale. They will thereby also enable the Proprietors to publish the work at the lowest price which will afford a due return for the capital embarked, and the vigilance and labour which must be incessantly employed in the collection of new materials, and the preservation of accuracy.

PLAN OF RETIREMENT FOR CAPTAINS, AUGUST 31, 1846.

1st. The rank of retired Rear-Admiral to be given, by seniority, to such applicants from the 14s. 6d. half-pay list, as may be willing to accept it, with the pay of £1 5s. per day, and the corresponding pension to their widows, under the usual restrictions.

2d. An addition of 7s. 6d. per day to be given to applicants, by seniority, from the 12s. 6d. and 10s. 6d. half pay lists, being captains of not less than 20 years standing, and 55 years of age. Officers from both lists to be permitted to assume the title of Retired Rear-Admiral at the period when they would have obtained the Flag by seniority, had they remained upon the active list. Their widows to be entitled to a pension of £110 per year; and to the pension of Rear-Admiral's widow, when the rank of Retired Rear-Admiral has been attained.

3d. The vacancies upon the £1 list to be filled up, in turn of seniority, by officers now accepting the 18s. per day; but no new admissions to the £1 5s. list to be made until it is reduced below the number of 25, which it is not to exceed afterwards. The permanent retired list to be reduced to 100, by making one appointment for every two vacancies, the first 25 officers upon the list receiving £1 5s. per day, and the remaining 75 £1 per day, with

the right of assuming the rank of Retired Rear-Admiral, when entitled to it by seniority.

4th. The active list of Captains not permanently to exceed 500. A proportionate reduction to be made in the 14s. 6d. and 12s. 6d. half-pay lists; the first to consist of 70 Captains, and the latter of 100.

5th. Good service pensions to be retained by Captains, until they reach the rank of Rear-Admiral, or Retired Rear-Admiral.

6th. The promotions from the Captains' list to the Admirals' list in future to be continuous, reserving always the undoubted right of the Crown to select officers for promotion in the higher as well as the lower ranks, whenever the public interest requires such an exercise of the prerogative.

7th. The Admirals' list not permanently to exceed 150 in number, and to be thus distributed:—

30 Admirals, or 10 of each squadron;

45 Vice-Admirals, or 15 of each squadron;

And 75 Rear-Admirals, or 25 of each squadron.

8th. This plan to come into operation on the 1st of October of the present year, and all letters relating to it to be treated as strictly confidential.

By command of their Lordships,

H. G. WARD.

All Officers passing for the rank of Second Masters (or Officers from the Merchant Service who are candidates for the rank of Master, under the Queen's Regulations, Art. 6, chap. 3, page 24), shall be examined in seamanship, either at home or abroad, by one Captain or Commander, and three Masters; and after having received a certificate of having passed such examination, they shall undergo their examination in navigation, at the Royal Naval College (instead of the Trinity House), under the same Regulations, and at the same period as Midshipmen passing for Lieutenants; but the examination for pilotage is to be conducted at the Trinity House, under the rules and regulations at present in force, but subsequent to the above-mentioned examinations. Having completed the above examinations, they will be considered eligible for the rank of Master in the Royal Navy, provided they shall have served the time required by the Queen's Regulations.

The seniority of Second Masters (or of candidates for the rank of Masters) is in future to reckon from the date of their passing in seamanship for that rank, provided they shall subsequently pass in Navigation at the Royal Naval College on the first or second examination-day following, either of which days they are at liberty to select; or, in the event of an Officer having previously passed *abroad* in seamanship, he is at liberty, after his arrival in England, to select either the first or second examination-day at the Royal Naval College; or if belonging to a ship under orders to be paid off, on the

first or second examination-day after having been so paid off, when, if he shall succeed in passing, he will be allowed seniority from the date of his having passed abroad. But no Second Master (or candidate for the rank of Master) will be allowed such seniority who shall fail in passing the Royal Navy College at the first trial, or who shall not pass at the Trinity House within a month after his having passed in Navigation.

Officers appearing before the Trinity Board for the purpose of passing in pilotage, must be qualified to take charge as Pilot of any of Her Majesty's frigates for the coast and ports for which Masters have hitherto been examined; and when they shall have served three years, at least, in frigates or sloops, they may be further examined as to their qualifications to take charge of Line-of-battle ships; but in this examination it will be required that they pass for the largest description of first-rates. In the event of an Officer serving abroad as Acting Master of a Line-of-battle ship, the time so served may reckon as part of the aforesaid three years.

The class of ship of which Officers are capable of taking charge as Pilots will be stated in the certificate granted to them by the Trinity House.

All Officers desirous of being examined in pilotage at Trinity House, either for the rank of Second Master, or as to their qualifications to serve as Masters of frigates, or of Line-of-battle ships, should present themselves at the Admiralty, bringing with them a certificate of their birth, and also their original certificates for the entire period they have been employed in Her Majesty's service, or in merchant ships, in each of which certificates the word *sobriety* must be included. Similar certificates must be produced by Officers presenting themselves to pass in navigation at the Royal Naval College.

By command of their Lordships,

J. PARKER.

SUPERANNUATED MASTER.

MATES.

To qualify an Officer to become a Mate, he must have served the time and passed the Examination required to qualify him for a Lieutenantcy ; but whatever rank beyond that of Midshipman he may obtain abroad, previous to passing such Examination at the Naval College as may from time to time be required, will depend for confirmation on his passing the said Examination within such period after his return to England as shall be directed from time to time by the Admiralty.

No Mate shall be allowed Half-Pay without having been previously surveyed and reported unfit by the Director-General, or the Officers of one of the Naval Hospitals at home. The Medical Officers are therefore to report particularly in each case the probable period at which the Invalid may be again fit for employment; and at the expiration of such period the Mate is to report himself to their Lordships, in order that, if he should state himself to be still unable to serve, proper measures may be taken to ascertain his continued unfitness; after which, should he be declared fit for employment and still withhold his services, his Half-Pay is to be resiped.

Mates who may apply for the retiring pension of two shillings and sixpence a day after twenty years' actual service, will not be re-admitted after having accepted such Pension. The names of all Mates who remain out of the Service for more than one year, without applying for an Appointment, will be removed from the official Register of Mates and Midshipmen, and be considered as having relinquished the Naval Service ; unless the omission proceeded from unavoidable causes.

All Midshipmen who shall have passed such Examination respecting their Qualifications for the appointment of Lieutenant as the Lords Commissioners of the Admiralty may from time to time direct (if abroad, for Seamanship and Navigation, and if at home also at the Royal Naval College), shall be considered eligible to have Commissions as Mates in whatever Ship they may be serving; such Commission will be given by the Lords Commissioners of the Admiralty, upon the recommendation of the Commanding Officer of the Ship in which the person may be serving, transmitted by the Commander-in-Chief or Senior Officer on the Station.

Commanders-in-Chief on Foreign Stations may give Acting Commissions as Mates to such Midshipmen as may pass abroad for Seamanship and Navigation, which Commissions will be confirmed from their original dates if approved by their Lordships, provided they pass their examination at the Royal Naval College in two months after their arrival in England; but no person appointed to act as Mate or as Lieutenant is to be sent home from a Foreign Station for the purpose of passing such examination.

To qualify a gentleman for an appointment as Midshipman, he must have served in Her Majesty's Navy two complete years as a Cadet, or three complete years in any other capacity; and shall pass such Examination as may from time to time be ordered by the Admiralty, and shall be full fourteen years of age.

A Naval Cadet, before his admission into the Navy, shall undergo such Examination as the Admiralty may from time to time direct.

Naval Cadets must not be under twelve years. They must be in good health, fit for Service, and able to write English from dictation, and must be acquainted with the four first Rules of Arithmetic, Reduction, and the Rule of Three.

(Mates on the half-pay of Half-a-crown a-day are in *italics*).

NAVAL INSTRUCTORS.

REGULATIONS ESTABLISHED BY ORDER IN COUNCIL OF THE 22nd DEC. 1836,
10th AUGUST, 1840, AND 11th MARCH, 1842.

Naval Instructors and Schoolmasters are hereafter to be designated "Naval Instructors," and Chaplains on being appointed to act as Naval Instructors are to be designated "Chaplains and Naval Instructors."—No person will be considered eligible for an appointment as Naval Instructor who is under 20 years of age or more than 35.—Every Candidate will be required to produce a certificate of his age, and testimonials of good character; and both laymen and clergymen when appointed to act as Naval Instructors must pass an examination as to their qualifications to instruct the young Officers in the following branches:—1st. Common Arithmetic, including Vulgar and Decimal Fractions.—2nd. The first six, and the eleventh books of Euclid.—3rd. Algebra, progressing to the highest order of equations, and its application to the solution of Geometrical Problems.—4th. Plane and Spherical Trigonometry, theoretical and practical.—5th. Nautical Astronomy, particularly the principles on which the various rules for finding the latitude and longitude are founded.—6th. Mechanics.—7th. Hydrostatics.—8th. A competent knowledge of the Classics.

The final examination of Candidates for Naval Instructorships will comprise:—1st. The usual College passing examination in Navigation.—2nd. The application of the theory of Projectiles to Gunnery.—3rd. Observations with the Sextant, &c. The use of the Azimuth Compass and Chronometer, &c. Perfect proficiency will be expected in observing: 250 numbers will be required to pass a Candidate in the College paper, and 55 is to be the minimum number for observations.

Although the knowledge of French, as well as of other modern languages, and of the principles of drawing, is not considered as indispensable, it is very desirable that Naval Instructors should be able to give instruction in these branches of education; and preference will always be given to such as possess these attainments.

Naval Instructors will be allowed, in addition to their pay, £5 a-year to be charged on the ship's books against, and to be deducted from, the pay of every young gentleman receiving instruction.

Naval Instructors who shall retire from employment without the sanction of the Admiralty, or who shall refuse or avoid service, if found capable of serving, shall not be allowed to receive half pay; and will be removed from the list of Naval Instructors.

Chaplains acting as Naval Instructors will be allowed £5 a year to be deducted from the pay of every young gentleman instructed by them, in addition to their pay as Chaplains and to three-fourths of the amount of the Full Pay of Naval Instructors, according to the length of their service as such.

Naval Instructors are in all respects Ward Room Officers.

MEDICAL OFFICERS OF THE NAVY.

To be eligible for a Commission as Medical Inspector or Deputy Medical Inspector of Hospitals and Fleets, a Surgeon must have served four years in Her Majesty's Navy as Surgeon on board a Commissioned Ship.

To qualify an Officer to receive a Commission as Surgeon, he must have been three years employed as an Assistant Surgeon, one year of which, at least, must be on board a Commissioned Ship, and the other two may be served in one of Her Majesty's Naval Hospitals; and he shall pass such Examination as the Admiralty may from time to time direct; but no Surgeon or Assistant Surgeon, who shall retire from his employment without the sanction of the Admiralty, or who shall refuse or avoid service, if found capable of serving, shall be allowed to receive half-pay; and his name in such case will be removed from the list of Officers of the Royal Navy.

An Assistant-Surgeon shall produce proof of his having served the usual and required Apprenticeship, and shall pass such Examination as the Admiralty may from time to time direct; but no Candidate shall be examined before he shall have attained the age of 20 years, nor after the age of 24.

Sir Gilbert Blane, Bart., with the concurrence of the Lords Commissioners of the Admiralty, for the encouragement of Naval Medical Science, and excitement of an emulation that may conduce to the interests of an important branch of the public service, established a Fund in perpetuity, for the purpose of providing the means of conferring a *gold medal*, once in every two years, on such two Medical Officers, whether *Surgeons* or *Assistant-Surgeons acting as Surgeons*, as shall produce the most approved journals of their practice, whilst actually serving in Her Majesty's Ships.

OFFICERS AUTHORISED TO WEAR FOREIGN ORDERS.

Rules relative to Foreign Orders from Foreign Sovereigns.

1st. No British Subject shall accept a Foreign Order, or wear its Insignia, without having previously obtained a Warrant under the Royal Sign Manual (directed to the Earl Marshal of England), granting them Her Majesty's permission to accept and wear the same.

2nd. To obtain such permission, the intention of the Foreign Sovereign to decorate a British subject with the Insignia of such Order is to be notified to Her Majesty's Principal Secretary of State for Foreign Affairs, either through the Queen's Minister abroad, or through the accredited Minister of the Foreign Sovereign resident at London. And if the application be in favour of a Naval Officer, the Principal Secretary of State for Foreign Affairs will communicate with the First Lord of the Admiralty to the same effect, previous to Her Majesty's pleasure being taken thereon.

3rd. When Her Majesty's Principal Secretary of State for Foreign Affairs shall have taken Her Majesty's pleasure, and obtained Her consent upon the occasion, he shall then signify the same to Her Majesty's Principal Secretary of State for the Home Department, in order that the usual Warrant may be prepared for the Royal Sign Manual, and such other steps be taken as may be necessary for carrying Her Majesty's pleasure into effect accordingly.

4th. When the Warrant is signed by the Queen, it shall be announced in the Gazette in the usual manner, and registered in Her Majesty's College of Arms.

5th. No subject of Her Majesty can be allowed to accept the Insignia of a Foreign Order from any Sovereign of a Foreign State, except they shall be so conferred in consequence of active and distinguished services before the enemy, either at sea or in the field, or unless he shall have been actually employed in the service of such Foreign Sovereign.

6th. Her Majesty's license and permission doth not authorise, and shall not be deemed or construed to authorise, the assumption of any style, appellation, rank, precedence, or privilege appertaining unto a Knight Bachelor of these Realms.

Her Majesty has been pleased further to direct,—

7th. That if the Service for which it is proposed to confer the Order has been performed during War, the Notification required by the 2nd Regulation must be made not later than two years after the exchange of the Ratifications of a Treaty of Peace.

If the Service has been performed in time of Peace, the Notification must be made within two years of the date of such Service.

8th. When a British Subject has received the Royal permission to accept a Foreign Order, he will at any future time be allowed to accept the Declaration of a higher Class of the same Order, to which he may have become eligible by increase of rank in the Foreign Service, or in the Service of his own country; or any other distinctive mark of honour strictly consequent upon the acceptance of the original Order, and common to every person upon whom such Order is conferred

ABERDEEN.

Foreign Office, August 22, 1843.

The Queen has made known her pleasure,—

9th. That the 8th Clause of the Regulations respecting Foreign Orders shall not be taken to apply to Decorations of the Guelphic Order which were bestowed on British Subjects by her predecessors, their Majesties King George IV., and King William IV., on whose heads the Crowns of Great Britain and Hanover were united.

Decorations so bestowed cannot properly be considered as rewards granted by a Foreign Sovereign for services rendered according to the purport of the 5th Clause of the Regulations. They must be rather considered as personal favours bestowed on British Subjects by British Sovereigns, and as having no reference to services rendered to the Foreign Crown of Hanover.

ABERDEEN.

NAVAL MEDALS.

Admiralty, 7th June, 1848.

The Lords Commissioners of the Admiralty having referred to a Committee of Flag Officers the consideration of the naval actions for which medals should be granted, in accordance with the spirit of the Queen's most gracious intentions, as signified in the *Gazette* of the 4th June, 1847; and Her Majesty having been pleased to approve of several of the suggestions submitted by the said Committee, the following notice is issued for the information and guidance of those who may have claims to this honourable distinction:—

1st. The rule, directed by Her Majesty to be observed in extending this mark of Her royal favour, is so comprehensive, as to bring within its scope all Officers, seamen, and marines (and soldiers who served as marines) who were present in any action which at the time received the special approbation of the Lords Commissioners of the Admiralty.

2nd. From the commencement of the war in 1793, it was the practice of the Board of Admiralty to notice battles of conspicuous merit by the promotion of the First Lieutenant of the ship or ships, or the promotion of the Commander, if the action was fought by a small vessel; and, conformably with this practice, it is Her Majesty's pleasure, that persons of every rank, who were present in such actions, during the wars commencing in 1793, and ending in 1815, and now living, shall receive a medal commemorative of their meritorious services; and they are required forthwith to state their claims for each action in which they may have been engaged, according to the form (A) hereunto annexed, and transmit the same to the Secretary of the Committee of Flag Officers, Admiralty, London.

3rd. Her Majesty has also been pleased to take into Her gracious consideration the many instances of gallantry displayed by Officers, seamen, and marines in boat actions during the same period, and to direct that such services, if distinguished by the promotion of the Officer conducting the enterprise, shall entitle those who were present, and now living, to a medal; provided the answers, to be given in the form (B), shall enable the Committee to ascertain that the claim is well founded. But the Officers, seamen, and marines of the ships, from which the boats were detached, are not to participate in a distinction which only properly belongs to those personally engaged.

4th. It is also ordered, that service in the frigates and smaller vessels, which were actually present in any of the great fleet actions mentioned in the *Gazette* of the 4th June, 1847, for which the Captains of the ships of the line received medals, shall entitle those now surviving of the crews of such vessels to a medal.

And all surviving Officers, seamen, and marines, belonging to ships actually co-operating and present during the siege and capture of Martinique in 1809, Guadaloupe in 1810, Java in 1811, St. Sebastian in 1813, for which the Army had medals, will be entitled to a similar distinction, if their return, according to form (A), shall enable the Committee to trace the presence and co-operation of the ships to which the applicants belonged.

And 5th. Her Majesty, having taken into Her most gracious consideration the circumstance that medals have been granted by Her Majesty for services rendered by the Navy, not only in the wars commencing in 1793, and ending in 1815, but also for services rendered in the late war in China, whilst the intermediate general actions, viz.:

The attack upon Algiers in 1816,

The battle of Navarino in 1827, and

The operations on the coast of Syria in 1840, are unmarked by any such distinction, has been pleased to direct, that the surviving Officers, seamen, and marines, engaged in those actions, shall also receive a similar mark of their Sovereign's gracious recollection of their services, and of Her desire to record the same; and all such Officers, seamen, and marines are, therefore, hereby called upon to transmit their claims to such distinction according to the annexed form (A), and addressed to the Secretary of the Committee of Flag Officers, Admiralty, London.

The following Flag Officers have been directed to re-assemble, as a Committee for the investigation and adjudication of all claims sent in according to the printed forms, viz.:—

Admiral Sir T. Byam Martin, G.C.B.

Admiral Sir W. Hall Gage, G.C.H.

Admiral the Hon. Sir Thos. Bladen Capel, K.C.B.

Rear-Admiral Sir James A. Gordon, K.C.B.

By command of the Lords Commissioners
of the Admiralty,
H. G. WARD.

Their Lordships have directed that for this object—Thirty additional Mates, who have passed both the Examination in Seamanship and in Navigation, shall be borne on the books of the *Excellent*.

They will receive Sea-pay, and be in all respects under Naval discipline; but they will receive the usual allowance instead of being victualled, and be lodged in the Royal Naval College. Any further expense will be defrayed by themselves.

They will be selected from such as have passed the Ordinary Examination on board the *Excellent*, and a preference will be given to those who shall have passed the best Examination.

They will receive Instruction at the Royal Naval College for the space of one year, and then be discharged.

An Examination will take place at the end of every six months.

The Mate who passes the best Examination, provided he produces satisfactory Certificates of character and professional ability from the Captains with whom he has served, and during the period of his Instruction, will receive a Lieutenant's Commission; provided always he attains a certain fixed degree of proficiency.

A limited number (Ten) of Commissioned Officers of any rank may avail themselves of the instruction thus afforded, for the space of one year. No expense will be incurred on their account; and they will be expected to pass the ordinary examination of the *Excellent* before they are admitted to the instruction at the Royal Naval College.

By Command of their Lordships, C. Wood.

EXAMINATION OF OFFICERS ON SUBJECTS CONNECTED WITH THE STEAM ENGINE.

Admiralty, 8th of December, 1849.

My Lords Commissioners of the Admiralty having had under their consideration the examination required of Officers, on subjects connected with the Steam Engine, with a view to ascertain their competency to be registered as "Steam Officers," are pleased to order that no Officer shall, henceforward, be so registered, until he has passed an examination at the Royal Naval College at Portsmouth, on the subjects herein detailed; and any Officer, whether he has acquired his knowledge in one of Her Majesty's Dockyards, or at the factories of private individuals, or has studied at the Royal Naval College, or not, is at liberty to present himself for examination, on the days fixed for the purpose, on giving timely notice to the Captain Superintendent of the College of his intention so to present himself.

The Examinations are to take place once in every three months, at the time fixed for the present Quarterly Examinations; and they will be conducted by the Professor of the College, in the presence of the Admiral Superintendent of the Dockyard and the Captain Superintendent of the College.

The subjects on which the Officers will be examined are to be, until further notice, as follows, viz. :—

1. The Elements of Geometry, Mechanics, and Dynamics.
2. Laws of Heat.
3. The application of these branches of science to the steam engine.
4. The name, and use of every part of the engines, boilers, &c.
5. Construction and principle of the engines and boilers; expansion of steam, economy of fuel, resulting from the application of the principle, and, under certain circumstances, from the employment of reduced power.
6. The nature, application, and uses of the indicator.

The Chief Engineer of the Dockyard is to furnish the Professor with questions, relating to the heads Nos. 4, 5 and 6—marked with the number which should be given for each question if answered fully and correctly; and he is to examine the written answers, and mark upon each of them the number which should, in his opinion, be given by the Professor.

The Professor is to prepare questions under the first three heads, and in like manner assign to each question the number which should be given to it, if answered fully and correctly.

The whole of these questions are to be printed, and placed in the hands of each Officer, on the day of examination.

An abstract is ultimately to be made by the Professor of the result of the examinations, shewing in one column the greatest number which could be gained under each head of the examination—and in another column the aggregate of the number under the separate heads awarded to each Officer; and this abstract is to be transmitted to the Secretary of the Admiralty, with a copy of the printed questions, for their Lordships' information.

By Command of their Lordships, JOHN PARKER.

HER MAJESTY'S ORDER IN COUNCIL, DATED JULY 30, 1849, FOR THE DISTRIBUTION OF PRIZE MONEY.

(To take effect on and after January 1st, 1850.)

To flag officer or officers one sixteenth part of the whole net proceeds arising from prizes captured from the enemy, and from all other captures, seizures, &c., as aforesaid, made by any of the ships or vessels under his or their command, and of the rewards conferred for the same. When there is but one flag officer, he shall have the entire one sixteenth; when two flag officers shall be sharing together, the chief shall have two thirds, and the other flag officer the remaining one third of the one sixteenth part; and when there shall be more than two flag officers, the chief shall receive one half of the said one sixteenth, and the remaining half shall be equally divided among the junior flag officers. Commodores of the first class and captains of the fleet to share as flag officers.

Provided always, That no flag officer, unless actually on board any of Our ships or vessels of war, and at the actual taking, sinking, burning, or otherwise destroying any ship or ships of war or privateers belonging to the enemy, shall share in the distribution of any head money or bounty money granted as a reward for the taking, sinking, burning, or otherwise destroying any such ship or vessel of the enemy.

And no flag officer, unless actually present at the capture or destruction of any pirate ship, vessel, or boat, shall be entitled to share in any distribution of the proceeds or bounty in respect of the crews of such piratical vessels.

And no flag officer shall share in any remuneration or reward conferred or awarded to any of Our ships or vessels as salvage, unless he shall have been actually on board the ship or vessel to which the award shall be made, or have personally aided and assisted in the transaction at the time the service was rendered.

No flag officer commanding in any port in the United Kingdom shall share in the proceeds of any prizes captured from the enemy, nor in other captures, seizures, rewards, or any distributive proceeds as aforesaid, made by any ships or vessels which shall sail from or leave such port by order of the Lord High Admiral, or of Our Commissioners for executing the Office of Lord High Admiral.

When ships or vessels under the command of several flag officers belonging to separate stations shall be joint captors, &c., each flag officer shall receive a proportion of the one sixteenth, according to the number of officers and men present under the command of each such flag officer; and when ships or vessels under orders from the Lord High Admiral, or from Our Commissioners for executing the office of Lord High Admiral, are joint captors, &c., with other ships or vessels under a flag or flags, the like regulation as to the apportionment of the flag share to the flag officer or officers is to be observed.

And with reference to these regulations it is to be noted, that a captain, commander, or other commanding officer of a ship or vessel shall be deemed

to be under the command of a flag when he shall actually have received some order from, or be acting in the execution of some order issued by a flag officer, whether he be or be not within the limits of the station of such flag officer; and in the event of his being directed to join a flag officer on any station, he shall be deemed to be under the command of such flag officer from the time when he arrives within the limits of the station, which circumstance is always to be carefully noted in the log book; and it shall be considered that he continues under the flag officer of such station until he shall have received some order directly from, or be acting in the execution of, some order issued by some other flag officer, duly authorized, or by the Lord High Admiral, or Our Commissioners for executing the office of Lord High Admiral.

The captain, commander, lieutenant commanding, or master commanding, or any other officer commanding any ship, sloop, or vessel of war, singly making a capture or seizure, or otherwise entitled to the distributive benefit arising from any proceeds, reward, grant, bounty, salvage, or award as aforesaid, that is to say, the officer actually in command at the time, shall have one eighth of the remainder, or if there is no flag, one eighth of the entire net proceeds; and if more than one commanding officer of the same rank of command shall be entitled to share as joint captors, &c., the one eighth shall be equally divided between them; but when captains, commanders, lieutenants commanding, and masters commanding, respectively, Our ships, sloops, and vessels of war shall share together, in whatever variety of combination, the one eighth shall be so divided into parts for a graduated apportionment as to provide for each captain receiving six parts, each commander of a sloop three parts, and each lieutenant commanding or master commanding a vessel of war two parts, which We hereby direct shall be the proportion in which they shall respectively share; commodores of the second class, and field officers of marines or of land forces serving as marines, doing duty as field officers, above the rank of major, to share as captains; and field officers of marines or of land forces serving as marines, and doing duty in the rank of major, to share as commanders of sloops.

And after provision shall thus have been made for the flag share (if any), and for the portion of the commanding officer or officers, the remainder of the net proceeds shall be distributed in ten classes, so that each officer, man, and boy composing the rest of the complements of Our ships, sloops, and vessels of war, and actually on board at the time of any such capture, seizure, &c., as aforesaid; and every person present and assisting shall receive shares, or parts of shares, according to his class, as set forth in the following scale:—

In addition to a large subscribed Capital, Assurers have the security of an Assurance Fund of upwards of a Quarter of a Million, and an Annual Income approaching £70,000, arising from the issue of 6,500 Policies.

BONUS, OR PROFIT BRANCH.

Persons assuring on the Bonus System will be annually entitled to 80 per cent. of the profits on this branch (after payment of five yearly premiums); and the profit assigned to each Policy may be either added to the sum assured, or applied in reduction of the Annual Premium.

NON-BONUS, OR LOW PREMIUM BRANCH.

The Tables on the non-participating principle afford peculiar advantages to the assured, not offered by any other Office,—and where the object is the least possible outlay in the first instance, they secure to the Policy-holder the payment of a certain sum at the death of the Assured, at a very reduced rate of Premium.

ANNUAL PREMIUM TO ASSURE £100.

One-half of the 'Whole-Term' Premium may remain on credit for seven years, or one-third of the Premium may remain for life, as a debt upon the Policy, at 5 per cent., or may be paid off at any time without notice.

Policies assigned as *bonâ fide* security not void by death from suicide, duelling, or the hands of justice. In cases of death by the above causes, the gross amount of Premiums received will be returned. Premiums paid half-yearly or quarterly. Assurances granted upon lives up to the age of 80.—Tables upon an increasing and decreasing scale of payment.

Claims paid in One Month after proofs have been approved.

Loans upon approved security.

Medical Officers attend daily in Throgmorton Street, at a Quarter before Two o'Clock.

A MEDICAL TREATISE

On Infirmities and Disorders resulting from vicious habits or excess, with practical observations, illustrated with anatomical plates in Health and Disease. This work, emanating from a qualified member of the medical profession, the result of many years' practical experience, is addressed to the numerous classes of persons who suffer from the various disorders acquired in early life. In the work he had laid down the causes which lead to their occurrence, the symptoms which indicate their presence, and the means to be adopted for their removal.—London: KENT AND RICHARDS, 52, Paternoster Row; Hannay, 63, Oxford Street; Mann, 39, Cornhill; and all Booksellers.

OPINIONS OF THE PRESS.

"In a small form the author of this book, 'A Physician,' shows his readers how to live and what to live for. He also adds some practical and useful remarks on health generally, on diet, and on longevity. The whole forms a very excellent manual for such students who would learn how to use life, not abusing it."—*Church and State Gazette.*

"Here we have sure and practical rules laid down for adoption, which, if followed accurately, will tend to the comfort, if not to the longevity of life. As a manual for general use, it is so prepared as to avoid every thing that is offensive, whilst treating upon topics requisite to be considered."—*Bell's Weekly Messenger.*

"There is a vast deal of good sense in this little volume. The rules relating to the 'important operation of eating are admirable. The moral rules are as good as the physical, and the writer is well entitled to be heard.'"—*Atlas.*

"The work before us is written in a plain homely style, and the information which it contains in connection with all matters relating to health and diet, is of an extremely valuable and useful kind."—*Sunday Times.*

THE NEW BATH GLOVE and RUBBER, on an entirely New Principle, are recommended as the most perfect Frictors for use in the Bath, affording an inconceivable addition to the luxury of bathing. The Improved Patent Flesh Gloves and Straps are articles which have been some years before the public with an increasing approbation, being alike admired for the luxury and benefit they afford, in producing, by friction, a healthy action of the skin, than which nothing can be of more vital consequence. They were first introduced to the two Services by Major-General Rolt, in his *Treatise on Moral Command*; and at once secured a high position as a therapeutic agent, with the entire approval and recommendation of the Medical Profession. In tropical climates they are indispensable. A peculiar fabric manufactured expressly for the use of Ladies. Manufactured by LAWRENCE and CO., Islington Place, Park Road, London. ARTIFICIAL TEETH.

No. 52, Fleet Street.

A NEW DISCOVERY IN TEETH.

MR. HOWARD, SURGEON DENTIST, 52, FLEET STREET, has introduced AN ENTIRELY NEW DESCRIPTION OF ARTIFICIAL TEETH, fixed without Spring Wires or Ligatures. They so perfectly resemble the natural Teeth as not to be distinguished from the originals by the closest observer. They will NEVER CHANGE COLOUR OR DECAY, and will be found very superior to any Teeth ever before used. This method does not require the extraction of roots, or any painful operation, and will support and preserve Teeth that are loose, and are guaranteed to restore articulation and mastication; and that MR. HOWARD's improvement may be within reach of the most economical, he has fixed his charges at the lowest scale possible. Decayed Teeth rendered sound and useful in mastication.

E. J. DENT,

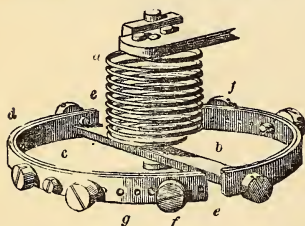

(THREE DOORS WEST OF CECIL STREET,)

CHRONOMETER, WATCH, & CLOCK MAKER

IN ORDINARY, TO HER MAJESTY THE QUEEN OF GREAT BRITAIN AND IRELAND, AND HIS ROYAL HIGHNESS PRINCE ALBERT.

IMPORTANT IMPROVEMENT IN CHRONOMETERS.

E. J. DENT begs leave to inform his friends and the public, that he has now indisputable proof to give of the success of his newly-invented and patented Chronometer. The Lords Commissioners of the Admiralty, requiring an immediate supply of Chronometers for the use of Her Majesty's Royal Navy, ordered a few to be purchased out of the number on the present public trial, instituted by their Lordships at the Royal Observatory, where there are deposited about 150 Chronometers by various makers.—**E. J. DENT** had six Chronometers on this public trial; three with the ordinary steel balance-springs, and three with steel springs coated with pure gold by the patent electro-metallurgic process, which effectually secures them from rust, arising from saline, damp, and impregnated atmospheres, to which on ship-board they are of necessity frequently liable. He has the pleasure of stating, that the Chronometers which their Lordships have been pleased to buy from him for their good performance, had all of them the balance-springs coated with pure gold.

The term *balance-spring* being technical, it is perhaps necessary to remark, that this is the spring by the elasticity of which the vibrations of the balance are returned. In the subjoined diagram, *a* is the balance-spring coated with pure gold: *b* the compensation-balance.* On the homogeneity and unchangeableness of this balance-spring, the correct performance of the chronometer mainly depends. The smallest particle of rust, by weakening the spring, retards the rate, and destroys the isochronism.

It is of paramount importance to explain, why a steel balance-spring coated only with pure gold has great advantage over one consisting of gold *entirely*. Steel, when tempered, possesses greater elasticity and tenacity than any other metal; is of easy and certain manufacture; its specific gravity is light; while its only defect is its liability to rust. Gold, on the contrary, is so soft, as to have but little elasticity, and if alloyed is liable to break in use. It is also of difficult and uncertain manufacture. Its great specific gravity when compared with steel, is a serious objection, and, when manufactured into a balance-spring, its error of rate, arising from variation of temperature, as much greater than that which takes place in steel. A proof that gold balance-springs are highly ineligible is to be deduced from the fact, that many of the old chronometers purchased by Government previously to the public trial were constructed with gold balance-springs, which were afterwards exchanged for steel ones. Besides, there is no account of a single chronometer with a gold balance-spring having been placed on the Government public trials, although hundreds of steel ones have been submitted during a space of nearly twenty years. By the patent electro-metallurgic process, the highest elastic metal receives all the protection of the durability of gold, without its surface being subjected to the slightest injury.

E. J. DENT is confident that, during the last 18 months, he has sold more chronometers to the Government than any other maker, although nearly 300 chronometers have been placed in competition with his at the Royal Observatory. In September last, he was one who received the highest reward now given by the Government for the good performance of chronometers; and to the above satisfactory recent statements he has to add the high honour of having received the great Government reward for the unrivalled performance of his chronometer, "**DENT, No. 114,**" which has never been equalled in good performance during the whole thirteen years' public trial instituted by order of the Lords Commissioners of the Admiralty at the Royal Observatory. Its variation of rate during twelve months was only 0.54 hundredths of a second.

Dent's Lectures on Watches and other Time-keepers.

An Illustrated Abstract from Two Lectures on the Construction and Management of Chronometers, Watches, and Clocks, delivered by Mr. **DENT**, in May, 1841, before the Members of the United Service Institution, has been arranged for the information of general readers. The Pamphlet is published by the Author at No. 82, Strand, price 1s., but *gratis* to customers, on application.

**SILVER SUPERSEDED by RICHARD and JOHN SLACK'S CHEMICALLY
PURIFIED NICKEL SILVER.**

A good **SUBSTITUTE** for **SILVER** has long been sought after, and numerous have been the attempts to produce a perfect metal that will retain its colour when in use. How fruitless the attempts have been the public know too well, from the fact that all their purchases have, after a few days' wear, exhibited a colour little better than brass. The very severe tests that have been applied to our metal (which in all cases it has withstood) at once places it pre-eminent above all others, and from its silver-like appearance, its intrinsic and valuable properties, gives us confidence in asserting that it is, and must remain, the **ONLY PURE AND PERFECT SUBSTITUTE FOR SILVER.**

RICHARD and JOHN SLACK, in submitting the above prices, beg it to be understood, it is for articles of the best quality only.

The extensive patronage their establishment has received during a period of nearly thirty years (1818), will be some proof the public have not been deceived; but as a further guarantee, they will continue to exchange any article not approved of, or return the money, it being their intention to sell only such articles as will do them credit, and give satisfaction by their durability.

COLES'S PATENT TRUSSES.

Dr. THORNTON, the eminent Botanist, to Mr. W. COLES.

SIR,—After six months wearing a truss of your construction, I am perfectly cured of an inguinal hernia, which was in appearance the size of a watch, and which had existed for six months. I am happy now to inform you that I have left off my truss a fortnight, and have not experienced any descent of the hernia. I, therefore, most heartily wish you that success which your ingenuity so amply deserves.

36, Howland Street, Fitzroy Square, June 22, 1830.

Blackheath, 16th July, 1832.

COLONEL FRANKLIN informs those who have ruptures, that he has been wearing Trusses thirty years, and he never met with but one individual who was master of the complaint. He has likewise an elder brother, a Colonel in the Hon. East India Company's Service, who has worn a similar kind of Truss for many years, who can say the same. Mr. COLES, of Charing Cross, is the individual alluded to.

The Colonel has likewise given Mr. COLES his certificate in favour of his PATENT MEDICATED BANDS for the Cure of Rheumatism, from which he had been a great sufferer.

48, Upper Grosvenor Street, Grosvenor Square, 15th May, 1848.

The Rev. Dr. DOWDESWELL informs Mr. COLES that, for many years before he called at his establishment at Charing Cross, he had worn trusses, got up, as he supposed, by the best London makers; but he considers it due to Mr. COLES to acknowledge that his Patent Trusses, which he has also worn for many years, are as much superior to those which he has formerly used, as words can possibly describe them.

Dr. D., in authorising Mr. COLES to give it publicity, feels assured that he is conferring a boon on society.

British Museum, 9th Nov., 1848.

SIR,—Having suffered much from the use of imperfect Trusses, I had recourse to your Patent, two of which I wore for sixteen years, which cured me completely.

I have now the pleasure to say, that for the last two years I have not had a Truss on my person.—I am, Sir, yours with gratitude,

WILLIAM LEACH.

THE ARMY

AND NAVY.

To the Gallant and distinguished Members of the United Service, and the Nobility and Gentry of the United Kingdom.

L. HYAM & Co.,

ARMY & NAVY TAILORS, CLOTHIERS, & GENERAL OUTFITTERS,

36, Gracechurch Street, and 86, Oxford Street, London,

RETURN their sincere acknowledgments to the Gentlemen of the United Service and likewise to the Nobility and Gentry, for the flattering support which they have already received at their above unique and superb Establishments; at the same time, they cannot allow a New Year to dawn upon them without entering into a few particulars relative to their position in business, which enables them to furnish

Dress or Undress Uniforms

in a style minutely conformable to the present Service Regulations, combining splendour, beauty, excellence, and durability, at prices surprisingly lower than at any other establishment in the great Metropolis.

It is a fact, corroborated by Military and Naval Gentlemen, that monstrously exorbitant charges have been invariably levied on Military and Naval Costumes—charges out of all proportion when compared with other professions; and L. HYAM and Co., in urging their claims, do so with the full intention of proving most satisfactorily that such charges are unwarrantable, and that they will insure all

Military and Naval Uniforms

Forty per Cent. cheaper than any other house in the trade.

L. HYAM & Co., being very extensive Manufacturers, and having stupendous Branch Establishments at

23, New Street, Birmingham,
26, Market Street, Manchester,

6, Union Street, Bristol,

are enabled to produce clothing without any *intermediate profits*, thereby insuring to their distinguished Patrons *advantages* which no other establishment has the means or capabilities of presenting.

L. HYAM & Co.'s

GENERAL STOCK OF FASHIONABLE CLOTHING,

comprises every novelty in Gentlemanly Attire which Art and Science can command; in extent it is unrivalled—in beauty it is unapproachable—so that all who once patronize the

PANTECHNETHECA

insure indisputable proofs of the superiority and cheapness which characterize these important Establishments.

The Superiority of L. Hyam & Co.'s Liveries

over all others having been confirmed by numerous and influential parties, they would respectfully solicit *one trial*, convinced that a *clear saving of One-Half* would be the result, as the Proprietors are fully determined to make this important Branch of Business a leading feature in their Establishments.

“OLD ENGLAND’S WOODEN WALLS.”

An Englishman has ever view’d with pride,
That mighty Fleet which swells the ocean’s tide.

“The Wooden Walls of Old England” have long been the pride of Britain and the terror of foreign nations. Our navy force is that which preserves this Island as the “mistress of the seas;” and, but for the strength of our naval fortifications, England might become the prey of any and every foreign invader. We selected this subject, not for a lengthened dissertation on the prowess of the British fleet, but merely for a passing thought in the way of comparison, touching our Winter attire.

The warm winter clothing of E. MOSES and SON may be likened to the “Wooden Walls of Old England” in many respects; and if you would be protected from the *storming of elemental war*, you cannot do better than *wall* yourself round with a strong winter suit from E. MOSES and SON. This is the best *armour* that you can adopt, which will prove sufficient to screen you from the *assailings of tyrant winter*. The *hailstones*, like *shot*, may be sent forth in *volleys*, but if you are protected by the *cloth walls* of E. MOSES and SON, depend upon it you will be well fortified, and that you will have nothing to fear.

You need not dread the elemental wrath,
Whilst you’re protected by a *wall of cloth*.

E. MOSES and SON have only to add, that they have on hand a stock of Winter dress, well worthy the patronage of the public, both as regards quality and economy—the twin requisites of MOSES and SON’s establishment.

NAVAL UNIFORMS.

E. MOSES and SON wish particularly to draw attention to the above, which are made upon the same scale of profit as for ordinary clothing, and when compared with the prices usually charged for Uniforms, a vast saving will be found.

ROWLANDS' MACASSAR OIL.

It may with truth be averred, that ROWLANDS' MACASSAR OIL has enjoyed an extent of patronage and public favour during the last half century which is totally unexampled in the annals of felicitous discovery. The extraordinary efficacy and happy amalgamation of its PURELY EXOTIC MATERIALS have rendered it justly renowned throughout the world for its remarkable virtues in *nourishing, preserving, and beautifying* the Human Hair. It insinuates its balsamic properties into the pores of the head, nourishes the Hair in its embryo state, accelerates its growth, cleanses it from Scurf and Dandriff, sustains it in maturity, and continues its possession of healthy vigor, silky softness, and luxurious redundancy to the latest period of human life. In the growth of WHISKERS, MUSTACHIOS, and EYEBROWS it is also unfailing in its stimulative operation. For Children it is especially recommended, as forming the basis of a beautiful head of hair, and rendering the use of the fine-comb unnecessary. Its invaluable properties have obtained the especial patronage of Her Majesty the Queen, the Court, and the whole of the Royal Family of Great Britain, and of every Court of the civilized world.

Price, 3s. 6d. and 7s.; or Family Bottles (equal to four small) at 10s. 6d.; and double that size, 21s.

"Linton, Cambridge, Oct., 25, 1847.

"GENTLEMEN,—A striking instance of the efficacy of your Macassar Oil in the restoration of the Hair has just come under my notice. The person alluded to is a young man named Haylock, of Ashdon, near this place, whose entire head of hair came off by some unaccountable means. He purchased of me several different popular preparations, which he regularly and faithfully used, but without effecting the least apparent change. At last I advised him to try a bottle of your Macassar Oil; and on Friday last he communicated to me the pleasing intelligence of the re-appearance of a thick head of hair. You can make what use you please of this, and refer inquirers to, yours respectfully,

P A T E N T

GUTTA PERCHA TUBING.

This Tubing is alkali and acid-proof, being affected only by the *strongest* oil of vitriol and nitric acid. The most concentrated acetic, hydrofluoric, and muriatic acid, and chlorine, *being without action upon it*; it is also unaffected by any of the cold fixed oils, &c. In case of any stoppage, an incision can be made in the Tubing with a sharp knife, and readily closed again by means of a warm iron.

This Tubing is totally impervious to wet, and may be steeped in water or buried in damp or marshy ground without injury. It is unaffected by salt water, and therefore valuable on shipboard.

Amongst the peculiar properties possessed by this Tubing, which render it an article of great value, not only to manufacturers, but to the public generally, are the following :

Lightness, combined with remarkable strength, (the $\frac{3}{4}$ -inch tubes having resisted a pressure of 337 lbs. on the square inch without bursting.)

Non-affection by the carbonic acid, or fixed air in water, (so injurious to health in the use of leaden pipes) acetic, hydrofluoric or muriatic acids, alkalies, grease, &c. *This remarkable property renders Gutta Percha so valuable for the conveyance of water, lining of cisterns, &c., being free from the deleterious effects to health resulting from the use of lead for those purposes.*

Indestructibility by wet, moisture, &c.

Peculiar power of resisting frost.

Great lengths in which it can be made (50 to 500 feet) without a joint.

Ease with which the requisite joints can be made.

Facility with which it can be cut open in case of stoppage, and re-closed.

Extraordinary power of conducting sound.

GUTTA PERCHA TUBING IS APPLICABLE FOR THE FOLLOWING PURPOSES :—

The Conveyance of Water, Oil, Acids, and other Chemicals, Liquid Manures, &c.

Drain and Soil Pipes.

Suction Pipes for Fire Engines.

Pump Barrels, and Feeding Pipes.

Ship Pumps. Syphons.

Ventilation, &c., of Mines, Public Buildings, &c.

For Watering Gardens and Streets, Washing Windows, Damping Floors, &c.

Ear and Speaking Trumpets.

Speaking Tubes in Warehouses, Dwelling Houses, Ships, &c. in lieu of Bells.

For enabling Deaf Persons to hear Sermons, &c.

THE GUTTA PERCHA COMPANY

BEG TO CALL ATTENTION TO THE FOLLOWING

TESTIMONIALS

WHICH THEY HAVE RECEIVED

Relative to the Valuable Properties of the **PATENT** **GUTTA PERCHA TUBING.**

Power of Conducting Sound.

From the **ELECTRIC TELEGRAPH COMPANY**, Liverpool Station.

In reply to your note we beg to inform you that the Gutta Percha Tubing in use in this office is most efficient as a conductor of sound, and that the *lowest whisper* can be easily heard from one end to the other.

JOHN POPE COX, *Supr.*

From **THOMAS BARRETT, Esq., M.D., Bath.**

Surgeon to the Bath Ear Infirmary.

I have much pleasure in bearing my testimony to the value of Gutta Percha as a *conductor of sound*, more particularly with reference to its applicability to "Ear Trumpets." In all cases in which I have occasion to recommend "Voice Conductors," I find Gutta Percha to answer the purpose better than any other substance of which these Tubes are ordinarily made.

Offices of the **GUARDIANS of the POOR**, Birmingham.

I have much pleasure in complying with your request to be informed how far the Gutta Percha Tubing answers for a Speaking Pipe. So perfect is the conveyance of sound, that directions given in the *lowest tone* are *more audible at the extremity* of the Tubing than would be a conversation in the same tone, *across the table*, I cannot speak of it for such purposes in terms too *highly*.

EDWARD PITT, *Clerk.*

From **JOSEPH SPENCE, Esq., York.**

"For a few months past we have communicated between the shop and two warehouses by means of Gutta Percha Tubes, the larger of which exceeds fifty feet, and is of necessity much bent in some parts of its course. Through these Tubes we can with entire facility convey messages or hold conversations, without persons near being sensible to any sound; for even low whispers into one mouthpiece can be *distinctly heard* at the other when the ear of the listener is applied."

From **Mr. J. P. BRAGG, Jeweller, Birmingham.**

In reply to your inquiries I beg to say that the $\frac{1}{2}$ -inch speaking tube you fitted up for me answers admirably, saving much time, trouble, and inconvenience.

I have no hesitation in strongly recommending their use to all who require frequent communication with their workshops, and would add, that their cheapness and the *rapidity with which you apply them to premises constitutes a great recommendation.*

From Messrs. GOODE & BOLAND, Birmingham.

In reply to your inquiry we have pleasure in informing you that the Fourteen Gutta Percha Speaking Tubes which have been fitted up in our works, by Mr. Bur-stall, answer most admirably.

We are now enabled to hold conversations with the Foremen in our various departments without a moment's loss of time, besides saving the fatigue of numerous journeys up and down stairs.

The length of these tubes vary from 15 to 115-feet, but even with the latter distance we can distinctly hear any communication made through the tube, although it is but $\frac{1}{2}$ -inch in diameter.

We did not anticipate that the one in the engine house would be of any service owing to the noise of the machinery, but to the surprise of the engine man, he can, by applying his finger to one ear, and the tube to the other, hear messages given in the warehouse (87 feet distant) as distinctly as if the person stood close to his side.

We have no hesitation whatever in stating that these tubes effect a great saving to us of time and labour.

We think that the Gutta Percha whistles are superior (for calling attention) to those made of metal.

From Mr. W. SMITH, Mercury Office, Birmingham.

I have much pleasure in stating that the Gutta Percha Speaking Tubes fitted up in our office answer admirably well, and from experience are found very useful.

From Messrs. J. & D. RUSSELL, Solicitors, York.

We can confidently recommend the Gutta Percha Tube as a most efficient conductor of sound. The Speaking Tube used in our office is so perfect that the lowest tone of voice can be heard at its extremity.

For Deaf Persons in Churches & Chapels.

From the REV. THOMAS MANN, Trowbridge.

The Gutta Percha Hearing Apparatus* that I have fitted up in my Chapel answers so well, that persons who have not heard a sermon for many years, and who could only hear conversations when spoken in the ear, *can now hear every word with the greatest distinctness and comfort*. It is equally applicable to twenty persons as to one.

*This consists of a large oval funnel of Sheet Gutta Percha inserted in the book-board in front of the Bible, attached to this is a piece of inch-tubing, passing down on the inside of the pulpit and under the floor, like a main gas-pipe, attached to this are branches of smaller tubing, leading to any pew where a deaf person may sit; and, at the end of each is an ear-piece. You may thus supply a whole congregation, and enable all to hear without the least difficulty or effort on the part of the preacher.

Washing Carriages, Watering Gardens, &c.

From Mr. JAMES YOUNG, Livery Stables, Leeds.

I beg to convey to you a sense of my high approval of Gutta Percha Tubing—I have used it now for nearly two years for *washing my carriages*, and find it invaluable for that purpose. I have it attached to the Water Works Company's Pipe, consequently have a force of water which brings off the dirt much better than the regular process of washing with mops, &c., and has this great advantage that it does not injure the paint. I also find it extremely useful for washing out the stalls, stables, and yard.

Extraordinary Tests of Strength.

From the WATER WORKS, Birmingham.

I have experimented upon the pieces of Gutta Percha Tubes, which Mr. Burstall forwarded to me, by placing them at the end of Service Pipes, where the constant pressure has been above 200-feet head of water, and where the ram, caused by the shutting off the flow of water suddenly, has consequently been very great. These experiments have been attended with perfect success, so far as the capability of these pipes to withstand hydraulic pressure, whether steadily or intermittently applied, is concerned. These Pipes have now been subjected to severe trials for upwards of two months, and I cannot perceive any mark of their being deteriorated. I find that the slight elasticity of these Tubes very much diminishes the action of the ram on the lead fittings to which they have been applied. J. ROFE, *Engineer*.

The following letter of explanation from Mr. T. BURSTALL, accompanied the above.

I enclose you Mr. Rofe's letter, and as I assisted in the above experiment, a little explanation will enable you to understand what has been done. The Tubes were $\frac{3}{4}$ -inch bore, the material $\frac{1}{8}$ -thick;—and in addition to the trial named by Mr. Rofe, they were also tested by the Water Company's Proofing Pump, with its regular load of 250 pounds to the square inch—afterwards we added weight up to 337 pounds, and I wished to have gone to 500, but the lever of the valve would bear no more weight; we were unable to burst the pipe.

A strong man worked the pump as quick as he could, and the pulsations in the pipes were very distinct, but owing to the slight elasticity of the Gutta Percha, not the slightest permanent effect could be discovered. The joints were very simply and easily made, and stood perfectly tight.

From the WATER WORKS, Leeds.

I have the pleasure to inform you that the Gutta Percha Pipe you supplied to us on the 6th Feb. last, answers our purpose very well. It is 1-inch diameter, and 5-feet long; it is attached to our pipe-proving apparatus, and resists a pressure of 90 lbs. per square inch, with every pipe proved, and very frequently 173 lbs. per square inch, without any perceptible change at present.

We have proved not less than four miles of pipe since we got it.

JOSEPH ADAMSON, *Inspector*.

Power of Resisting Frost.

From R. UNDERHILL, Esq., Birmingham.

Last winter I filled a half-inch Gutta Percha Pipe with water, having covered the ends also with the same material, and I exposed it for two nights of severe frost. Early on the second morning I cut the pipe through and found the water *as liquid as when put in*. This circumstance of course proves that Gutta Percha is an excellent non-conductor.

Conveyance of Water.

From SIR RAYMOND JARVIS, Ventnor, Isle of Wight.

"There was at first a slight taste in the water which disappeared in a few days, I see no reason whatever why this Tubing should not supersede all metallic substances for the conveyance of water, to the great benefit of the community."

Suction Pipe for Fire Engines.

From the YORKSHIRE FIRE & LIFE INSURANCE COMPY., York

I have tried the Gutta Percha Tubing as a Suction Pipe to our Fire Engine, and find that it answers the purpose well. W. L. NEWMAN, *Actuary & Secretary*.

For Sprinkling Water.

From Mr. JOHN MISTER, Round Hills Malting, near Birmingham.

I have found your Gutta Percha Tubing to answer admirably for sprinkling water in my malting. It is much better than any other I have hitherto tried, and at *one-third the expense*.

Uses on Shipboard.

From Mr. ROBERT WALES, Liverpool.

I have been supplying your Gutta Percha Piping in considerable quantities to be used on board emigrant ships, for the purpose of pumping up the water from the tanks or casks below decks.

By means of this Tubing the water can now be brought up with about one quarter the trouble than when it had to be carried up in buckets.

I find that the Gutta Percha Piping is highly approved of by the different captains in whose vessels it has been used.

I believe when its value becomes more known it will come into general use.

From Messrs. SIDDERLEY & Co., Liverpool.

We have supplied a great number of ships with pumps for raising the fresh water from the casks in the hold, for which we have used the Gutta Percha Pipe, and it has in all cases been highly approved of by the captains, on account of its cleanliness, durability, and the facility with which it can be worked from cask to cask.

From Messrs. FOSTER & SON, Liverpool.

In answer to your inquiry, we beg to state that the Gutta Percha Tubing we have had from you is used on board ships to convey the water from the tanks or casks in the hold to the deck, and have great pleasure in stating, that from its lightness and flexibility it is very well adapted for that purpose, as it can be easily and quickly moved from one tank or cask to another.

The best proof we can give of its efficiency is, *that we are now fixing it to almost every ship's pumps we fit up.*

Conveyance of Chemicals.

From Messrs. E. & J. STURGE, Birmingham.

J. & E. Sturge have much pleasure in stating that they have now for a considerable time made use of the Gutta Percha Tubes for the transmission of *highly concentrated hydrochloric acid*, which appears to exert no perceptible action upon them.

Conveyance of Gas.

From GEORGE RISELEY, Esq., Hotwells, Bristol,

The Gutta Percha Tubing that I purchased of you for the temporary gas fittings required for the Mayor's Ball at the Victoria Rooms, has answered the purpose admirably; its lightness enabled me to attach it to the permanent fittings without the slightest risk of injury to them, and its flexibility to wind and twist with ease to the different figures and burners where the gas was required. I do not perceive that the gas has had any effect on the material, except to leave the same unpleasant smell that it does in other pipes, among the varieties of my stock and in the business of temporary fitting and decorating, I consider it quite an acquisition.

Opinions of the Press.

GUTTA PERCHA TUBING.—Some very important results have just been arrived at, by a series of experiments made by the Birmingham Water Works Company, relative to the strength of Gutta Percha Tubing; with a view to its applicability for the conveyance of water. Mr. Rofe, the engineer, took a tube of three quarters of an inch diameter (the material being one-eighth thick), and having attached it to the water-main, subjected it to a pressure of *two hundred-feet head of water*. It was afterwards connected with the hydraulic proofing-pump, and tested up to *three hundred and thirty-seven pounds on the square inch*, without bursting. The lever of the pump would bear no further pressure, but apparently, the strength of the material would have enabled it to bear five hundred pounds on the square inch. The tubing being somewhat elastic, slightly yielded to the above extraordinary pressure; but on its withdrawal, the tube returned to its original size.—*Times*.

If a Gutta Percha tube be carried from the deck to the mast-head of a ship, a conversation may be distinctly carried on, even during a storm between the man on the look-out and the captain. It is also useful for conversation between the helmsman and the captain whilst in the cabin.—*Journal of Commerce*.

PREVENTION OF MINE ACCIDENTS.—Amongst the numerous ingenious suggestions which have been made for preventing the frequent recurrence of those fatal catastrophes by which so many hundreds of our fellow-beings are suddenly launched into eternity, Gutta Percha Tubing has been proposed, on the principle of Whishaw's Telekophonon, or speaking telegraph. It appears to us, that this simple and economical apparatus might be the means of saving many lives, and preventing much destruction of property.—*Mining Journal*.

TO EMIGRANTS.—Gutta Percha tubing, which being so very light, may be easily exported, will form a valuable means for supplying new settlements with water.—*Standard of Freedom*.

POISONED WATER.—It is not generally known to the public that the carbonic acid, or fixed air in water, *decomposes* lead pipes, and thereby imparts poisonous properties to the water. Within the past few months Sir Raymond Jarvis, of Ventnor, had occasion to repair the pumps which supplied his mansion, when, to his amazement, it was found that the large leaden feeding pipe was almost entirely eaten away by the water, and the interior covered with a white and poisonous crust. Sir Raymond has had the whole replaced with Gutta Percha Tubing, which, from its extraordinary alkali and acid-proof qualities, will preserve the water perfectly pure. It seems remarkable that, at the moment when our sanitary movements have commenced with so much vigour, Gutta Percha should have come to our aid, not only as a means of preserving the feet from damp and wet, but also as a medium for supplying us with the best of liquids—water, untainted by the deleterious properties which we have endured by the use of leaden pipes.—*The Patent Journal*.

DOMESTIC TELEGRAPH.—The extraordinary despatch of Railways and Electric Telegraphs seem to have given an impetus to the national character in economizing time in an infinite variety of ways never even dreamt of, a few years ago. A scientific member of the Society of Friends has rendered the novel material of Gutta Percha Tubing subservient to an important saving of time and footsteps in the domestic circle. In consequence of the peculiar power possessed by this Tubing for the transmission of sound, he has applied it for the conveyance of messages from the parlour to the kitchen. Even

a whisper at the parlour mouthpiece is distinctly heard when the ear is applied at the other end. Instead therefore of the servant having to answer the bell as formerly and then descend to the kitchen to bring up what is wanted, the mistress calls attention by gently blowing into the tube, which sounds a whistle in the kitchen, and then makes known her wants to the servant who is able at once to attend to them. By this means the mistress not only secures the execution of her orders in half the usual time, but the servant is saved a *double journey*.—*Daily News*.

For the conveyance of sound it possesses astonishing facilities; tubes made of it conveying the slightest whisper perfectly audible from end to end—as hose for carrying water, and as a substitute for leather in pumps especially in mills and on board ships, it recommends itself to universal adoption. It is liable to none of the accidents which attend pipes and other contrivances where fractures or the failure of sewing may take place; or if, perchance, any repair should be needed, it can be effected with the greatest ease.—*Patriot*.

GUTTA PERCHA TUBING will be found of great advantage in ventilating the lower deck, and ship-hold; it resists the action of salt water, only becoming harder when exposed to it. A few coils of $\frac{3}{4}$ -inch Tubing would be serviceable where a communication was desirable with the shore, as for instance in case of shipwreck, as a conversation could by this means be carried on at very great distances, and the tubing would be found quite strong enough to convey the wretched mariner on shore.—*Mercantile Journal*.

GUTTA PERCHA TUBING.—This tubing is such an extraordinary conductor of sound, that its value, not only to deaf persons, but to the public generally, will speedily be appreciated. It has already been fitted up in dwelling houses, in lieu of bells. As speaking tubes for giving and receiving messages in mines, railway stations, prisons, workhouses, hotels, and all large establishments, it is invaluable.—*Mechanics' Magazine*.

GUTTA PERCHA.—This novel material, so famed for its utility, has lately risen to an extraordinary elevation in the metropolis, having reached even to the top of the Monument, from whence visitors to that noted column may look upon a Gutta Percha Tube one hundred and ninety feet in length, three inches in diameter, and five-eighths of an inch thick. This tube passes up the centre of the Monument from its base to the gallery, at which point it is *upheld by a flange, also made of Gutta Percha*. It is intended for the conveyance of water, and is, we understand, highly approved by the civic authorities, being light in weight and economic in price. The above adaptation of Gutta Percha affords another striking instance of its very general applicability.—*Times*.

TELEKOPHENON.—This name has been given to an ingenious application of Gutta Percha Tubing, which, it appears, is not only a valuable medium for the conveyance of water, but possesses an extraordinary power of conducting Sound. The Telekophonon is a tube of this material which may be carried from one room or building to another, and through which a conversation may be distinctly carried on: even a *whisper* is heard at a considerable distance. By means of a whistle in the mouth-piece 'attention' can be called by the master in his office to the workmen, &c., in the attic, and messages given, and answers returned, as readily as though they were close to each other. The saving of time and footsteps which this speaking Telegraph will effect, both to employers and employed, must secure its extensive adoption.—*Architect*.

PATENT GUTTA PERCHA TUBES.

INSTRUCTIONS FOR MAKING JOINTS.

For Straight Tubes.—Place in boiling water the two ends which are to be joined, until they expand externally and assume a bell form. Open the tube to

its proper dimensions, if at all contracted below the bell. *After all moisture is wiped off*, flatten the expanded portions by gently pressing out or flattening the

the two ends. The flattened ends may be then fitted accurately, and nipped together with the thumb and finger; the flanches adhering and forming a strong and permanent union. When nearly cold, pare down the flanches with scissors to half their size if needful. If the surfaces are *slightly* rubbed with pure naphtha, it will ensure a firm joint.

Another Method.—Soften the two ends to be joined by means of hot water, and enlarge their calibre by an iron, or other tool, sufficiently to receive a small

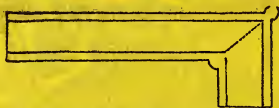

piece of the same size as those to be joined. *Having dried the parts which are to be united*, insert a small piece of tube about the length of the diameter of those to be joined, say if half-inch tube, let the small piece be not less than half an inch long, and so on; bring the expanded ends into contact with each other, and seal them together by a warm iron, *not too hot*.

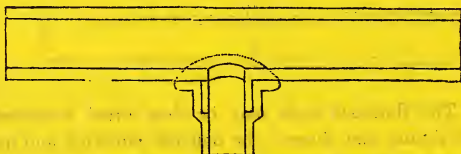

For the formation of an Elbow Joint.—Cut the two pieces of tube to be united, at such a slope as will form the required angle. Heat the cut edges

sufficiently to soften them, bring them accurately together with firm but gentle pressure, as it is important to avoid raising a burr in the inner side. Pinch the outer edges of the suture together, and then cool by plunging into cold water.

Wipe off all moisture, and strengthen the seam by attaching a thin slip of softened Gutta Percha round the joint.

For the attachment of a small tube to a larger one, say at a right angle with it.—Cut an opening in the side of the larger tube, the size of the tube to be inserted. From the small tube, cut off a piece one inch in length, giving one end a curved form, corresponding to the opening in the large tube; warm the edges as before directed, and apply them to the orifice of the large tube by gentle pressure, using a mandrel or other means to prevent a burr on the inner side. Take the remaining portion of tube to be joined, and having softened and expanded the end sufficiently to receive the piece previously attached, pass the enlarged mouth over the said piece, leaving a distended sticking surface twice or three times as large as the tube itself, drawing it steadily over so as to avoid a ridge or burr. Press it, whilst hot, close round the curved surface of the larger tube, *which should be gently heated to receive it*. Wipe down the edges with a hot iron and the junction is complete. The accompanying sketch will more fully explain the process.

Where the calibre of the tube is large, and the coat not very thin and a slight internal burr of no consequence, it is sufficient to cut the concave opening in the one pipe and the convex extremity of the other to match, so that their sectional areas shall exactly coincide and then apply them together accurately with moderate pressure, after heating as before described. The joint can be strengthened if needful by fixing a thin slip of Gutta Percha over the seam as before mentioned.

To join Gutta Percha Tubing to a Metal Pipe, &c.—Soften the end of the Gutta Percha tube in hot water—wipe off the moisture and then stretch it over the end of the metal pipe.

Keep gently and constantly pressing the Gutta Percha to the metal with the palm of the hand until it is *quite cold*, (which may be hastened by the pouring on of cold water), and it will form a perfect joint. No bandage or wrapping will be required, if properly done, as the Gutta Percha on cooling *gradually contracts*, and thus *bites*, or firmly grasps the metal tube.

## GUTTA PERCHA CHAMBER UTENSILS.

These Chamber Utensils are strongly recommended for Prisons, Workhouses, Lunatic Asylums, Hospitals, Shipboard, &c. They are totally unaffected by Acids. They cannot be broken however violently thrown down, and from their lightness cannot be used as weapons of offence. The following Testimonials will shew how they have been approved.

### Testimonials.

**From J. V. LAWRENCE, Esq., Governor of Dorchester Castle.**

I most willingly record my conviction that no article that has been hitherto made use of as a chamber utensil for the use of a Prison, so completely answers the purpose as Gutta Percha. Independently of being quite *free from any disagreeable smell*, and unaffected by acids, the Gutta Percha Utensils are so perfectly light that they cannot be made use of as *weapons of assault*, and however violently they may be dashed upon the floor, cannot be broken.

**From JAMES HANBROW, Esq., Governor of Lancaster Castle.**

I have much pleasure in stating that the experiment made in this Prison of your Gutta Percha Chamber Utensils is very satisfactory.

I perfectly concur in the opinion of the Governor of Dorchester Castle, that as an offensive weapon, the Gutta Percha article is much less formidable than a wooden or earthen one, and is, on that account an *important desideratum in a gaol*.

**From J. R. GROVES, Esq., of Milbank Prison, London.**

I have examined the Gutta Percha Chamber Utensil, which has been in use some time. It was emptied and washed out with cold water just before I saw it; it was particularly clean, and I think well adapted for the use of the prisoners, particularly refractory prisoners; being so light, it is not so formidable a weapon for assault, as pewter or stone ware.

**From JOHN THURNAM, Esq., M.D., of The Retreat, near York,**

Having tried the Gutta Percha Chamber Utensil in this establishment, I can have no hesitation in expressing my opinion that it is admirably adapted for the use of many insane patients during paroxysms of violent excitement.

**From JOHN KIRKMAN, Esq., M.D., of Suffolk Lunatic Asylum,  
Melton Woodbridge.**

I can speak very highly from experience of your articles manufactured of Gutta Percha. The Chamber Utensils are the best for dangerous patients to use that I have ever seen; and the Soles for shoes, combined the advantages of giving employment to quiet and convalescent patients, with the satisfactory result of that employment in the utility and comfort afforded.

## PUMP BUCKETS, VALVES, &c.

The GUTTA PERCHA COMPANY beg to bring under the notice of Mill-owners Manufacturers, &c., the great saving, both of time and expense, which is effected by the use of the Gutta Percha Pump Buckets and Valves.

These buckets may be had of any size and thickness without any seam or raised joint. They are unaffected by acids, alkalies, &c. Cold water will never soften them, and they are consequently much more durable than leather, and also cheaper.

### TESTIMONIALS.

From W. E. MILNER, Esq., Bedford Colliery, near Leigh.

We have used Gutta Percha Pump Buckets for the last eighteen months. We work our engine full 20 hours per day on an average, and have to raise water 135 yards by means of two lifts, 62½ yards each; with working barrels 12 inch diameter. We formerly used leather buckets for this purpose and considered one of them did ample service if it lasted from a month to six weeks, even when strengthened by all the *extra* aids ingenuity could suggest. Now we use Gutta Percha Buckets and without *any* extra aids; they last as many *months* as the others did weeks. We have one in use now, looking not a jot worse for five months' constant wear.

From Messrs. RICHARD & GLASBROOK, Gorse Colliery, Swansea.

We have tried your Gutta Percha for Pump Buckets, and find it to answer remarkably well, provided it is well greased when it is set to work.

From Messrs. T. & W. PIM, Foundry, English Street, Hull.

We have had the Gutta Percha Pump Buckets in use for several months, and find them to answer well.

From Mr. JOHN LANE, Thorney Paper Mills, West Drayton, Middlesex.

In reply to your inquiry, I beg to state, that I have tried your Gutta Percha Sheet for the *Valves of my Pumps*, and find it to answer much better than leather. I have now had it in use for many months, and *no repairs whatever have been required*. I can recommend it to general use amongst mill owners.

From Mr. L. S. WILLIAMS, Cefr Iron Works.

Oct. 10, 1849.

The Gutta Percha Clacks received from you have been quite satisfactory. We put one in on the 27th of March last, in a 16-inch force lift, of 25 fathoms, and it has been in continued use night and day, and to all appearance is very little the worse.

We were obliged to change our leather clacks, previous to using the Gutta Percha, invariably once a fortnight.

THE GUTTA PERCHA COMPANY have pleasure in stating that the numerous letters they have received from

## MEDICAL MEN,

Fully prove that not only will

**THE HEALTH OF THE PUBLIC**

BE MATERIALLY PROMOTED,

**BUT AN IMPORTANT SAVING OF COST EFFECTED**

BY THE USE OF

## Gutta Percha Soles.

This will not excite surprise when it is borne in mind that these Soles are *perfectly waterproof*, and wear longer than leather.

No wet or damp can possibly penetrate Gutta Percha Soles. They may be steeped in cold water for months together, and when taken out, will be found as dry and firm as when first put in and not any heavier. An important peculiarity of Gutta Percha is, it is a perfect *non-conductor*. This renders these Soles most valuable to invalids, and persons who suffer from cold feet and rheumatism.

~~~~~  
THE ADVANTAGES POSSESSED BY THESE SOLES ARE :—

They are Cheaper than Leather,
They are more durable, and more readily Repaired.
They keep the feet dry in Wet Weather,
And Warm in Cold Weather.

London, Jan. 18th, 1850.

SIR,

I have received your's, requesting my opinion of Gutta Percha as a covering for the Soles of Boots and Shoes. I understand you wish to be informed whether the use of this article is *conducive to health*, and I have much confidence in giving you my full and absolute assurance *that it is*; for being impervious to water it must necessarily keep the feet perfectly dry, an object of the highest importance in sustaining a due equilibrium of the circulation of the blood, and; moreover, this great advantage is enhanced by the fact that Gutta Percha is a non-conductor, and thus will not absorb the natural warmth of the feet in winter, nor convey heat to them while walking over radiated surfaces in summer, therefore, agreeably modifying the extremes of heat and cold.

My own experience fully bears out this statement, having worn Gutta Percha Soles from the commencement of their introduction, and I have no doubt that they will be in general use when the public is better acquainted with the value of this important article.

I am, Sir,

Your Obedient Servant,

MR. T. C. MACKLEY,

J. BEATON,

Gutta Percha Warehouse,

Operative Chemist.

*The Gutta Percha Company have the pleasure to acknowledge
the receipt of the following valuable Testimony from*

CAPTAIN SIR JOHN ROSS, R. N.

(Copy.)

LONDON, 10th Dec. 1849.

I have worn Patent Gutta Percha Soles during the last two years, and have found them most valuable for preserving the feet dry and warm. They are very superior to leather, being not only perfectly waterproof, but also more durable and cheaper.

TO SAILORS—especially those proceeding to the Arctic Regions, Gutta Percha will prove a **WARM FRIEND** owing to its peculiar property of resisting frost. I shall take care to have a supply, not only of the Soles, but also of the Bowls, Tubing, &c., for my next voyage.

JOHN ROSS,
